ABSTRACT

The specific purpose of this Directory is to create a single reference listing of all the approved family practice training programs for physicians, detailing the unique characteristics of each program. The Directory lists, by alphabetical order of States, all approved family practice residency programs in the United States through June 30, 1972. All program descriptions include the program title, location, date of operation, director's name, composition of the faculty, the number of positions available each year, a physical description of the training facility, description of the patient sources, description of training by specialty and sub-specialty, and the source of funding for the program. DATE November 13, 1972

FROM : Director, Division of Manpower Intelligence

SUBJECT: Directory - Approved Family Practice Residency Program - Contract No. NIH 71-4067

The attached "Directory - Approved Family Practice Residency Programs - 1972," was developed by the American Academy of Family Physicians (AAFP). This Directory lists, by alphabetical order of States, all approved family practice residency programs in the United States through June 30, 1972.

The AAFP has the inherent responsibility of working with the training institutions and the accrediting bodies in the development of the new specialty of family practice. In view of this role, they have a concurrent responsibility for collecting and maintaining current information related to the location of the training programs, operational and administrative structures, faculty composition, training description, and student output.

Purpose

The specific purpose of the Directory is to create a single reference listing of all of the approved family practice training programs, detailing the unique characteristics of each program. In addition, the Directory insures reliable and comparable information for directors of existing programs and for persons and institutions planning to develop new training programs. The Directory is also a recruitment aid, providing information on family practice residency programs to students who are making their choice of specialty.

The Survey of Family Practice Residency Training

The primary collection of data included in this Directory was done through the professional collaboration of the American Academy of Family Physicians and the Residency Review Committee for Family Practice. This Review Committee is composed of representatives of the American Academy of Family Physicians, the American Board of Family Physicians, and the Council on Medical Education of the American Medical Association, and has access to all pertinent information regarding the newly approved training programs in this field. Dr. Thomas Johnson, project director, assumed primary responsibility for the collection of all descriptive data enumerated in the Directory. Dr. Johnson is the Director of the Division of Education, AAFP, and a non-voting member of the Residency Review Committee.

A visitation procedure is an integral part of the approval process for all residency programs in family practice. These visitations assisted in the review and verification of data concerning physical facilities, curriculum content, and other information. The third method of data verification used was a telephone inquiry whenever questionable areas remained or changes were indicated in individual programs.

Distribution and Future Directories

The Directory has been distributed to all schools of medicine, to medical libraries, medical student organizations, and to directors of family practice training programs. Copies will be sent to hospitals, universities, and individuals on request.

A modest contract from the Division of Manpower Intelligence, under an earlier organizational structure of the Division, provided financial assistance for the development of this initial Directory. Henceforth, the Directory will be updated regularly by the AAFP. They plan to modify the format of future directories to allow for easier updating and also plan to develop summary tables, an index, and other refinements to make the Directory more useful. A compendium of family practice course offerings at the undergraduate level in medical schools will be added to future directories.

Training Program Profile

Title: Official title of training program. The hierarchical placement of these programs varies among the States. The "Department of Family Practice" generally denotes a higher organizational level within the parent institution or medical school, and the director will report directly to the dean. "Division of Family Practice" denotes programs with intermediate organizational positions whose directors may report to the dean or to the head of a department, such as community medicine. The most common title is "Family Practice Residency Program" (or "Family Practice Center"), indicating programs which are generally under the organizational direction of a medical school department, a medical center group, or a community hospital with medical school affiliation.

Site: The location (or locations) of the training programs within a given institution.

Date of Operation: The date that the program admitted the first residents for training.

Director: The individual having primary responsibility for the direction and operation of the family practice residency training.

Faculty: The composition of the faculty, including the various specialists and sub-specialists used in the interdisciplinary training of the residents. Faculty also includes the allied health professionals and related support personnel involved in the training process.

Residents: The number of positions available for each year of residency training, the allocated salaries, and the number of residents who had completed training in the program as of June 30, 1972.

Model: The physical description of the training facility and its access to projected patient population and supportive clinical services.

Patients: Description of patient sources, as required by the Residency Review Committee for approval of a training program. The three types of patients are ambulatory, hospital, and institutional. Institutional patients are those located in extended care facilities and those receiving care in community based clinics.

Training: Description of training by specialty and sub-specialty, duration of training in each specialty, clinical assignment, other unique characteristics of the training, and preceptorship arrangements.

Funding: Indication of the public and private sources of funds supporting the training programs other than financial support provided by the institution sponsoring the program.

DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency

SITE: Good Samaritan Hospital

1130 East McDowell Road

Phoenix, Arizona 85006

DATE OF OPERATION: July 1, 1970

DIRECTOR: Robert A. Price, M.D.

FACULTY: 24 family physicians, 3 psychiatrists, 1 nutritionist, and 2 social workers. Specialists in all fields.

RESIDENTS: Positions available:

First Year	4	-- $8,400
Second Year	4	-- $9,600
Third Year	4	-- $10,200

Identity retained.
No. residents completing program: None

MODEL: The Family Practice Office is located in a two-story brick medical building across the street and approximately one-half block east of the main hospital physical plant. The suite of offices on the first floor covers 3,400 square feet. It consists of a waiting room, business offices, laboratory, x-ray and private medical offices. There are eight examining rooms and facilities for a combination conference room and library.

PATIENTS: Ambulatory -- 50 families per resident from full socioeconomic range.

Hospital -- Inpatients on all services plus hospitalized patients from Family Practice Center.

Institutional -- Residents are provided with a program of seminars and visits to the various welfare, social, diagnostic, supportive, and treatment facilities offered by the community.

TRAINING: Resident's training in the Family Practice Office begins with two afternoons per week during the first year. This is increased to four afternoons during the second year, and then to six and a half day periods the third year.

In-hospital rotation on all services with a most important feature of rotation being the Emergency Department experience. There are also many special care units existing within Good Samaritan Hospital that provide an opportunity for the physician to familiarize himself with them. These are the Renal Center, Institute of Rehabilitation Medicine, the Cardiac Catheterization Laboratory, the Institute of Gastroenterology, the Neonatal Unit, the Pulmonary Function Laboratory, the Department of Nuclear Medicine, and the Cobalt Unit in the Department of Radiology.

During the second and third year the resident is encouraged to participate in at least one research program and grant funding is available for resident research in Family Medicine.

There are semi-monthly Family Practice medical management conferences to discuss the business, legal, insurance, and personnel problems of maintaining the Family Practice Office, weekly x-ray conferences and many teaching conferences and seminars conducted by the hospital's Department of Medical Education. Regular session are held in the Family Practice Office to discuss interview techniques, office counseling, as well as video-tape reviews of patient-physician sessions (history-taking, therapy, and problem patient handling).

FUNDING: This program is funded by fee-for-service.

DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency Program

SITE: Arizona Medical Center of the University of Arizona
& Affiliated Hospitals

1501 N. Campbell Avenue

Tucson, Arizona 85724

DATE OF OPERATION: July 1, 1971

DIRECTOR: Jesse W. Tapp, M.D.

FACULTY: The Family Medicine Section of the Department of Family & Community Medicine, and the other Clinical Departments of the College of Medicine.

RESIDENTS: Positions available:

First Year	4 --	$8,450
Second Year	4 --	to
Third Year	4 --	$11,525

Identity retained.
No. residents completing program: None

MODEL: Model Practice Unit under development adjacent to the Arizona Medical Center to serve the university community. Interim location of Model Unit is located at the Family Health Center, 332 S. Freeway, Tucson, Arizona 85705. The model unit has available and staffed a clinical laboratory, x-ray unit, and minor surgical treatment room. Each examining room is fully equipped and designed for a complete examination as well as a counseling session.

PATIENTS: Ambulatory -- The Family Health Center serves the residents of all socioeconomic levels in the Tucson model city area.

Hospital -- Patients who require hospitalization from the Model Practice Unit are admitted to a teaching bed to be followed through illness by Family Practice resident.

TRAINING: The Model Practice Unit (MPU) is available for one half day session per week for the first year resident and at least three half day sessions per week for both the second and third year residents. Full time and volunteer community attending family physicians supervise the resident and he is assisted by a clinical nurse and a nurse's aide.

Experience with inpatients is provided at three different levels corresponding to the three years of the typical program. In the first year, the family practice resident is assigned to the primary care services operated by the departments of internal medicine, pediatrics and psychiatry of the College of Medicine in which he carries out the same duties as the other first year primary care house officers. In the second year, the family practice resident begins to follow a schedule more resembling the active practice of medicine in the community wherein he is assigned additional families in the model family practice unit, and he can be devoted to their care for almost half of his time. Also, he can follow patients throughout the year in the ambulatory services of psychiatry, obstetrics and gynecology. He has a regular period each week for assignment to the labor and delivery rooms as well as a longitudinal responsibility with the surgical service, mainly based in the emergency service area of the University Hospital in order to acquire extensive experience with the diagnosis and management of trauma and other acute surgical conditions of all types. Block time assignments are arranged also with each of these services for those residents requiring more ward or concentrated outpatient specialty experience.

In the third year, the resident is based fully in the model family practice unit. He is responsible for the hospital care of all patients from the model practice unit including obstetrical deliveries of his own patients. The third year closely resembles practice in everyday community setting. In addition, a wide variety of elective experiences are available during the year.

Medical students are involved in the program. Conferences are organized for the family practice residents to share their experience with their patients for the benefit of the other specialties. While assigned to other services the residents are responsible to participate in the clinical conferences of that service in the same manner as the other house staff.

FUNDING: The residency is financially supported by the University of Arizona through the budget of the College of Medicine and the operation of the University Hospital with its house staff budget.

SITE:	Baptist Medical Center, 1700 W. 13th St., Little Rock St. Vincent's Infirmary, Markham at University Sts., Little Rock University Hospital, 4301 W. Markham, Little Rock
DATE OF OPERATION:	July 1, 1971
DIRECTOR:	John Tudor, Jr., M.D., ABFP
FACULTY:	Full-time directors of medical education of all three hospitals. Appointed volunteer teacher on staff of the two community hospitals include family physicians and representatives of all other specialties and selected consultants from the university medical center staff.

RESIDENTS:

Positions available:		
First Year	8	$8,400
Second Year	8	$8,700
Third Year	8	$9,000
Fourth Year	2	Salary Open

Identity retained.
No. residents completing program: None

MODEL: The family practice center is located in the school of nursing building adjacent to the Baptist Medical Center. Two combination offices-examining rooms and nurses offices with laboratory, administrative offices, medical records, and conference rooms. 5,000 square feet is utilized for the model family practice unit.

PATIENTS: Ambulatory -- Patients are accepted without restriction. The major source of patients being hospital employees, families of medical students, friends of the director's previous patient load, new patients referred from the county medical society and from other physicians. The majority of patients are paying patients.

Hospital -- Inpatients will be admitted by the resident from his families and will be assigned individually by the teaching staff. Patients can be admitted into all three of the affiliated hospitals.

Institutional -- Extended care facilities, coordinated contacts with public health department, community organizations, child development center, community health planning and social service agencies.

TRAINING: The family practice resident spends 10% of his first year in the model family practice unit. The remaining portion of his first year is spent in rotation through the clinical disciplines on block assignments. The time in the model unit is increased to 75% in the third year. Internal medicine 10%, pediatrics 7%, surgery 5%, ob-gyn 5%, psychiatry 5%, community medicine 3%, electives 20%. Conferences are held ten hours weekly. Medical students participate in the training. At the present time their courses are elective. Allied health personnel receiving training in the model family practice unit are -- student nurses.

FUNDING: This program is funded jointly by the three institutions participating as well as fee-for-service, state and federal appropriations.

DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE:	Family Practice Residency Program
SITE:	Naval Hospital Marine Corps Base Camp Pendleton, California 92055
DATE OF OPERATION:	August 1, 1972
DIRECTOR:	LCDR Paul A. Bagnulo, MC USN
FACULTY:	6 Family Physicians, 13 Internists, 9 Pediatricians, 6 Psychiatrists, 6 Obstetricians-Gynecologists, 11 Surgeons.
RESIDENTS:	Positions available: First Year 5 Second Year 5 Third Year 5 Salary range: Normal pay of rank Identity retained. No. residents completing program: None
MODEL:	The Family Practice Clinic is located on the hospital compound and contains a Director's office, two treatment rooms, six doctors' offices and nine examining rooms. The Family Practice Clinic has accessability to various support sources within short distance.
PATIENTS:	Ambulatory -- Patients are active military personnel and their dependents. The input of families into the Family Practice Clinic is through careful screening procedure directed by the supervising staff and the residents. Hospital -- Inpatients will be admitted by resident from his families and he will be responsible for their total health care.
TRAINING:	The family practice resident will spend one-half day per week in the Family Practice Clinic throughout the entire program. The first year will cover approximately 4 months each of internal medicine (and subspecialties) and surgery (and subspecialties), with 2 months of pediatrics and 2 months of obstetrics and gynecology. Throughout the residency program, the resident will spend 12-18 months in Internal Medicine, 2-6 months in Surgery, 5-8 months in Pediatrics, 2-4 months in Ob-Gyn, 1-3 months in Psychiatry, 8 months Electives.

A maximum amount of flexibility will be provided the resident throughout his training to meet his own needs. Preceptorship elective is available to interested residents.

Research will be encouraged for interested residents and will be patient-oriented and directed toward delivery of primary health care of family units.

The Family Practice resident regularly participates in the teaching conferences of the hospital functioning both as a student and as a teacher.

FUNDING: This program is financed by the Bureau of Medicine and Surgery, U. S. Department of the Navy.

DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency

SITE: Valley Medical Center

445 So. Cedar

Fresno, California 93702

DATE OF OPERATION: Approved as Family Practice Residency, August 30, 1971

DIRECTOR: Ronald D. Smith, M.D., ABFP

FACULTY: 27 family physicians, 304 other specialists representing all fields. Residency programs in all specialty areas.

RESIDENTS: Positions available:

First Year	2	-- $13,416
Second Year	2	-- $14,430
Third Year	2	-- $15,548

Identity retained.
No. residents completing program: None

MODEL: The Family Practice Clinic is adjacent to the hospital and close to the Laboratory and Radiology Departments. It contains a large waiting room, receptionist and secretary's office, restrooms, five exam rooms, nurses station, two combined consultation and residents' offices, two storage rooms. X-ray and Laboratory Departments are adjacent to the Family Practice Model Clinic and within walking distance.

PATIENTS: Ambulatory -- First year resident assigned five families. Second and third year resident has responsibility for approximately 100 families from broad socioeconomic range.

Hospital -- Inpatients are admitted to the hospital by the Family Practice residents in the Departments of Surgery, Medicine, Pediatrics, and Ob-Gyn. There are no separate beds for the Department of Family Practice.

Institutional -- While on Public Health Service, resident will learn what is available for him as far as community medicine is concerned and how he can make use of it in his own practice.

TRAINING: During the first year of the residency program, the resident spends one afternoon a week in the Family Practice Clinic. He spends four months in rotation in Medicine, four months on Surgery which includes one month in the Emergency Room, two months on Pediatrics, and two months on Obstetrics and Gynecology.

During the second year the resident spends three afternoons a week for the entire twelve months in the Family Practice Clinic. He spends two months on Medicine, two months in Public Health, two months in Pediatrics, one month in Psychiatry, one month in the Emergency Room, two months in Surgery and two months in Ob-Gyn. He assists or performs surgery on his own patients from the Family Practice Clinic and will deliver his own pregnant patients.

During the third year the resident spends four afternoons a week in the Family Practice Clinic. He has available to him electives and preceptorships that he may take part in during his specialty service. He rotates one month in Public Health, one month in Emergency Room, two months in Pediatrics, two months in Medicine, two months in Psychiatry, two months in Surgery, and two months in Ob-Gyn.

The resident is involved in conferences at least 2 to 3 hours each day, between 7:30 and 8:30 each morning and almost every lunch hour between 12:30 and 2:00 p.m.

FUNDING: The Family Practice Program is financed by the Valley Medical Center.

AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency/affiliated with University of California Irvine School of Medicine

SITE: Hoag Memorial Hospital Presbyterian

301 Newport Boulevard

Newport Beach, California 92660

DATE OF OPERATION: February 8, 1969

DIRECTOR: J. Blair Pace, M.D., ABFP

FACULTY: Medical staff of Hoag Memorial Hospital (140) includes family physicians, specialists in all disciplines, radiologists, pathologists, dieticians and administrative staff, plus selected faculty from University of California, Irvine, College of Medicine.

RESIDENTS: Positions available:
First Year 6 -- $8,400
Second Year 6 to
Third Year 6 -- $12,000
Identity retained.
Number of residents having completed program: One

MODEL: The family practice clinic is a separate geographical unit located approximately 8 miles from the medical school complex. The clinic contains 14 exam rooms, x-ray, small lab, EKG and therapy rooms plus classroom and conference room.

PATIENTS: Ambulatory -- Approximately fifty families per resident, obtained on referral from private physicians and emergency room visits. The patients are a representative sample of local patient population and 50% are paying patients.

Hospital -- Inpatients admitted to all services by the resident.

Institutional -- Resident sees patients in extended care facilities including Rancho Los Amigos Hospital, Fairview State Hospital, Orange County Medical Center, Child Guidance Clinic.

TRAINING: The family practice resident has regular office hours in the model unit for entire three years with gradual increase to approximately 25% of time during the third year. 60 to 65% of the resident's time is spent in rotation through the clinical disciplines on block assignments. Resident spends an increasing amount of time seeing hospitalized patients. Third year resident spends approximately half his time seeing both family practice patients and patients assigned to other disciplines.

Conference attendance by the resident accounts for about 15% of his time. Conferences cover a wide range of topics in the behavioral sciences, clinical medicine, medical practice, community health and preventive medicine.

Residents participate in preceptorship training in a specialist's office, or in the University Student Health, or the Leisure World Geriatric Polyclinic. The program contributes to the undergraduate medical curriculum.

FUNDING: This program is funded by Hoag Memorial Hospital, the Family Health Foundation and fee for service.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Loma Linda University Medical Center Family Practice Clinic

SITE: Loma Linda University School of Medicine

Loma Linda, California 92354

DATE OF OPERATION: July 1, 1971

CHAIRMAN: Raymond O. West, M.D., ABFP

FACULTY: The clinical activities are directed by the Chairman of the Department of Family Practice assisted by two other full time faculty members who are both clinicians as well as academicians. In addition, there are eight part-time family physicians, a business administrator, chaplain, part-time social worker, plus all of the ancillary people of the medical center.

RESIDENTS: Positions available: First Year 4 -- $9,000 +
Second Year 4 -- $9,400 +
Third Year 4 -- $9,800 +
Identity retained.
Number of residents having completed program: None

MODEL: MFPU is a free standing 2,300 square feet building located on the university campus just west of the university hospital. It has three consultation rooms, eight examining rooms, one conference room, and the usual waiting and business areas.

PATIENTS: Ambulatory -- The model family practice unit serves as the Outpatient Department for the residents in Family Practice. A large volume of patients are seen through the Model Family Practice Unit by both residents and faculty (approximately 90 per day). The resident is responsible for the total care of the families assigned to him.

Hospital -- Separate Family Practice inpatient service for most types of patients. In certain cases where special equipment is needed, e.g., coronary care unit, the patients are admitted to these specialty areas, but they are admitted on the Family Practice service and the resident has responsibility for the patients' care on these services.

Institutional -- Affiliation with Glendale Adventist Hospital and Riverside General Hospital.

TRAINING: The family practice resident spends from 4-6 hours per week during the first year seeing his own patients in the model family practice unit. The remaining portion of his first year is spent in rotation through the clinical disciplines on block assignments. The time in the model unit is increased to 20 plus hours in the third year. Out of a total of 36 months of residency training approximately 10 months will be spent in Internal Medicine, 4 months in Ob-Gyn, 6 months in Surgery plus electives, 4 months in pediatrics, 4 months in psychiatry, 4 months in electives and emergency room training on certain nights of the month throughout the entire three years.

Two family practice conferences are held each week plus other required conferences on the services during rotation. Medical students are involved in the program.

FUNDING: This program received initial funding through the university budget for the Department of Family Practice plus fee for service in the model family practice unit.

AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency

SITE: Kaiser Foundation Hospital

4867 Sunset Boulevard

Los Angeles, California 90027

DATE OF OPERATION: July 1, 1972

DIRECTOR: Irving M. Rasgon, M.D.

FACULTY: Eight physicians, twenty Family Physicians, and forty specialists and subspecialists. Over 150 ancillary personnel, 3 dietitians, 10 administrators, 6 social workers.

RESIDENTS: Positions available:

First Year	6 --	$9,600
Second Year	6 --	$12,000
Third Year	6 --	$13,200

No. residents completing program: None
Identity retained.

MODEL: The family practice unit is the central hospital site where both inpatient training and specialty outpatient training will be carried out. The three family practice clinics (East Los Angeles, Pasadena and West Covina) are the satellite units where outpatient family practice experience will be provided. The East Los Angeles Family Practice Clinic contains 10 offices for personnel, 2 reception areas, 2 exam rooms, 2 nurses stations, a pharmacy, X-ray and EKG and a laboratory where IVP, barium and gall bladder studies are done. There are two minor surgery rooms. The Pasadena Clinic has the same facilities as East Los Angeles except, in addition, it has an ENT room. West Covina Clinic is also the same as East Los Angeles except there are twelve offices for personnel.

PATIENTS: Ambulatory -- 833,000 per year, from all socioeconomic levels who are in a prepaid medical group.

Hospital -- 600 bed hospital. In medicine, family practice patients are in separate section. In other specialty departments, patients are not in separate units.

Institutional -- 2 large extended care facilities available for teaching purposes. A well-organized Health-Home Agency.

TRAINING: The family practice resident's training is simultaneously integrated with his training in the clinical disciplines. The family practice resident will spend about 25% of his time seeing ambulatory patients in the model family practice unit and outpatient department during his first year increasing to 50% during his third year. Rotation through the clinical disciplines on block assignments: Internal Medicine 30%; Surgery 17%; Ob-Gyn 17%; Pediatrics 17%; Psychiatry 8%; Elective 11%. Numerous well-organized conferences are available.

FUNDING: This program is funded by the Kaiser Foundation and prepaid medical group.

SITE: Los Angeles County Harbor Hospital

1000 West Carson

Torrance, California 90509

DATE OF OPERATION: Approved as Family Practice Residency, October 17, 1970

DIRECTOR: J. A. Turner, M.D. (Acting)

FACULTY: 8 practicing physicians in the community (6 board certified Family Physicians, 1 board certified in Pediatrics, 1 board certified in Medicine) all having faculty appointments at UCLA in either Medicine, Pediatrics or Preventive & Social Medicine. These physicians receive no salary from the hospital. In addition, there is a full time staff of 110 physicians in the several specialties, most of whom have some patient care or teaching contact with Family Medicine residents during the 3 year program.

RESIDENTS: Positions available:

First Year	3	-- $8,592
Second Year	3	to
Third Year	3	-- $10,320

Identity retained.
No. residents completing program: 0

MODEL: The Family Care Clinic has been established within the hospital utilizing present model clinic facilities. Designated hours and supporting personnel maintain the identity of the model unit. Future plans call for individualized "group practice" modular construction.

PATIENTS: Ambulatory -- 50 families assigned to each resident in Family Care Clinic. The Emergency and Specialty Clinics have 6,334 visits per month.

Hospital -- 1,241 admissions per month. Specialized units for intensive care, coronary care, neonatal intensive care, hemodialysis chronic respiratory care.

Institutional -- There is cooperation with local public health district and UCLA School of Public Health.

TRAINING: The family practice resident is assigned to the Family Care Clinic during the three year residency and spends a gradually increasing amount of time seeing ambulatory patients in the Family Care Clinic and Outpatient Department. The resident spends approximately half his time during training caring for hospitalized patients during clinical rotation. Internal Medicine 25%, Ob-Gyn 7%, Surgery 12%, Pediatrics 15%, Psychiatry 15%, Electives 7%. Emergency Room training is part of Medicine, Surgery and Pediatrics rotation. A family practice conference is held each week plus other required conferences on the services during rotation.

FUNDING: This program is financed by the local county government.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE:	Family Practice Residency
SITE:	Riverside General Hospital - University Medical Center 9851 Magnolia Avenue Riverside, California 92503
DATE OF OPERATION:	July 1, 1972
DIRECTOR:	Duane A. Lawrence, M.D., ABFP

FACULTY: The Director and twenty members of the Department of Family Practice supervise the residents in the care of the Family Practice patients at all times on a scheduled coverage basis; 36 full-time and part-time hospital-based physicians holding university appointments, along with 200 voluntary attending staff, provide instruction in the other specialties.

RESIDENTS: Positions available:

First Year	4 --	$ 9,048
Second Year	4 --	$10,649
Third Year	4 --	$11,564

Identity retained.
No. residents completing program: 0

MODEL: The Riverside Family Practice Center is a new prefabricated modular building located on the hospital grounds. It presently contains 2,160 square feet and will be expanded to 3,600 square feet when the program reaches full capacity. Each resident team (a first year, a second year and a third year resident) will have one office and two examining rooms. A nurses' office, a conference room, a record room, an office laboratory and administrative offices are also included in the unit.

PATIENTS: Ambulatory -- Patients are accepted without restriction at the consent of the resident or the director. Approximately 65% of the patients are recipients of state and federal medical assistance programs. The remainder have other health insurance or pay their own bills. The major sources of referral are the county medical society, the hospital employee health service, other physicians in the area and the county department of welfare.

Hospital -- Family Practice Center inpatients are admitted by a family practice resident to the appropriate specialty ward. The family practice resident will retain primary responsibility for his patient, will utilize the senior specialty residents, an attending family physician and specialty attendings on a consultative basis, and will provide teaching to the junior specialty resident or medical student assigned to assist with the care of the patient.

Institutional -- Coordination of patient contacts with the county public health department, visiting nurse association, youth service center, local schools and social service agencies; one month assignment to the county public health department residency program.

TRAINING: The first year family practice resident spends one-half day weekly in the Family Practice Center, caring for 25 families. The remainder of his first year is spent in rotation through the clinical disciplines on block assignments. The second year resident spends two one-half days weekly in the Center, caring for 65 families. The remainder of his second year is spent in rotation through the clinical disciplines on block assignments at an advanced level. The third year resident spends three one-half days weekly in the Center caring for 120 families. He also spends two months as a preceptee in a local practice, six months on block assignments to the clinical disciplines at a senior level and four months on elective assignments. Internal Medicine 24%, Surgery 16.5%, Pediatrics 11%, Ob-Gyn 11%, Psychiatry 5.5%, Emergency Room 5.5%, Anesthesia 3%, Public Health 3%, Preceptorship 5.5%, Electives 14%.

Conferences in Family Practice are held weekly. A junior and senior medical student elective program in family practice is coordinated with the residency.

FUNDING: This program is funded by the Riverside General Hospital as well as by fee-for-service income and federal appropriations.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE:	University of California at Davis Family Practice Center
SITE:	Sacramento Medical Center 2315 Stockton Boulevard Sacramento, California 95817
DATE OF OPERATION:	July 1971
DIRECTOR:	Len Hughes Andrus, M.D., ABFP
FACULTY:	Professor of Family Practice and physicians of other specialties, nine allied health personnel.

RESIDENTS: Positions available:

First Year	9	-- $10,400
Second Year	9	-- $10,860
Third Year	9	-- $11,400

Identity Retained.
No. residents completing program: None

MODEL: UCD Family Practice Center is located in the Health Department Building north of and separated from the hospital by approximately 300 feet. The center is so arranged as to simulate attractive practicing physician offices. The waiting room has a large window view of a patio. There are five fully equipped examining rooms, offices for the Director, visiting consultants, rooms for allied health professionals and aides, work areas, and conference room for teaching and health team sessions. Laboratories and x-ray facilities and other diagnostic services are available in the adjacent Medical Center Building.

PATIENTS: Ambulatory -- Resident will select "his" families from his contacts on various services with the permission of the Chief of that service. First year resident will start with four or five families, and by his third year will carry 100 to 150 families.

Hospital -- Resident may admit patients and will share responsibility for care on any of the services.

Institutional -- Resident is encouraged to select elective time in the neighborhood health centers, Migrant Health Clinic Yolo County. Resident will follow patients no matter where they go for medical care.

TRAINING: The family practice resident is encouraged to spend a minimum of 8 months on Medical Services, 6 months on Pediatrics, 5 months on Ob-Gyn, 4 months on Surgical, 1 months in Radiology, 1 month in Pathology. These assignments are not stated as requirements to allow for flexibility. The resident will spend one-half day in the Family Practice Center during his first year, three half days during the second year and six half days the third year. The residents will operate much as a group practice. All personnel in the family practice model, regardless of training or education, will be considered members of the health care team who will participate in teaching and the delivery of health care. As the member of the team in charge of the patient's comprehensive health care, the Family Practice resident supervises allied health personnel. Medical students participate in the training.

There is wide potential of preceptorship arrangements. There is a required locum tenens assignment of 2 month's duration during the third year and the resident will relieve a practicing physician member of the faculty of the Department of Family Practice.

The resident is assigned a full time psychiatrist on the faculty who acts as the resident's tutor or preceptor for consultations, continuing advice, patient management and conference participation. The resident is assigned to the Department of Physical Medicine and Rehabilitation for two months during the second year.

The resident is responsible for most of the preparation of the Family Practice conferences. Monthly Journal Club is conducted by the Family Practice Residents and the faculty of the department also attend.

FUNDING: This program is funded on the fee-for-service basis.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency Program

SITE: San Bernardino County General Hospital
780 East Gilbert Street
San Bernardino, California 92404

DATE OF OPERATION: February 8, 1969

DIRECTOR: Wendell L. Ogden, M.D., ABFP

FACULTY: Most full-time teaching staff have faculty appointments with UCLA, Loma Linda University or USC.
30+ full-time staff, six one-half time staff, and 200+ visiting attending staff.

RESIDENTS:

Positions available:	First Year	12	-- $9,600.00
	Second Year	12	-- $10,600.00
	Third Year	12	-- $11,600.00
(Optional)	Fourth Year	5	-- $12,600.00

Identity retained.
No. residents having completed program: Eleven

MODEL: The Family Practice Center is a newly constructed 3,000 sq. ft. modern office building consisting of 8 examination and treatment rooms, 4 consultation rooms, minor surgery room, utility room and lab, conference room, waiting and reception areas, office for Public Health Nurse and Social Service. It is modern, light, attractively appointed, functional in all respects, and is located adjacent, but separate, to the main hospital.

PATIENTS: Ambulatory -- Patients are accepted from many sources, mostly from Hospital inpatient and clinic population living within 30 miles of the Hospital. Majority able to demonstrate financial responsibility.

Hospital -- The resident sees his own "private" patients by appointment on an ongoing basis, and has admitting privileges in the main Hospital on any service irrespective of his parent service at the time. Treatment responsibilities are compatible with his degree of training. Care of hospitalized patients supervised by each respective department.

Institutional -- Specialty units include ICU, CCU, RCU, Renal Dialysis, Burn Unit, G.I. Laboratory, Pulmonary Function Lab, and Training School for Inhalation Therapists, Methadone Maintenance Unit, an Alcoholism Detoxification Program and extended care facility.

TRAINING: 80 - 90% of inpatient training taught by full-time specialists. Ambulatory training taught by Family Physicians, subspecialists, and appropriate paramedical people. The Family Practice Center is supervised by the Director of Family Practice with ready consultation from the other staff faculty. The Family Physician graduate from this Hospital is to be primarily a skilled clinician with a trained awareness of when and how to refer, plus practical experience in a "Model Office" setting. Traditional clinical disciplines are to be taught by the traditional specialists in as much depth as time allows. The resident will spend one-half day per week in the Family Practice Center during year one, two one-half days in year II, and three one-half days in year III. Presently, space limits us to two one-half days per week for the third year resident. Emphasis is given to continuity of care, preventive medicine and problem solving in the medical and social context. Weekly Family Practice Round Table Conferences include strictly office-oriented subjects ranging from economics, dental problems, estate planning, industrial accidents, outpatient psychiatry, and specific clinical entities presented by local authorities. There are one to three conferences per day in many disciplines. Family Practice resident II and III conduct their own Residents' Conference from 5 - 6 p.m. three days each week with subjects and invited discussants of their choice.

Time spent during three year training program in rotational assignment to classical specialty oriented inpatient services:
Medicine 30%; Pediatrics 17%; Surgery 25%; Ob-Gyn 14%; Psychiatry 6%; Electives 8%.

FUNDING: The San Bernardino County General Hospital is a County-operated Hospital funded by San Bernardino County, as well as fee-for-service, state and federal appropriations.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency

SITE: Santa Cruz General Hospital

1080 Emeline Street

Santa Cruz, California 95060

DATE OF OPERATION: July 1, 1972

DIRECTOR: William E. Whitstone, M.D., ABFP

FACULTY: Supervision and evaluation will be carried on by the teaching staff consisting of a full time Director and three half-time faculty members as well as visiting local practitioners on a rotating basis.

RESIDENTS: Positions available: First Year 3 -- $950/mo.
Second Year 3 -- $1,025/mo.
Third Year 3 -- $1,175/mo.
Identity retained.
No. residents completed program: 0

MODEL: The Family Practice Center, a 5,106 sq. ft. structure, is located 150 yards due north of the parent institution across a parking lot. It resembles a private practitioner's office with comfortable chairs, music, and rest room availability. The personnel includes a receptionist, two clerk typists and two RNs.

PATIENTS: Ambulatory -- Families of all social strata will be fed into the Center from the Social Service Department of the parent institution as well as from private offices in the area, most of whom are not accepting new patients. The County Medical Society will also list the Family Practice Center for new patient referrals. Residents will be assigned families in turn and will be expected to examine each family member comprehensively during the first portion of his training year.

Hospital -- There is no separate Family Practice inpatient service. The resident does have the responsibility of patients on all other services and has admitting privileges at both the parent hospital and at Dominican Hospital.

Institutional -- Utilization of community resources, including Visiting Nurses Association, Crippled Childrens Services, Social Welfare Department, the Rehabilitation Statewide Program and the Home Health Care Agency.

TRAINING: The Family Practice resident spends one-half day of his first year in the model family practice unit. The remaining portion of his first year is spent in rotation through the clinical disciplines on block assignments. The time in the model unit is increased to three half days during the second year and to five half days during the third year. Throughout his training the resident spends 10 months in Internal Medicine, 6 months in Pediatrics, 3 months in Ob-Gyn, 6 months in Surgery, 1 month in Psychiatry, 2 months in Emergency Room, 4 months in Electives.

Each resident is expected to visit each of his families at home at least once a year. Residents are also expected to make nursing home rounds at reasonable intervals to each patients that he has placed in such a facility. The residents work in the Intensive Care Unit which is equipped with highly modern, ver recent structures with the latest Cardiac Monitoring Equipment and Defibrillating Units.

Weekly conferences are held to discuss interesting patients and/or topics. Visiting lecturers from Stanford and other medical schools lecture at least once per month. The resident participates in preparing scientific programs. Weekly specialty conferences are held and difficult cases are presented by the resident for discussion.

Preceptorship training offered in the third year of the program as an elective for a period of two months in a suitable local Family Physician's office.

FUNDING: Initially this program is being financed from the Education Fund of the parent institution. Eventually it is hoped that the program will either partially or completely pay for itself through the collections of the Family Practice Center.

DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency

SITE: Santa Monica Hospital Medical Center

1225 Fifteenth Street

Santa Monica, California 90404

DATE OF OPERATION: February 8, 1969

DIRECTOR: Thomas L. Stern, M.D., ABFP

FACULTY: 12 physicians on Family Practice faculty, specialists in all fields; 50 active Family Practice physicians on hospital staff - total staff 500. Full ancillary personnel and no competing residency programs.

RESIDENTS: Positions available:

First Year	3 --	$800/mo.
Second Year	3 --	$1,000/mo.
Third Year	3 --	$1,250/mo.

Identity retained.
No. residents having completed program: Two

MODEL: The family practice model unit is a 2 story building with elevator, 16 examining rooms, 3 offices for practice groups, small lab, social service business office, and rooms for specialty exam, i.e., procto., ENT, eye, etc., located in outpatient clinic building on hospital grounds. Three man practice group, including first, second, and third year resident, practice together, share calls, treat each other's cases in emergency and become acquainted with each other's patients, thereby broadening patient material.

PATIENTS: Ambulatory -- All patients enter through the model unit and, if required, are referred to specialty clinics located in same structure and resident is required to attend consultation. Model unit averages 900 patient visits per month and most patients are cared for by Family Practice resident and teaching staff with referral encouraged as a teaching device.

Hospital -- Inpatients are admitted by the resident from his families and the program has separately assigned beds.

Institutional -- Inpatients are assigned to resident from clinic patients, private, hospitalized and county patients. Affiliated with Kennedy Child Study Center and St. John's Hospital Psychiatric Clinic.

Santa Monica Hospital Medical Center
Santa Monica, California

TRAINING:	The family practice resident spends part of each day throughout his residency seeing Family Practice Clinic patients. Patient load during first year up to 50 families; 2nd year up to 100 families; and 3rd year up to 200 families. The remainder of the resident's time is devoted to indepth hospital services. Year I - rotation through hospital services plus 10% time in Family Practice Clinic; Year II - Internal Medicine 4 months, Surgery 3 months, Ob-Gyn 2 months, Psychiatry 2 months, Elective 1 month plus 2½ hours each day in Family Practice Clinic; Year III - entirely elective with balance between Family Practice Clinic and in-hospital training. Year II and III preceptorships in various private offices one afternoon per week. The residents are required to attend meetings, ward rounds and seminars throughout training. Residents are expected to complete a study project during their training.
FUNDING:	This program is funded by fee-for-service ranging from $1.25 to $4.00 per visit to the clinic.

DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE:	Family Practice Program
SITE:	University of California Community Hospital of Sonoma County 3325 Chanate Road Santa Rosa, California 95402
DATE OF OPERATION:	July 1, 1970
DIRECTOR:	Raymond C. Anderson, M.D.
FACULTY:	40 Family Physicians, 1 half time Internist, 1 half time Pediatrician, 1 fourth time Surgeon, 1 fourth time Ob-Gyn physician, 90 consultants, all specialties represented, 3 social workers, allied health personnel, and university faculty.

RESIDENTS: Positions available:

First Year	6	-- $800/mo.
Second Year	6	-- $875/mo.
Third Year	6	-- $950/mo.

Identity retained.
No. residents having completed program: 12

MODEL: The present Family Practice Clinic utilizes the existing Outpatient Department with approximately 8,000 square feet, 10 exam rooms. It is adjacent to the emergency room area. The new Family Practice model clinic will be built across the street from the hospital and will be 12,500 square feet. Each resident will have his own family practice office where he will follow patients and families over the duration of his residency. The Family Practice offices simulate as closely as possible a family doctor's office practice.

PATIENTS: Ambulatory -- Currently serving 2,000 families from broad socioeconomic range. The resident will see patients of his assigned families unselected by their age, sex or disease, referring when necessary to the appropriate specialty clinics for further consultation.

Hospital -- Patients are assigned specifically to family practice residents throughout the hospital. Residents also follow most private patients with consultants.

Institutional -- Elective rotations are available in two other community hospitals in Santa Rosa, the local public health department and the adjacent mental health clinic and inpatient service.

TRAINING: The family practice resident works as a member of a module or small group practice, each containing six residents and appropriate allied health personnel. An attending family physician will be available for all consultations. Time spent by the resident in the Family Practice Clinic: one half day first year, two half days second and third year. The remaining portion of the resident's time in training is spent in rotation in the clinical disciplines on block assignments. Internal Medicine 28%, Surgery 22%, Pediatrics 16%, Ob-Gyn 11%, Psychiatry 3%, Elective 8-11%, Anesthesia 3-6%, Emergency Room 6%.

Conferences are held approximately ten hours each week on an ongoing basis in all major fields, including family practice. Preceptorships with practicing physicians, other hospital rotations and other training experience available during elective time.

FUNDING: The program is funded by the County of Sonoma and the University of California. Regional medical programs provide additional funding.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency Program

SITE: General Hospital Ventura County

3291 Loma Vista

Ventura, California 93001

DATE OF OPERATION: July 1, 1970

DIRECTOR: J. Austin Daly, M.D., ABFP

FACULTY: There are approximately 60 Family Physicians and 90 specialists on the staff of General Hospital Ventura County. In the Mental Health Department there are four full time psychiatrists and five full time clinical psychologists, half time specialists in the Departments of Pediatrics, Medicine, Surgery (two) and the Department of Obstetrics and Gynecology.

RESIDENTS: Positions available:
First Year 5
Second Year 7
Third Year 7

Salary range: $7,000 - competitive with other internships in Southern California area

Identity retained.
Number of residents having completed program:

MODEL: The family practice office is a division of the outpatient clinic where separate examining and consultation rooms are available for the resident staff.

PATIENTS: Ambulatory -- Wide socioeconomic range, obtained from Outpatient Department (40,961 visits per year) and Emergency Room (17,046 visits per year). Resident assigned 20-25 families during first year.

Hospital -- Family Practice is the only residency offered; therefore, all patients in the hospital are assigned to family practice residents on a specialty service basis, i.e., residents assigned to various and sundry services on a rotating basis so that all fields of medicine are covered by a family practice resident. Private patients of attending physicians are also seen by the family practice resident.

Institutional -- The Public Health Department is immediately adjacent to the General Hospital.

TRAINING: Family Practice training is similar to the General Practice Training Program that has been in existence in this hospital since 1930. The basic difference is the addition of the internship year (rotating) and the addition of more formal training in psychiatry, public health, community medicine, rehabilitation and other electives. Approximately 10% of the resident's time is devoted to these four disciplines. The basic training plan is similar to Program 1 of the "Essentials for Family Practice Training" as outlined by the Council on Medical Education.

General Hospital Ventura County is the Medical Center for training and post-graduate medical education for the entire County of Ventura. Grand rounds are held in all departments on a weekly basis and are well attended by the attending staff. Several times a year special seminars are held under the auspices of the Ventura Chapter of the California Academy of Family Physicians. Visiting lecturers are obtained from the University of Southern California, University of California at Los Angeles, University of California at Irvine, University of California at San Francisco, Stanford University at Palo Alto, as well as foreign medical schools in Germany, England and Ireland.

FUNDING: Funding is provided by the Board of Supervisors of the County of Ventura. Special funding for special projects by the General Hospital Research Foundation and by the General Hospital Auxiliary.

SITE: University of Colorado Medical Center

4200 East 9th Avenue

Denver, Colorado 80206

DATE OF OPERATION: July 1, 1970

DIRECTOR: Herbert R. Brettell, M.D.

FACULTY: Four Family Physicians in active practice, two internists, one psychiatrist, one social worker, specialty consultants.

RESIDENTS: Positions available:

First Year	3	-- $9,200
Second Year	3	
Third Year	3	-- $9,900

Identity retained.
No. residents completed program: None

MODEL: The model family practice unit is located at General Rose Memorial Hospital, one block from the Medical Center complex. The MFPU has a waiting area, nurse and clerical office, eight exam rooms, conference room, eye and ENT room. This facility is the out-patient department for the hospital. The family practice program uses it exclusively three half days per week.

PATIENTS: Ambulatory -- Presently each second year resident has approximately 25 families from low-middle socioeconomic level.

Hospital -- Inpatients assigned specifically to family practice residents. No separate beds.

TRAINING: 20% of time over residency period is spent in the MFPU. This time is spent throughout block rotations in the form of two or three half-days per week in the MFPU. During block rotations family practice residents function essentially as residents of the service concerned except that their needs as future family physicians are emphasized in their activities on the service concerned. Internal Medicine 25% Surgery (ER Trauma) 8%, Pediatrics 15% Ob-Gyn 10%, Psychiatry 12%, Elective 30%. The hospitals involved in these various rotations are Colorado General Hospital, Denver General Hospital, Denver Veterans

Administration Hospital, and General Rose Memorial Hospital. Three of these four hospitals are located immediately adjacent to each other. Family practice residents work with students, interns and residents of the various specialty departments, and participate in all the regular teaching activities of the division or department concerned. Special attention is directed to the resident's needs as a future family physician, however.

In addition to a one and one-half hour weekly conference with the entire staff of the Family Practice program, the residents attend most all of the formally scheduled teaching activities of the department concerned during their various block rotations. Preceptorship: Elective in rural health care or migrant health program.

FUNDING: This program is funded by the University of Colorado Medical Center house staff training program. General Rose Memorial Hospital supports the model family practice unit.

DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Bridgeport Family Medicine Center

SITE: Bridgeport Hospital

267 Grant Street

Bridgeport, Connecticut 06602

DATE OF OPERATION: Approved as Family Practice Residency, December 12, 1971

DIRECTOR: Alexander Berger, M.D., ABFP

FACULTY: 6 board certified family physicians, physicians from all other disciplines and allied health personnel.

RESIDENTS: Positions available:
First Year 4 -- $9,350
Second Year 4 to
Third Year 4 -- $10,850
Identity retained.
No. residents having completed program: None

MODEL: The Family Practice Office is a separate private office with business area, waiting room, six exam rooms including treatment room, sigmoidoscopy, EKG, minor surgery. Lab for: CBC, urinalysis, blood sugars; storage area, conference room.

PATIENTS: Ambulatory -- Patients are derived from Emergency Room, local physicians and self referrals and represent the full socio-economic range of the area.

Hospital -- Residents admit their patients to all hospital services

Institutional -- Community Public Health, Mental Health Center, Rehabilitation Center.

TRAINING: The family practice resident spends 25% of his first year in the model family practice unit, with a gradual increase in the number of regular office hours, becoming daily in third year. The rotation sequence and duration through the clinical disciplines is individualized to the needs of individual residents. There are specific family practice conferences and seminars. Participation in regular teaching conferences and rounds at Bridgeport and Yale New Haven Hospitals.

FUNDING: This program is funded by hospital support and fee for services.

AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency

SITE: Hospital of St. Raphael

1450 Chapel Street

New Haven, Connecticut

DATE OF OPERATION: July 1, 1970

DIRECTOR: Joseph Mignone, M.D.

FACULTY: Chiefs of all departments, specialists in all disciplines, attending family physicians, social workers, chaplain, administrative assistant.

RESIDENTS: Positions available:

First Year	3	-- $9,500
Second Year	3	to
Third Year	3	--$11,000

Identity retained.
Number of residents having completed program: None

MODEL: The Family Practice Office presently established within the hospital utilizes the clinic facilities of the hospital. A recent grant will enable this program to establish a 3,000 square foot unit on the ground floor of a building located across the street from the hospital. This MFPU will contain 8 examining rooms, 2 conference rooms, offices for a social worker and staff physicians, a business area, a reception area, a playroom for children and a small laboratory. This new MFPU will be in operation by September, 1972.

PATIENTS: Ambulatory -- Each resident will be assigned to 25-35 families in his first year of residency and he will follow them for total medical care during the entire three year program.

Hospital -- When families are in the hospital, they are under the care of the resident. Other inpatients are assigned in rotation.

Institutional -- Included in the program is a community health center. Also included is Laurel Heights Hospital, St. Andrew's Home for the Aged and specialty clinics at Yale.

TRAINING: The family practice resident during the three years of his training will be exposed to the team approach of practicing medicine, and he will know how to best utilize psychiatrists, social workers, psychologists and other allied health personnel. Total estimated time in outpatient and inpatient training over three year period: Family Medicine,34%; Medicine,20%;

Pediatrics 15%; Psychiatry 15%; Surgery, 8%; Ob-Gyn, 8%; Electives in all services. There are weekly psychiatric counseling sessions, bi-weekly family practice seminars and other scheduled conferences.

FUNDING: This program is funded by the Hospital of St. Raphael.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency

SITE: Wilmington Medical Center

P.O. Box 1668

Wilmington, Delaware 19899

DATE OF OPERATION: January 1, 1972

DIRECTOR: Dene T. Walters, M.D.

FACULTY: Approximately 500 with about 80 members active in Department of Family Practice.

RESIDENTS: Positions available:

First Year	3 --	$9,750
Second Year	3 --	$10,250
Third Year	3 --	$10,750

Identity retained.
Number is residents having completed program: None.

MODEL: The Family Practice Office, a former residence (two story) that has been converted, is located 2 blocks from the main teaching division of Wilmington Medical Center. The ground floor of the Family Practice Unit contains a waiting room, a front office, a consultation room, two administrative offices, 4 examining rooms, two lavatories, and a laboratory. The second floor, at present, has a kitchen, a conference room, a small library, and a double size resident's office. Expansion is planned so that the second floor will shortly contain three office-consultation rooms and six additional examination rooms.

PATIENTS: Ambulatory -- 1,000 families of varying socioeconomic groups. Residents are encouraged to limit themselves to 20-25 families the first year and to increase the number of families they handle during the second and third years, accordingly.

Hospital -- All patients may be admitted to all services, only through the Director of the family practice residency program.

Institutional -- Family Practice patients are admitted to nursing homes, etc.

TRAINING: The family practice resident spends 10% of his first year in the model family practice unit. The remaining portion of his first year is spent in rotation through the clinical disciplines on block assignments. The time in the model unit is increased to 50% in the third year. Internal Medicine 40%; Pediatrics 30%; Psychiatry 10%; Ob-Gyn, Surgery, and Electives 20%. Resident attends conferences in specialty department during rotation plus 3-4 hours ongoing conferences per week throughout training.

FUNDING: This program is financed through hospital subsidy and fee-for-service.

AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency

SITE: Howard University Freedmen's Hospital

Sixth & Bryant Streets, N.W.

Washington, D. C. 20001

DATE OF OPERATION: January 1, 1971

DIRECTOR: William E. Matory, M.D.

FACULTY: Family Physicians, internists, gynecologists, pediatricians, surgeons, psychiatrist, social worker, public health nurse, and nutritionist.

RESIDENTS: Positions available:

First Year	6 --	$10,500
Second Year	6 --	to
Third Year	6 --	$11,500

Identity retained.
Number of residents having completed program: None

MODEL: This program is based in the Emergency and Outpatient Departments of Freedmen's Hospital. Emergency booths and rooms (average 10' x 12') compose this recently renovated partly new structure. Modern resuscitation equipment, including a defibrillator, a heart lung resuscitator, multiple EKG machines, an artificial kidney for detoxification, postive pressure machines, all supportive equipment, instruments and supplies, including recently developed disposables are available.

PATIENTS: Ambulatory -- Fifty families per resident, referred from emergency, outpatient departments and community.

Hospital -- Patients hospitalized during residents' rotation on specialty services. Family Practice in-hospital service is being developed.

Institutional -- Rotation through the OEO funded community Neighborhood Health Center, Washington, D. C., Regional Medical Stroke Services, Howard University.

TRAINING: The family practice resident spends 20% of his first year in the general clinic (model unit) increasing to 60-65% during his third year. The resident follows the same families assigned to him throughout the three year period of residency. This general clinic will serve the needs of ghetto families who, by history and tradition, have looked to this hospital for primary care.

Family practice resident rotate through the appropriate departments (ward and clinic services) in block assignments. They participate equally with the parent departmental resident during each rotation.

This program is designed to prepare family physicians to have indepth training in a variety of medical problems of the family. It equips him to manage most problems seen in this area and enables him to make the needed referrals early and safely. The aim is to prepare graduates for practice in rural areas, ghetto and large urban communities of the United States. The program also serves as a training base for the increasing number of physicians seeking foreign responsibility in Africa and developing countries throughout the world.

Medical students are involved in the program.

FUNDING: This program is funded by Howard University and by a grant from the Department of Health, Education, and Welfare.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency

SITE: Malcolm Grow USAF MEDICAL CENTER

Andrews Air Force Base

Washington, D. C. 20331

DATE OF OPERATION: July 15, 1971

DIRECTOR: David L. Hoff, M.D., Capt. USAF, MC

FACULTY: 8 Family Physicians, 77 other specialists. Part-time: 3 dieticians, 3 chaplains, 4 social workers, 3 administrative personnel.

RESIDENTS: Positions available: First Year 6 -- $12,000
Second Year 6 to
Third Year 6 -- $13,000
Identity retained.
No. residents completed program: 0

MODEL: Malcolm Grow USAF Medical Center Family Practice Unit is a separate autonomous area within the outpatient wing of the hospital. It functions as a model office with its own personnel, appointment system, charting and mock billing procedures and business area. There are presently eight office-exam rooms, including a minor surgery area, a large business area, a laboratory area, and a large reception and waiting area. Audio- and visual screening and laboratory equipment are part of the unit.

PATIENTS: Ambulatory -- At present approximately 300 families are in the unit who are derived from General Therapy Clinic consisting of interested families assured of a 3 year stay in the area. Residents also enter families who they have cared for during ward service.

Hospital -- Patients are admitted to all major services with the residents and Family Practice staff having full privileges on Medicine, Pediatrics, Ob-Gyn, Psychiatry and minor privileges on Surgery.

Institutional -- Affiliation with the Prince George's County Health Department to provide training in community care, discussion series on health facilities and staffing general medical clinics in outlying rural areas.

Malcolm Grow USAF Medical Center
Andrews Air Force Base
Washington,D.C.

TRAINING: The Family Practice resident spends 10% of his first year plus seminar time in the model family practice unit, 20% plus seminar time in the second year, and 80-90% in the third year at which time the resident not only cares for his families but is responsible for daily functioning of the unit. The remaining 10-20% of time during the third year is spent with private family physicians in the area and in the outpatient clinics of selected subspecialties as well as care of residents' inpatients.

Time spent in rotation through conventional clinical disciplines: Internal Medicine 25% (36 wks.); Surgery 7% (12 wks.); Pediatrics 12% (20 wks.); Ob-Gyn 10% (16 wks.); Psychiatry 5% (4 wks.); Elective 10% (16 wks.); conferences 10% including time on specialty services.

Family Practice conferences include daily Chart Review, 2/week Community Medicine, weekly outpatient medical problem, biweekly unit business meeting, bimonthly group therapy, monthly Journal Club.

Preceptorship: During the third year each resident will spend 1-2 months in offices of private practicing physicians in the surrounding area, to learn aspects of different types of private practice as well as the economic aspects of practice.

FUNDING: This program is funded by the U.S. Department of the Air Force.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency

SITE: Halifax District Hospital

P. O. Box 1990

Daytona Beach, Florida 32015

DATE OF OPERATION: September 1970

DIRECTOR: William H. Hubbard, M.D., ABFP

FACULTY: 80 active attending medical staff with all specialties represented are on the medical faculty and 16 of these are active Family Physicians.

RESIDENTS: Positions available:

First Year	4	-- $8,000
Second Year	4	-- $9,000
Third Year	4	-- $10,000

Identity retained.
No. residents completed program: None

MODEL: The Family Practice Center, a building 150 feet by 30 feet, is located a half block away from the main building of the Halifax District Hospital. There are 8 exam rooms 10 x 12 feet in dimension, waiting rooms, dental x-ray room and dental clinic, patients' classroom, M.D. office, social service room. There is a laboratory for commonly used laboratory tests.

PATIENTS: Ambulatory -- Families referred from community physicians. Director determines final approval of families. 25 families 1st year, 50 families 2nd year, 100 families 3rd year.

Hospital -- Residents admit patients to all services.

Institutional -- Volusia County Health Department, Community Mental Health Center, Crippled Children Center.

TRAINING: During the first year, the family practice resident devotes approximately 25% of his time to the model of family practice and 75% of the time to inpatient hospital care. In the second year, this period is divided evenly, or 50% and 50%. 75% of the third year is spent in the Family Practice Center, with the other 25% of time in the hospital.

Time spent in rotation through traditional clinical disciplines: Internal Medicine - 10 months; Surgery - 4 months; Pediatrics - 5 months; Ob-Gyn - 4 months; Psychiatry - 3 months; Elective or Research - 5 months.

In the weekly conferences (Medical, X-ray, Family Practice and Psychiatry), the resident is given the responsibility frequently of presenting and discussing the problems of a particular case. Residents teach allied health personnel as well as participate in discussion before lay audiences on medical subjects.

FUNDING: This program is funded by Halifax District Hospital.

AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency

SITE: St. Vincent's Hospital

Barrs and St. John's Avenue

Jacksonville, Florida

DATE OF OPERATION: July 1, 1972

DIRECTOR: L. E. (Bruno) Masters, M.D., ABFP

FACULTY: 2 full time physicians, 5 full time radiologists, 3 full time pathologists, 1 full time psychiatrist (in the near future) and the entire attending staff of the hospital.

RESIDENTS: Positions available:

First Year	5	-- $8,100
Second Year	5	-- $8,600
Third Year	5	-- $8,900

Identity retained.
No. of residents having completed program: None

MODEL: The present model practice unit will occupy one half of the all new clinic area, but will operate as a separate entity. At a later time, a more distinct unit will be established.

PATIENTS: Ambulatory -- The families will be acquired from the emergency room, the existing clinic, referral from private physicians and community agencies. 25 families in the first year; 50 families in the second year; 75 families in the third year.

Hospital -- Patients will be from the Family Practice Unit and a limited number of service patients.

Institutional -- Modern extended care facility within a half block of St. Vincent's, store-front ghetto-clinic in heart of town, modern rehabilitation center (Cathedral Health Center), University Hospital, St. Vincent's Hospital Mental Health Center.

TRAINING: The family practice resident remains in the Department of Family Practice at all times. He is not given over to an internship, although there is a rotation of a sort through the traditional services. At all times, he maintains his identity with the

Family Practice Program. He will spend one hour daily the first year, two hours the second, and a half of each day the third year in the Model Family Practice Unit. He will be exposed to the MFPU, family physicians and a specialist on rotation at all times. Training will be: Internal Medicine 33%; Pediatrics-Psychiatry 33%; Ob-Gyn Surgery, Anesthesiology, Pathology, Radiology, Electives 33%.

The third year will offer opportunities to the capable resident to do locum tenens, an exchange program with practicing physicians, assuming the responsibility for their office while the practicing family physician undertakes a refresher course at this institution.

FUNDING: This program is funded by fee for service and St. Vincent's Hospital Medical Education budget.

DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency

SITE: U.S. Naval Hospital

Box 171

Jacksonville, Florida 32214

DATE OF OPERATION: July 1, 1971

DIRECTOR: John V. Dervin, M.D.

FACULTY: One full time family physician and six part-time family physicians; eighty-four specialists; thirty ancillary workers.

RESIDENTS: Positions available: First Year 6
Second Year 6
Third Year 6
Salary range: Varies according to Navy Department standards
Identity retained.
No. residents completing program: None

MODEL: MFPU is located on outpatient floor (ground floor) of the Naval Hospital. All support facilities are on the same level. The unit utilizes 12 rooms - each with talk and exam areas. The unit delivers primary care to approximately 525 families and is open for appointments on Wednesday and Friday afternoons and Saturday mornings. Patinets with urgent problems are seen by their doctors at other times.

PATIENTS: Ambulatory -- Resident is responsible during first year for 25 families, second year 50 families and third year 75 families. All patients are Navy active duty and retired families.

Hospital -- 480 bed hospital - All hospital beds are used by Family Practice Service. Two family practice residents are available at all times in the hospital for emergency family practice patients.

Institutional -- Duval and Clay County public health departments.

TRAINING: The family practice resident spends 30% of his time in the Family Practice Service during the first year, 40% during the second year, and 50% during the third year. The remaining portion of the resident's training is spent in rotation through the clinical disciplines on block assignments, as follows: Internal Medicine 25%, Surgery 11%, Pediatrics 16%, Ob-Gyn 16%, Psychiatry 10%, Elective 33%, conferences and extra-mural assignments 10%.

Third year residents spend 1 month with Family Physicians in the Jacksonville area. During this month they are assigned directly to the preceptor and have no hospital responsibility except Family Practice clinics.

FUNDING: This program is funded by the U.S. Department of the Navy.

DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Department of Family Medicine, University of Miami School of Medicine, P. O. Box 875 - Biscayne Annex, Miami, Florida 33152

SITE: Jackson Memorial Hospital and Veterans Hospital, Miami, Florida

DATE OF OPERATION: February 8, 1969

DIRECTOR: Robert Roy, M.D.

FACULTY: Coordinator: Leon Kruger, M.D., M.P.H.; Family Physicians, specialists and social workers.

RESIDENTS: Positions available:

First Year	8	-- $8,400
Second Year	8	-- $8,700
Third Year	8	-- $9,000
Fourth Year	2	-- Salary Open

Identity retained.
No. residents having completed program: 13

MODEL: The University of Miami Family Health Center is a family medicine clinic demonstration of a model family practice. This unit is in the emergency department of Jackson Memorial Hospital and has full facilities.

PATIENTS: Ambulatory -- 250 families currently cared for with expectation in the near future for 1,000 families. All patients entering the emergency ward are first seen in this unit.

Hospital -- Inpatient care by residents at Jackson Memorial Hospital and Veterans Hospitals.

Institutional -- There are opportunities to work in community projects such as the Dade County jail and stockade programs. Family Health Center is a federal comprehensive neighborhood clinic which will eventually include 6,000 families.

TRAINING: The first year family practice resident serves three months in medicine, two months in pediatrics, two months on a combination of obstetrics and nursery. During this time, residents have responsibility in Family Medicine Clinic, Family and Health Center. Second and third year residents continue inpatient responsibilities and ambulatory care. Five hours per week are spent in conferences and seminars. Third year resident has teaching responsibilities and a research project. First, second and third year residents function as a group practice. Supervision is on a one-to-one basis with either one of the full time or voluntary faculty. These resident physicians then work with a nurse and social worker in a team approach to both illness and health maintenance for the private families enrolled in the program.

First, second and third year residents participate in preceptorships in Family Physicians' offices, in General Surgeons' offices or in offices of almost any specialty. Medical students are involved in the program.

FUNDING: This program is supported by grants and the Family Medicine Clinic is partially supported by fees for non-physician services.

DIRECTOR: Howard G. Vigrass, M.D., ABFP

FACULTY: Full time: Director of Family Practice, Chief of Medicine Service, Chief of Surgical Service, Chief of Pediatric Service, Chief of Ob-Gyn Service.

RESIDENTS: Positions available:

First Year	6	-- $800/mo.
Second Year	6	-- $850/mo.
Third Year	6	-- $900/mo.

Identity retained.
No. of residents having completed program: None

MODEL: The medical Center Unit is located approximately 100 yards from the hospital. There are four groups of three offices for each resident with a consulting room in the center and examining rooms on either side of the consulting room. There is a small laboratory within the unit with a procedure-emergency room in the unit as well. X-rays will be done at the hospital.

PATIENTS: Ambulatory -- Patients from broad socioeconomic range. 10 to 20 families first year; 20 to 50 families second year; 100 families third year.

Hospital -- The family practice resident may admit his patients to all services.

Institutional -- Utilization of community resources.

TRAINING: The largest amount of Family Practice will be taught through the Family Practice Unit with the resident following his own patients in the hospital no matter which service the patient is on or which service the resident is presently covering. Time in Family Practice Unit during first year - one half day per week; second year - one half day three times per week; third year - one half day five times per week. Time spent in rotation through clinical disciplines of medicine: Internal Medicine 10 months, Surgery 6 months, Pediatrics 6 months, Ob-Gyn 6 months, Psychiatry 1 month plus two hour weekly seminar throughout the three years, Electives 10 months. One hour long conference per week restricted only to Family Practice residents and other required conferences on the services during rotation.

This program is affiliated with Emory School of Medicine; also with the University of Georgia Medical School and with Arkansas Medical School. Medical students participate in the program.

FUNDING: This program is financed through the hospital auxiliary and The Medical Center which is a city-county hospital. A certain amount of funds come from third party payments and from patients who have the ability to pay their own fees.

AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Training Program/affiliated with the University of Illinois, College of Medicine

SITE: MacNeal Memorial Hospital

3249 Oak Park Avenue

Berwyn, Illinois 60402

DATE OF OPERATION: Approved as Family Practice Residency, December 3, 1969

DIRECTOR: Kenneth F. Kessel, M.D., ABFP

FACULTY: Three full time teachers, eighteen volunteer instructors, with teachers in all specialty disciplines and allied health personnel.

RESIDENTS: Positions available:

First Year	4	-- $10,020
Second Year	4	to
Third Year	4	-- $11,220
Fourth Year	4	(optional)

Identity retained.
No. residents having completed program: None

MODEL: An independent unit within a community hospital complex which functions as an ideal futuristic private office (not "clinic"). This unit is not a part of outpatient department which is used for other residency training programs. Residents develop their own practice within the group practice setting of the Family Practice Center. The office has its own lab, ECG, physiotherapy facilities.

PATIENTS: Ambulatory -- Senior medical clerks or residents see patients primarily, with continuity maintained by faculty in family practice. Approximately 50 to 80 patients are seen daily in the model unit.

Hospital -- Family Practice residents admit patients directly to the hospital under the Director's name and have full admitting privileges to each clinical department. Patients admitted to hospital are completely managed by their office primary physician under faculty supervision.

Institutional -- Geriatric Training Center, Family Institute in Chicago, three affiliated nursing homes.

TRAINING: The family practice resident spends 50% of his first year in the model office, 60% the second and third year, with fourth year elective. The remaining portion of his first year is spent in rotation through the clinical disciplines on block assignments. 30% of the second and third year is available for electives. Research paper is required for completion of residency.

Conferences and extra-mural assignments include weekly literature review, cardiology, radiology conferences, small group problem solving conferences, medical economics seminars and required Family Practice conferences.

FUNDING: The program is financed by fee-for-services with a hospital budget supplement.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency

SITE: West Suburban Hospital

10 West Ontario Street

Oak Park, Illinois 60302

DATE OF OPERATION: Approved as Family Practice Residency, December 3, 1969

DIRECTOR: A. L. Burdick, M.D.

FACULTY: Full time DME, nephrologist, cardiologist, four pathologists, 5 radiologists; thirty attending Family Physicians plus specialists in all fields representing affiliations with University of Illinois, Northwestern and Stritch Schools of Medicine. Ancillary - Social Service Department, office management consultants, physio-therapy department, stroke unit, chaplains, etc.

RESIDENTS: Positions available:

First Year	5	-- $9,000
Second Year	5	to
Third Year	5	-- $10,500

Identity retained.
No. residents completing program: None

MODEL: The Family Practice Center is a new model office complex with reception office, nurses workroom, lab, minor surgery room, conference room and five combination consultation and examining rooms. There is a full staff, bookkeeper, nurses, lab technician and medical assistants.

PATIENTS: Ambulatory -- Regular office hours in the Family Practice Center with progressive responsibility and independence in treating families assigned residents in an increasing capacity during the three year program; full socioeconomic range.

Hospital -- Resident cares for Family Practice inpatients and is assigned attending physician's patients on all services.

Institutional -- Rush Medical College Psychiatric inpatient service.

TRAINING: Family Practice residents receive training much like a group practice with the residents spending allotted times seeing their assigned families by appointment, covering for each other in teams, if possible. Records are maintained on Problem-oriented basis with office management participation. Progressive independence with consultation arranged with resident participation. Decreasing amount of time in the basic inpatient hospital disciplines after the first year. Internal Medicine 34%; Surgery 10%; Pediatrics 16%; Ob-Gyn 12%; Psychiatry 12%; Electives 16%.

Family Practice is integrated into a comprehensive program by lectures, conferences, inpatient care, specific preceptor type training with specialists, as well as family physicians. Basic educational objectives are to develop all the expertise necessary to practice the basic skill and utilize the general knowledge for treating 85-90% of the medical needs of a family unit and have a surrounding group of consultants and allied health workers to provide the best comprehensive care available for 100% of health care.

FUNDING: This program is financed through West Suburban Hospital educational funds and fees-for-services.

AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency Program of the Peoria School of Medicine at Methodist Hospital

SITE: The Methodist Hospital of Central Illinois

221 N.E. Glen Oak Avenue

Peoria, Illinois 61603

DATE OF OPERATION: October 5, 1971

DIRECTORS: Fred Z. White, Jr., M.D., ABFP, and Dean R. Bordeaux, M.D., ABFP

FACULTY: Two board certified Family Physicians, three board certified internists and one board certified psychiatrist. Part-time support includes, a board certified pediatrician, an educational psychologist, a medical social worker and a consulting staff of medical-surgical and obstetrical specialists.

RESIDENTS: Positions available:

First Year	4	-- $10,000
Second Year	4	to
Third Year	4	-- $12,000
Fourth Year	2	-- elective

Identity retained.
No. residents completing program: None

MODEL: The Model Family Practice Unit occupies one wing of the fifth floor of the hospital. It is located one flight above street level and has its own entrance from the street. It is located directly next to its own inpatient nursing unit. The unit includes a waiting room, business office, record room, minor surgery and proctoscopy room, four examining rooms, a special procedures room, a conference room, a laboratory and residents' offices.

PATIENTS: Ambulatory -- Patients from all socioeconomic groups in Peoria and neighboring communities are served here under a variety of arrangements including pre-payment, fee for service and public aid. A number of family units will be assigned to each resident. This number will be increased each year as his practice grows.

Hospital -- Resident will follow his own patients through hospital experiences. Family consultations and conferences in regard to illnesses and problems within the family will be a part of this experience.

TRAINING: The family practice resident will spend 3 half-days each week in Ambulatory Care in affiliated units during the first year. Time devoted to training in traditional clinical disciplines during the first year: Internal Medicine 4 months; Pediatrics 2 months; Surgery 2 months; Obstetrics 1 month; Psychiatry 1 month; Community Medicine 1 month; Subspecialty 1 month. The resident will spend 4 half-days in affiliated Family Practice Units during the second year. There is specialty and subspecialty rotation as needed and desired by the resident. The resident may choose from 23 electives. During the third year the resident will spend 7 half-days in Ambulatory Care in Family Practice Units and the remainder of time will be spent in electives and subspecialties.

The fourth year of the residency will be an elective year. The fourth year resident will begin a private practice in Family Practice in the Peoria area putting into practice those principles he has developed over the previous three years. Hospital subsidy will be available to him and he will be expected to give a portion of his time as a member of the faculty of Family Practice. The fourth year resident may earn a Masters Degree in Medical Education or Community Health in a Masters Program in cooperation with Bradley University. Electives as desired in Hospital Specialty areas, Ambulatory Care, or Research in Health Delivery.

There are numerous required/optional conferences. Weekly required conferences include: Service Review - FPU; Clinical Conference; Journal Club; Tele. Conf. - University of Illinois (3 x month); Radiology; Problem Hour (2 x week).

Affiliates of this residency program include Proctor Hospital, Carver Family Health Center, Migrant Family Health Center, private practice offices.

FUNDING: This program is funded through hospital subsidy and fees for services.

FRED Z. WHITE, JR., M.D.

Dr. White is a graduate of Northwestern Illinois University where he earned both his Bachelor and Medical degrees. His internship was spent at the Cook County Hospital in Chicago. Dr. White maintains a private practice in Chillicothe, Illinois, a semi-rural community situated along the Illinois River just 22 miles north of Peoria. He is Vice President of the Peoria Board for Medical Education and is President of the Active Medical Staff of Methodist Hospital. He is a diplomate of the American Board of Family Practice.

Presently, Co-Director, Department of Family Practice and Preventive Medicine, The Methodist Hospital of Central Illinois, 221 N.E. Glen Oak Avenue, Peoria, Illinois 61603.

DEAN R. BORDEAUX, M.D.

Dr. Bordeaux was among the first group of physicians in the country to become certified by the American Board of Family Practice. He has been Chairman of the Department of Family Practice at Methodist Hospital. Dr. Bordeaux is a graduate of Bradley University, receiving his Bachelor's degree there and his Medical degree from the College of Medicine of the University of Illinois. Dr. Bordeaux maintains his private practice in a residential neighborhood of West Peoria. He is President-Elect of the Peoria Medical Society. He also serves as Coordinator of educational programs for the Discipline of Family Practice for the Peoria School of Medicine.

Presently, Co-Director, Department of Family Practice and Preventive Medicine, The Methodist Hospital of Central Illinois, 221 N.E. Glen Oak Avenue, Peoria, Illinois 61603.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: St. Francis Hospital Family Practice Residency

SITE: Family Practice Center

530 N. Glen Oak Avenue

Peoria, Illinois 61603

DATE OF OPERATION: Approved as Family Practice Residency, December 1, 1972

DIRECTOR: Carl F. Neuhoff, M.D.

FACULTY: Full time staff including the Director of Medical Education, Medicine, Pediatrics, Family Practice, full time pathologists, radiologists and two men in Physical Medicine.

RESIDENTS: Positions available:

First Year	3	-- $10,250
Second Year	3	-- $10,750
Third Year	3	-- $11,250

Identity retained.
No. residents completing program: None

MODEL: The Family Practice Center is the extreme north building of the hospital complex (6,000 square feet) with an adjacent parking lot and an entry way from the parking area. Facilities include examining rooms, physicians' offices, small laboratory, waiting room, business office, chart room, and conference room.

PATIENTS: Ambulatory -- Cross section of socioeconomic groups derived from the private practice of the Chief, emergency room and outpatient department. Resident is assigned increasing number of families from first day to end of residency—from 5 to 125.

Hospital -- The Family Practice Department is a separate department and residents may admit patients to it and to all departments.

Institutional -- Allied facilities include City and County Public Health offices, Galena Park Home, Zeller Zone Center, Peoria State Hospital for psychiatric outpatient teaching, and the Allied Agencies Center, a unique unit housing seven social agencies dealing with mentally retarded children.

TRAINING: The family practice resident is assigned to the model office a half day a week during the first year; three half days a week during the second year; five half days a week the third year. The Family Practice Center is designed to function as a partnership between three or more men in the group practice of medicine. The residents in training are considered as full partners in their second and third year, and as a junior partner in their first year. Separate records and accounts are maintained modeled after the office accounts which had been kept by the Chairman of the Family Practice service, when he was in private practice. There is rotation in all services first and second year and the majority of time during third year is in electives.

Family Practice seminars are held weekly. The Family Practice Department currently assists the Peoria School of Medicine in teaching outpatient medicine.

FUNDING: The program is funded by fee-for-service and by St. Francis Hospital.

AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Residency in Family Practice

SITE:
Rockford Medical Education Foundation
Rockford School of Medicine
University of Illinois and Associated Hospitals
1601 Parkview Avenue
Rockford, Illinois 61101

DATE OF OPERATION: Approved as Family Practice Residency, December 1, 1971

DIRECTOR: L. P. Johnson, M.D.

FACULTY: Full time medical directors in three of four institutions. Volunteer teaching faculty on staff of participating hospitals include family physicians and representatives of all other specialties plus selected consultants from School of Medicine faculty.

RESIDENTS: Positions available:

First Year	9 --	$10,000
Second Year	9 --	$11,000
Third Year	9 --	$12,000
Fourth Year	open	open

Identity retained.
No. residents completing program: None

MODEL: The Model Family Practice Unit is located in the Medical School building which is centrally located geographically and temporarily from the participating hospitals. Unit is contained in 5,000 square feet and includes 12 examining rooms, lab and x-ray, conference room, study carrel room, medical records, consultation rooms and adjacent to medical school library.

PATIENTS: Ambulatory -- The initial patient population of the MFPU will be constituted by the program director moving his practice into the unit. Additional patient enrollment will be selected on a referral basis from such sources as community physicians, hospitals, emergency room facilities, Winnebago County Medical Society, and other health service organizations in the community. The selection will be done in such a fashion as to provide a model socioeconomic cross section of the community in the family practice panel of patients. The number of family patient units per resident will depend upon his capabilities and the judgment of the program director, both designed to provide clinical material with emphasis on educational aspects rather than service.

Hospital -- All inpatients are available for teaching and assigned by teaching staff. Residents will have admission privileges for patients from his families to all participating hospitals.

Institutional -- Coordinated contacts with all community health care organizations.

TRAINING: The family practice resident will begin with intensive hospital experience, tempered by ambulatory experiences in the MFPU and in psychiatry. The resident will progress through a second year of gradually increasing ambulatory care unit participation with intensive experience in specific inpatient subspecialty areas. During the third year, the resident will phase almost completely into the ambulatory care setting while continuing responsibility for the hospitalization of those patients originating in his practice panel in the MFPU.

During the resident's last two years, he will be encouraged to assume position as junior board member of many social service organizations in the community.

Each month, the Director of the program and his associates will conduct a formal business meeting of the MFPU, designed to give the residents voice and experience in the function of the MFPU. Once weekly, there will be a general meeting of a seminar nature which will bring to the residents the opportunity to interact with social, political, governmental and scientific consultants to help them obtain an accurate and complete picture of the function of the social services, professional and political systems and health care delivery system of their community, area and state.

The resident will attend all sessions of the continuing education programs made available in the Rockford area.

FUNDING: The funding of the Family Practice Residency will be constituted by the combined support from the participating hospitals and from income accrued from the Office for Family Practice of the Rockford School of Medicine. Further funding from federal appropriations.

DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Department of Family Practice

SITE: St. John's Hospital

701 E. Mason Street

Springfield, Illinois 62701

DATE OF OPERATION: July 1, 1972

DIRECTOR: William L. Stewart, M.D., ABFP

FACULTY: Full time: 4 pathologists, 4 radiologists, 2 cardiologists, in addition to the academic department chairmen. Part-time: 9 board certified specialists in each of the clinic specialties including 6 board certified family physicians.

RESIDENTS: Positions available:

First Year	4	-- $10,000
Second Year	4	to
Third Year	4	-- $12,000

Identity retained.
No. residents completing program: None

MODEL: The Family Practice Center is a 2,400 square feet converted former showroom expandable to 4,800 square feet located across the street from the hospital. It contains 3 offices, 5 exam rooms, conference room, reception area and office record room, small lab and treatment room. By 1975 St. John's Hospital will erect on its property connected to the present hospital a 5-story Medical Education Center. The 1st floor of this building (11,500 square feet) will be the new Family Practice Center.

PATIENTS: Ambulatory -- Resident primary physician for 25 families during first year growing to approximately 100 families during third year from all socioeconomic groups.

Hospital -- Family Practice is a separate clinical department with its own admitting privileges.

Institutional -- Social Service Department, local nursing homes, State Health Department.

TRAINING: The family practice resident spends approximately 10% of his first year in the Model Unit gradually increasing to 50% in his third year. Time spent in rotation through the conventional clinical disciplines of medicine: Internal Medicine 16%, Surgery 6%, Pediatrics 14%, Ob-Gyn 6%, Psychiatry 6%, Electives 14%. Conferences and extra-mural assignments approximately 12%.

Third year resident spends 2 months in a community office practice in Springfield or more remote location. Nursing students receive training in this program.

FUNDING: This program is funded by the Illinois state government and hospital subsidy.

DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency

SITE: St. Mary's Hospital

800 St. Mary's Drive

Evansville, Indiana 47715

DATE OF OPERATION: Approval began with the 1971-72 academic year

DIRECTOR: Raymond W. Nicholson, M.D., ABFP

FACULTY: One hundred physicians, all board certified for all medical disciplines. Full time director of medical education for program coordination. Separate Department of Family Medicine with elected chief and five board certified family physicians.

RESIDENTS:

Positions available:		
	First Year	2 -- $9,600
	Second Year	2 -- $10,800
	Third Year	2 -- $12,000

Beginning 1973-74 optional degree of M.S. in Medical Sciences will be offered.
Identity retained.
No. residents completing program: None

MODEL: The Family Practice Unit is located in a modern building adjacent to the hospital. Physically it is arranged as any private office; reception room, secretary area, nurses station and laboratory, five examining rooms and two consultation offices.

PATIENTS: Ambulatory -- Referral is made to the Unit from physicians, County Medical Society, social agencies of the area, City-County Health Department and patients themselves. The resident is the primary physician for all eligible families.

Hospital -- The resident admits his own patients when necessary along with preceptor approval. He obtains consults as any private staff member, yet does not lose his identity or responsibility as the primary physician.

Institutional -- Extended care facility adjacent to the hospital is utilized for his geriatric patients. Associations are maintained with the City-County Health Department, Adult Mental Health Clinic, Children's Psychiatric Center, Rehabilitation Center and social agencies of the community.

TRAINING: The first year is a rotating internship-type training plus one-half day in the Family Practice Unit. The second year is devoted to subspecialty training and two half days in the Family Practice Unit. The third year includes four half days in the Family Practice Unit plus electives and the completion of a clinical research project. During the second and third years the resident participates in intern training on any given assigned service as well as senior medical students. The resident participates in the scheduled conferences of the specialty to which he is assigned. Major house staff conferences for house officers are held once daily.

FUNDING: Income is obtained from patients on a sliding scale based on ability to pay, fellowships and grants obtained for the program, State Plan for Medical Education and the parent hospital.

COMMISSION ON EDUCATION

DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency Program

SITE: Methodist Hospital Graduate Medical Center

1604 North Capital Avenue

Indianapolis, Indiana 46202

DATE OF OPERATION: Approved as Family Practice Residency, December 3, 1969

DIRECTOR: Ronald Blankenbaker, M.D.

FACULTY: Sixteen Family Physicians. five specialists in the clinical disciplines, social workers, dietary and chaplaincy services.

RESIDENTS: Positions available:

First Year	4	-- $9,975
Second Year	4	to
Third Year	4	-- $11,235

Identity retained.
No. residents completing program: Five

MODEL: The Family Practice Center has 25 exam and treatment rooms, including 3 conference rooms and special rooms for ENT, minor surgery, endoscopy and orthopedics. Social Services, dietary education, home care offices and pharmacy are also here. Adjacent in the same unit is acute ambulatory facility with X-ray and physiologic monitoring facilities.

PATIENTS: Ambulatory -- Resident will care for a minimum of 50 families and a maximum of 200, usually lower middle to middle class.

Hospital -- Residents are responsible for their own patients on all services.

Institutional -- Children's Pavilion, Buchanan Pastoral Center, Indianapolis Home for the Aged, Marion County Health Facilities, and selected community services and resources.

TRAINING: The family practice resident spends approximately 30% of his residency training in the Family Practice Center. The Weed system of problem oriented records is used. The rest of his time is spent as follows: Internal Medicine (including Psychiatry) 25%; Surgery - Subspecialties 10%; Pediatrics 20%; Ob-Gyn 15%.

There are specialty conferences when on service, weekly Family Practice Journal Club, Family Practice Visiting Professor Rounds, 2 days, four times yearly. This program is very flexible according to the needs and wishes of the resident.

FUNDING: This program is funded by fee for service usually prorated and underwritten by the hospital.

TITLE: Family Practice Residency

SITE: Saint Vincent's Family Practice Center

120 West Fall Creek Parkway

Indianapolis, Indiana 46208

DATE OF OPERATION: Approved as Family Practice Residency, March 3, 1970

DIRECTOR: A. Alan Fischer, M.D., ABFP

FACULTY: 12 Family Physicians, 22 Specialty Areas, 1 Administrative, 2 Dietitians, 1 Coordinator of Community Health Services, 1 Social Worker, 1 Family Planning Counselor.

RESIDENTS: Positions available: First Year 2 -- $10,620
Second Year 2 to
Third Year 2 -- $13,512
Identity retained.
No. residents completing program: None

MODEL: The Model Family Practice Unit is located in Marillac Hall adjacent to the hospital: 4 rooms for office-examining, 1 consultation-examining room for sigmoidoscopy and special procedures, reception-waiting room. When the new St. Vincent's Hospital is completed in 1972, the family practice unit will be housed in a suite of offices in the Professional Building to be erected adjacent to the hospital.

PATIENTS: Ambulatory -- Families from wide socioeconomic range. Referral sources are members of the family practice section, patients from other services and referrals from outpatient clinics and self-referrals.

Hospital -- The resident admits and cares for inpatients including OB cases; assigned for specific periods to the family practice service which includes the care of private patients of the family practice faculty.

Institutional -- Marion County Mental Health Center; Public Health; Ob-Gyn Clinics; 3 nursing homes which are used in the teaching program; Catholic Services Welfare Homes for boys and girls.

TRAINING: The family practice resident spends one-half day per week during the first year in the Family Practice Center increased to five and one-half days per week by the third year. Rotation through the clinical disciplines: Internal Medicine 4 months, Obstetrics 2 months, Gynecology 1 month, Pediatrics 2 months, Psychiatry 2 months, General Surgery 2 months, Urology 1 month, Electives 10 months including at least 2 months of a surgical subspecialty. Resident spends a total of twelve months in the Family Practice Clinic, i.e., 2 months, first year; 4 months, second year; 6 months, third year.

Family Practice Seminars include Health Hazard Appraisal, Psychiatric Referrals and Hospitalization, Controlled Therapeutic Trials and Statistics, Multiphasic Screening, Immunization - Principles and Practice, Continuing Education - Principles and Techniques, Social Worker and Social Agencies, Journal Club (monthly in homes of faculty members).

FUNDING: This program is financed by fee for service and support from medical education budget.

Second Year	4 --	$10,600
Third Year	4 --	$11,200

Identity retained.
No. residents completed program: One

MODEL: The Family Practice Office is a remodeled nurses dormitory adjacent to the hospital with the Director's office, receptionist's office, 6 exam rooms, nurses station, drug room, small conference room, TV taping room, and 4 private offices for residents. It functions entirely as a private office with appointments, etc.

PATIENTS: Ambulatory -- Resident chooses 50 families by the end of the third year from emergency room and obstetric service.

Hospital -- Specialty rotation, resident on loan, integrated family practice beds on small services.

Institutional -- 1 day/wk. for 6 weeks in Ball State University Speech/Hearing Clinic and Delaware County Child Guidance Clinic with diagnostic, therapeutic and prognostic responsibilities; nursing homes, New Castile State Hospital.

TRAINING: The family practice resident spends 30% of his first year in the model family practice unit. The remaining portion of his first year is spent in rotation through the clinical disciplines on block assignments. The time in the model unit is increased to 50% the second year and 100% the third year. Throughout his training the resident spends 8 months in Internal Medicine, 4 months in Surgery, 4 months in Pediatrics, 4 months in Ob-Gyn, 2 months in Psychiatry, 6 months in Electives. Residents develop a research project in the first year and complete it in the second year.

Preceptorship training: 3 to 6 months are spent in the office of a family physician as his partner, sharing directly in all aspects of private office practice.

All first year residents participate as school physicians with experience in histories and physicals for sports, consultations, and covering athletic events (this averages 3 months). Second year residents work in psychological testing in Anderson city schools.

Conferences include two weekly didactic lectures, weekly Health Hazard Appraisal conferences, a weekly conference for all new cases seen in the Family Practice Clinic, biweekly conference on core content in family practice, monthly CPC, Medical/Surgical conferences and therapeutic conference.

FUNDING: This program is funded by Ball Memorial Hospital and fee for service.

DESCRIPTIONS - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Saint Joseph's Hospital Family Practice Residency Program

SITE: Saint Joseph's Hospital

811 E. Madison Street

South Bend, Indiana

DATE OF OPERATION: Approved as Family Practice Residency, March 24, 1970

DIRECTOR: Norman N. Holtzman, M.D.

FACULTY: Forty-two family physicians from staff and family physicians in constant attendance in model unit. There are dieticians, Social Service, Inhalation Therapists, Clinical Psychologists. Twenty-five paid teaching faculty covering all subspecialties.

RESIDENTS: Positions available: First Year 4 -- $9,600
Second Year 4 to
Third Year 4 -- $12,600
Identity retained.
No. residents completing program: None

MODEL: The Family Practice Office is a 2,596 square foot unit containing 2 waiting rooms, nurses' station, EKG, access to X-ray, 7 examining rooms, one administrative office and a small laboratory.(in hospital)

PATIENTS: Ambulatory -- Residents are assigned patients from wide socio-economic range.

Hospital -- Residents admit patients from the family practice unit under his own service and the service of the staff physician for the month (designated as the consultant for that particular specialty discipline).

Institutional -- Mental Health Clinic, Logan Center, County Public Health Department, Healthwin Hospital (chronic disease hospital), Cardinal Nursing Home.

TRAINING: The family practice residents participate as to time spent in the Family Practice Office as follows: 25% the first year; 35-40% the second year and five half days or more during the remainder of their program. These are conducted as regular office hours for the entire three years. The Family Practice Office at the present time has clinical records which are separate from those of the parent institution. Plans are now being made to have accounting records separated from the parent institution.

Time spent in rotation through the clinical disciplines of medicine: Internal Medicine 33%, Surgery 16%, Pediatrics 16%, Ob-Gyn 16% Psychiatry 8%, Elective 40-50% of all disciplines.

There are regular clinical correlation seminars each Monday morning on contemporary topics given by the attending and house staff. There are also medical meetings that each house officer is asked to attend (topic of his choice anywhere in the U.S.A.). Special seminars in trauma given by the Orthopedic group and regular CPC's alternating between community hospitals monthly. Seminars in Cardiology and in Rheumatology and Endocrinology are given twice a month September through May in cooperation with affiliations with Indiana University Medical Center and other institutions.

Preceptorship: A regular rotation with one family physician every three months in their offices. Individual arrangements with subspecialties as desired by house officers, e.g., proctology, neurology, orthopedics.

FUNDING: This program is funded by the Indiana state government and by Saint Joseph's Hospital.

AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Mercy Hospital Family Practice Residency Training Program

SITE: 835 6th Avenue, S.E.

Cedar Rapids, Iowa 52403

DATE OF OPERATION: July 1, 1971

DIRECTOR: L. Robert Martin, M.D., ABFP

FACULTY: Supervision and teaching are provided by the full-time director, the assistant director and the Family Practice section of the hospital's staff (4). Classical specialty consultation is available in the model office.

RESIDENTS: Positions available:

First Year	8	-- $10,200
Second Year	8	-- $10,800
Third Year	8	-- undetermined

Identity retained.
No. residents completing program: None

MODEL: The Family Practice Clinic is self-contained, has 8 examining rooms, 9 offices, 9 consultation rooms, nurses' station, medical library, medical records, conference room. The model provides facilities for routine lab work, urinalysis, C.B.C., wet slides, etc. X-ray and a complete complement of laboratory facilities serving the entire hospital and the family practice model are available within the same building approximately one hundred yards removed.

PATIENTS: Ambulatory -- Family Practice Unit provides ambulatory medical care to 1,500 to 2,000 families from all social and economic levels.

Hospital -- Patients who require admission to the hospital are admitted to the Family Practice Service under the name of the admitting resident. The resident assumes full responsibility of the admission and his activities are supervised by the family practice consultant or the program director.

TRAINING: The family practice resident's time in office setting increases from approximately 10% in first year to 50% in third year. During the resident's first year, he will supervise approximately 20 families; during the second year 50 to 75 families; and during the third year, 75 to 125 families. Time spent during training in rotational assignment to classical specialty oriented inpatient services: Internal Medicine 33%, Surgery 16%, Pediatrics 14%, Ob-Gyn 11%, Psychiatry 8%, Elective 18%. The teaching conference technique is used daily. House Officers produce some of the core content of the teaching conferences under direct attending staff supervision. Medical students participate in this program.

FUNDING: This program is financed by fees for services, subsidized by the participating hospitals, consultants and visiting faculty who contribute their time to the program.

AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: The University of Iowa, College of Medicine-University Hospital Family Practice Residency

SITE: The University Hospitals Complex, University of Iowa (major teaching unit) Family Practice Model Office, Oakdale Campus
Mercy Hospital, Iowa City
St. Joseph Mercy Hospital, Mason City

DATE OF OPERATION: June 1, 1972

DIRECTOR: Robert E. Rakel, M.D., ABFP

FACULTY: The program is supervised by five faculty of the Department of Family Practice, 3 full time and 2 part time, plus the 267 full-time staff physicians of the University of Iowa Hospitals and Clinics and the 169 member medical staffs of Mercy Hospital, Iowa City, and St. Joseph Mercy Hospital, Mason City.

RESIDENTS: Positions available:

First Year	10 at $9,300 per yr.
Second Year	10 at $9,800 per yr.
Third Year	10 at $10,300 per yr.

Identity retained.
No. residents completing program: None

MODEL: The family practice model office is located in a newly-remodeled portion of the Oakdale Hospital on the University's Oakdale Campus, 10 minutes from the General Hospital. It contains approximately 8,000 square feet, including 9 exam room/office combinations; a reception and waiting area; nurses' station; laboratory; testing area; administrative and allied health personnel offices; a conference room; a library; a two-way mirror and adjacent X-ray unit.

PATIENTS: Ambulatory -- Patients in the Oakdale Family Practice Office are drawn chiefly from an eight-township area surrounding the Oakdale Campus. They come from all socioeconomic levels, and represent a typical patient population in a rural and semi-rural community. Families of students, university employees, and faculty members make up a percentage of the patient population as well.

Hospital -- When hospitalization is required of patients seen in the Oakdale Family Practice Office, they are admitted to Mercy Hospital, Iowa City, and remain the responsibility of the admitting resident. Other inpatients are assigned by the teaching staff.

Institutional -- Facilities of all institutions listed under SITE above, plus close involvement with a team of allied personnel including a Public Health Nurse, Social Worker and Clinical Pharmacist. Maximum community involvement is emphasized.

TRAINING: The family practice resident spends two afternoons per week in the Oakdale Family Practice Office during the first year, with the amount of time increasing steadily through the three-year program until half of every day is involved. The remaining portion of the first year is spent rotating through all major clinical disciplines. A major portion of the second and third year are elective, with some 13 medical and surgical subspecialty electives available. A fourth, or fellowship year, is available for selected candidates pursuing a career in academic medicine or emphasizing a subspecialty area. All residents share responsibility for medical student supervision.

FUNDING: The program is funded primarily by state appropriations, fee-for-service income in the Family Practice Office, and by cost-sharing with the affiliated hospitals.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Department of Family Practice

SITE: University of Kansas Medical Center
39th and Rainbow Boulevard
Kansas City, Kansas 66103

DATE OF OPERATION: July 1, 1972

DIRECTOR: Jack D. Walker, M.D.

FACULTY: Full time Professor and Assistant Professor of Family Practice, 2 full time instructors of family practice, 22 part-time and voluntary Family Physicians, 1 attorney, 4 allied health personnel.

RESIDENTS: Positions available:
First Year 6 -- $9,000
Second Year 6 -- $9,500
Third Year 6 -- $10,000
Identity retained.
No. residents completing program: None

MODEL: A temporary Family Practice Clinic has been provided in a three year old, two story fraternity house. The permanent facility will be ready in less than 12 months. The philosophy is to provide a facility with academic offices, a model family practice clinic, and inpatient family practice beds all in a single geographic unit. The facility consists of three floors measuring approximately 200 feet x 40 feet or approximately 24,000 square feet.

PATIENTS: Ambulatory -- Number of patients assigned each resident will vary by experience but beginning formula will be: first year - 20 families; second year - 40 families; third year - 100 families. Patients will represent socioeconomic cross-section of the Kansas City area.

Hospital -- Resident physicians may admit directly to the Family Practice inpatient bed section. Resident may refer patients to appropriate inpatient units involving other clinical disciplines. In such cases, the Family Practice resident may follow the patient.

Institutional -- Utilization of community resources.

TRAINING: The family practice resident spends 20% of his first year in the model family practice unit. The remaining portion of his first year is spent in rotation through the clinical disciplines on block assignments. The time in the model unit is increased to 40% in the second year and 60% in the third year. Internal Medicine 6 mos., Pediatrics 4 mos., Ob-Gyn 3 mos., General Surgery 3 mos., Preventive Medicine and Community Health 2 mos., Elective time 16 mos.

Within the Department of Family Practice the resident physician will be responsible for (a) the Journal Club Monthly Meeting, (b) Active participation in weekly patient care conference where problems of diagnosis, delivery of care, social problems, deaths of patients will be evaluated and discussed. The small conference approach is widely offered at KUMC with many and varied opportunities available on a daily basis. Medical students participate in the training.

FUNDING: This program is funded by special appropriation from the Kansas state legislature, federal subsidy, research grants, private money and income derived from the practice of medicine.

DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency

SITE: St. Joseph Hospital and Rehabilitation Center

3400 Grand Avenue

Wichita, Kansas 67278

DATE OF OPERATION: Approved as Family Practice Residency, June 4, 1970

DIRECTOR: James M. Donnell, M.D., ABFP

FACULTY: 37 Family Physicians, 149 specialty disciplines, 1 chaplain, 3 social workers and 2 dieticians.

RESIDENTS: Positions available:

First Year	4	-- $700/mo.
Second Year	4	to
Third Year	4	-- $850/mo.

Identity retained.
No. residents completing program: None

MODEL: The Family Practice Clinic is a ground level 40-feet by 60-feet structure located in the hospital's courtyard area. The new clinic contains 10 examination rooms, two consultation rooms which will double as doctors' offices, restrooms, a nurses station/medication room combination, and a large waiting room.

PATIENTS: Ambulatory -- Approximately 50 families from all socioeconomic levels per resident.

Hospital -- Patients are assigned to both the Family Practice Service and other departments.

Institutional -- Serves the Sedgwick County Health Department.

TRAINING: The family practice resident spends approximately one third of his time during training in the Family Practice Clinic. Residents rotate through specialty disciplines, the time spent in each discipline varying depending on the wishes of the resident. Approximate estimates are: Internal Medicine 33%, Surgery 16%, Pediatrics 16%, Ob-Gyn 16%, Psychiatry and Electives 16%. Daily ward rounds and a one hour conference daily.

FUNDING: Primary initial funding is from the hospital. Fee for service is developing.

AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency

SITE: Hopkins County Hospital & Trover Clinic

237 Waddill Avenue

Madisonville, Kentucky 42431

DATE OF OPERATION: Approved as Family Practice Residency, January 2, 1971

DIRECTOR: Dan A. Martin, M.D.

FACULTY: Staff of Trover Clinic and selected members of Hopkins County Hospital staff and members of Area Health Occupations Building (allied health school).

RESIDENTS: Positions available:

First Year	2	-- $9,000
Second Year	2	to
Third Year	2	-- $10,000

Identity retained.
No. residents completing program: None

MODEL: The Family Practice Office is located in the Family Practice Section of Trover Clinic with new facilities available with all supporting services, i.e., lab, x-ray, business, medical records, consultants, etc.

PATIENTS: Ambulatory -- 220,000 outpatient visits to Trover Clinic in one year which includes all socioeconomic categories. The clinic is the outpatient service for Hopkins County Hospital.

Hospital -- Inpatients are admitted by the resident to all services.

Institutional -- TB Hospital (110 beds); 70-bed convalescent (nusing) home; Health Department.

TRAINING: The family practice resident works in the model family practice unit one half day during his first year, 1½ days during the second year and 2½ days during the third year, and will spend the other time on specialty, elective, or in the last year, 6 months full time in the Family Practice Office. The resident functions just as do senior physician members of Trover Clinic who spend one half day with outpatients and one half day with inpatients. For specialty patients, the resident consults with the particular service director responsible for that specialty. For family practice patients, he consults with the senior family physician.

Time spent in rotation through conventional clinical disciplines: Internal Medicine 10 months, Surgery 4 months, Pediatrics 5 months, Ob-Gyn 4 months, Psychiatry 2 months, Elective 5 months. Most conferences are optional but full line of conferences by various departments are available and are graded each of the three years toward the community.

FUNDING: This program is financed through contributions of the Trover Clinic Foundation and fees for services.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency Program

SITE: Earl K. Long Memorial Hospital

5825 Airline Highway

Baton Rouge, Louisiana 70805

DATE OF OPERATION: July 1, 1971

DIRECTOR: Vance G. Byars, M.D., ABFP

FACULTY: Chief of the Department of Family Practice, both full time personnel (department heads and staff in major special ties) and practicing physicians assigned to the visiting faculty.

RESIDENTS: Positions available:

First Year	6	-- $750/mo.
Second Year	6	to
Third Year	6	-- $800/mo.

Identity retained.
No. residents completing program: None

MODEL: The Family Practice Center is located adjacent to the hospital and includes a waiting room, receptionist office, consultation, examining and treatment rooms, minor surgery and laboratory.

PATIENTS: Ambulatory -- Starting with 8-10 families per resident, increasing to approximately 50-60 families. Patients are from primarily low income group but socioeconomic spread anticipated.

Hospital -- Residents responsible for own patients on all services with supervision, i.e., consultants from hospital and visiting staff.

Institutional -- 1) Care of patients in nursing homes; 2) Participation in program at local Health Unit; 3) Participation in Mental Health Center Program; 4) Participation in the care of geriatric patients at Villa Feliciana which is a large geriatric hospital; 5) Participation in industrial medicine programs; 6) Participation in mass screening and immunization program.

TRAINING: The family practice resident spends approximately 15% of first year in family practice training; thereafter 50-75%. The resident's responsibilities are extensive and varied as he will be directly responsible for the care for those families assigned to him. After his first year of training, not only is he responsible for patient care, but he also is responsible for the supervision of other family practice residents. His main clinical assignments are in the Departments of Internal Medicine, Pediatrics, Surgery and Gynecology and he actively participates in patient care in each of the clinics. Research projects are encouraged and ongoing in the program. Daily conferences involving other specialties and allied health services.

FUNDING: This program is part of a university medical school training program and is financed as part of the University budget. Those patients who are financially able to pay for their care are billed on a fee-for-service basis and these funds are utilized in the overall operation of this facility.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Department of Family Practice

SITE: Franklin Square Hospital

9000 Franklin Square Drive

Baltimore, Maryland 21237

DATE OF OPERATION: July 1, 1972

DIRECTOR: William Reichel, M.D.

FACULTY: 39 faculty members, 12 in the Department of Family Practice, 11 full time staff members.

RESIDENTS: Positions available:

First Year	4	-- $8,100
Second Year	4	to
Third Year	4	-- $8,500

Identity retained.
No. residents completing program: None

MODEL: Family Practice Center occupies large area of main floor of hospital. The Center contains the usual waiting and business areas, and storage areas, 7 exam rooms, x-ray, EKG, procto rooms, nurses station, offices for residents on-call.

PATIENTS: Ambulatory -- Family Practice Center patients enrolled as entire families. Clinic and Emergency Room outpatients are seen while on specialty services.

Hospital -- Inpatients are seen by resident while on specialty services. Resident assumes the care of his patient when family practice patient is hospitalized.

Institutional -- Baltimore County Mental Health Clinics; Baltimore County Health Department.

TRAINING: First year family practice residents rotate through Medical clinics and the Emergency Room to become familiar with emergency, urgent and non-urgent problems, and to distinguish between medical and surgical emergencies. Second year residents spend mornings of the entire second year in the Model Family Practice Unit and in the Medical Clinics, and afternoons in Surgical, Ob-Gyn and Psychiatric and Mental Health Clinics. At all levels Family Practice residents are responsible for primary care of both initial patients and scheduled clinic patients. This will be under supervision of senior physicians of appropriate clinics.

Residents are responsible for teaching interns, nurses and student nurses on both a formal and informal basis. Family practice residents are also responsible for communicating with local physicians and health agencies to see that continuing care is provided for those patients who are returning to their family physicians or need other social or medical services not provided by the hospital.

Residents learn to administer their own clinic practice. Residents will be in direct contact with attending physicians in each clinic. Every patient experience at Franklin Square Hospital is supervised by an attending physician. Certain clinics have regular conferences belonging to Department conference series, which utilize outpatient cases as well as inpatient cases. All departments integrate problems of outpatient care in their regular conference series.

FUNDING: This program is funded by fees for services.

AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Division of Family Practice

SITE: University of Maryland School of Medicine

Lombard & Green Streets

Baltimore, Maryland 21201

DATE OF OPERATION: July 1, 1968

DIRECTOR: Edward J. Kowalewski, M.D.

FACULTY: Two full time Family Physicians, two full time specialists, allied health personnel include two sociologists and one public health nurse.

RESIDENTS: Positions available:
First Year 4-- $7,000
Second Year 4-- to
Third Year 4-- $8,200
Identity retained.
Number of residents completing program: None

MODEL: The MFPU is located on the first floor of the University Of Maryland School of Medicine hospital in a separate but adjacent unit of the north wing. The 60,000 square foot area contains 13 examining rooms, 7 consultation rooms, a business office, a dental unit, a social worker's office, model orthopedic room, minor surgery room, endoscopy room, a visual aids room, on-call room, experimental laboratory, library, office for full time staff physicians(3) EKG, and a conference room. X-ray equipment is available on the floor above the unit.

PATIENTS: Ambulatory -- Patients are selected from Evaluation Clinic - 50 families per resident.

Hospital -- Resident's patients requiring admission are followed by the resident on all services. Resident cares for teaching patients on service to which he is assigned.

Institutional -- Montebello State Chronic Disease Hospital, nursing homes, Chronic Disease Hospital.

TRAINING: The family practice resident spends 20% of his first year in the model family practice unit. The time in the model unit is increased to 50% during the third year. Approximate time spent in rotation through the traditional clinical disciplines: Internal Medicine 20%, Surgery 5%, Pediatrics 15%, Ob-Gyn 10%, Psychiatry 10%, Elective 15%. Additional

assignments to specialty areas, research project and/or preceptorship may be elected during second year or third year. Program is flexible to suit the wishes of the resident. There are regularly scheduled, planned seminars.

FUNDING: This program is funded by the state and federal government.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Health Care Program

SITE: Harvard Medical School

83 Francis Street

Boston, Massachusetts 02115

DATE OF OPERATION: Approved as Family Practice Residency, October 17, 1970

DIRECTOR: Richard I. Feinbloom, M.D.

FACULTY: Three full time, three part-time senior staff, four Fellows, three public health nurses, three social workers.

RESIDENTS: Positions available: First Year - Note: Residencies in this program commence after internship
Second Year 2 -- $8,500 to $9,500
Third Year 2 -- $8,000 to $10,000
Fourth Year 2 -- $8,000 to $10,000
Identity retained.
No. residents completing program: None

MODEL: The Family Health Care Program is a free standing unit next to the Children's Hospital Medical Center composed of approximately 5,000 square feet of floor space (basement and first floor). The basement contains a kitchen/lounge, lavatory, conference room, library and 2 offices. The first floor contains 13 offices, 7 exam rooms, laboratory, storage area.

PATIENTS: Ambulatory -- Resident assigned 5 families in the first year increasing to 100 families in the third year. Families are demographically representative of the area.

Hospital -- Resident admits and has responsibility for patients on all services.

TRAINING: The family practice resident spends one half day per week during the second and third year in the Family Health Care Program. During the fourth year the resident is a full time Fellow in the Family Health Care Program.

The first two years are spent principally on the inpatient services of the Children's Hospital and the Peter Bent Bingham Hospital. At the Children's Hospital, the resident will have four months on the wards, three months in the outpatient department, one month rotations in neurology, cardiology, tumor therapy, and emergency clinic, and one month as pediatrician on the newborn service at the Boston Hospital for Women. During the year at the Peter Bent Brigham, the resident will have six months on the wards, one month at the Boston Hospital for Women, and one month rotations in hematology, neurology, endocrine disease, and two months in the admitting emergency clinic.

The resident will participate in a series of seminars dealing with topics such as sociology of the family, common family problems, and research in ambulatory medicine. Psychiatric experience is an important part of the program.

The last or fourth year of the residency program is spent as a full time member of the program's staff. A large part (one third) of his time is spent as preceptor to 3rd and 4th year medical students spending their 18 month stint with the residency program as family doctor to 3 or 4 families. In addition, the residents are actively involved in a first year program and may train associated health workers.

FUNDING: This program is financed by private and government grants.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency

SITE: St. Joseph Hospital

302 Kensington Avenue

Flint, Michigan 48502

DATE OF OPERATION: Approved as Family Practice Residency, December 2, 1971

DIRECTOR: Louis E. Simoni, M.D., ABFP

FACULTY: Director, Assistant Director of Department of Family Practice, all hospital services and the subspecialties are well represented with board certified and board eligible men.

RESIDENTS: Positions available:

First Year	6	-- $750/mo.
Second Year	6	-- $850/mo.
Third Year	6	-- $950/mo.

Identity retained.
No. residents completing program: None

MODEL: The Family Practice Office is the remodeled-redesigned School of Nursing Building. The unit provides eight suites, each containing a consultative room which serves as the basic headquarters of the resident in that unit, with three examining rooms immediately adjacent.

PATIENTS: Ambulatory -- 20 families assigned first year resident; upwards of 50 families assigned second year resident; upwards of 100 families assigned third year resident from broad socioeconomic range.

Hospital -- Entire hospital is available as an inpatient service for the Model Unit. Resident admits patients directly and has responsibility for patient care.

Institutional -- Utilization of community resources.

TRAINING: The first year family practice resident essentially experiences a rotation similar to that of an Internship (Medicine 4 mos., Surgery 3 mos., Pediatrics 2 mos., Ob-Gyn 2 mos., Emergency Room 1 mo.) with some exposure half days in the Model Family

Practice Unit. The second year resident has one third electives, rotation in Medicine, Psychiatry and Pediatrics, approximately two half days in the Model Unit. The third year resident has one half electives and one half Model Unit Practice. Variations in electives are made with approval of the Family Practice Director.

Residents will be charged with an initial research project, which will deal with the effectiveness of medical care delivery, both on a practice level and on a hospital level. Medical students participate in this program.

FUNDING: This program is financed by Saint Joseph Hospital Medical Education Budget, grants and fee for service.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency Program

SITE: Edward W. Sparrow Hospital

1215 East Michigan Avenue

Lansing, Michigan 48902

DATE OF OPERATION: July 1, 1970

DIRECTOR: Harold E. Crow, M.D.

FACULTY: Five Family Physicians and fifteen other specialists, social workers, administrative staff, dietary and other auxiliary help on call. Associate Director of Family Practice to be added.

RESIDENTS: Positions available:

First Year	4 --	$10,000
Second Year	4 --	$11,000
Third Year	4 --	$12,000

Identity retained.
No. residents completing program: None

MODEL: The Family Practice Center includes waiting room, business office, director's office, residents' offices, work room, supply room and six examining rooms that are physically part of the hospital but identifiable as a separate unit.

PATIENTS: Ambulatory -- Approximately 800-1,000 families. Source of patients (a) Lansing area physicians; (b) Patients with no family physician seen in the Emergency Room; (c) Patients referred from the Ingham County Health Department; (d) Patients on self-referral.

Hospital -- The resident will follow his families as inpatients and assume care for other inpatients pertinent to learning experience.

Institutional -- The Family Practice resident follows his patients in nursing homes and is encouraged to spend elective time at allied facilities.

TRAINING: The family practice resident is the physician of first contact and supervises the continuing and comprehensive care of those patients assigned to him or seeking his service. He or his substitute are always on call. During the first year of residency approximately 10-20% of time is spent in the Family Practice Center with 80% spent in rotation through the other departments; second year 50% in Family Practice Center; third year 75%. Resident covers all major specialty areas that apply to Family Practice and records are kept of his progress through them. There will be enough flexibility to allow extra time in areas of special interest to the resident. A research project in Family Practice starts the second year.

The medical team concept is used in the residency training program. It serves a twofold purpose: first, that the resident will utilize efficiently and effectively these personnel when he begins his practice and, second, to establish a training program for these personnel as members of the team.

There are specialty conferences and weekly Family Practice meetings.

FUNDING: This program is funded by fees for services.

AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency Program

SITE: The Family Practice Office

4005 Orchard Drive

Midland, Michigan 48640

DATE OF OPERATION: December 1969

DIRECTOR: Robert E. Bowsher, M.D.

FACULTY: Full time Family Physician, thirteen part-time Family Physicians (one half day per week in Family Practice Office), entire medical staff (over 70) of Midland Hospital including representatives of the recognized specialties and (monthly) visiting faculty from the University of Michigan as well as allied health professionals.

RESIDENTS: Positions available: First Year 6 -- $9,500
Second Year 6 to
Third Year 6 -- $11,500
Identity retained.
No. residents completing program: Two

MODEL: The Family Practice Office is a new building adjacent to Midland Hospital and the Community Mental Health Center. The office includes a waiting room, receptionist's office, three consultation rooms, eight examining and treatment rooms, minor surgery and broad socioeconomic range.

PATIENTS: Ambulatory -- Starting with 8 to 10 families per resident, increasing to approximately 50 families by the third year, representing broad socioeconomic range.

Hospital -- The resident's family practice patients are admitted to all services and are followed by him regardless of his service assignment at a given time. Essentially all hospital patients are considered teaching patients.

Institutional -- Community Mental Health Center, Midland County Health Department.

TRAINING: The family practice resident spends approximately one half day of his first year in the model family practice unit. The remaining portion of his first year is spent in rotation through the clinical disciplines on block assignments. The time in the model unit is increased to 50-60% or more in the third year. Internal Medicine 6 mo. and subspecialty (including OPD), Surgery 3 mo., Pediatrics 4 mo., Ob-Gyn 3 mo., Psychiatry 2 mo., Elective 18 mo. Staff and departmental conferences at regular weekly, semi-monthly or monthly intervals. Monthly faculty presentations plus semi-annual clinic days with visiting faculty. Resident may elect final 6 months at University of Michigan or in preceptorship.

FUNDING: This program is funded by the Midland Hospital Association and fees for services.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Medicine Residency

SITE: Saginaw Cooperative Hospitals, Inc.
705 Cooper Street
Saginaw, Michigan 48602

DATE OF OPERATION: July 1, 1968

DIRECTOR: Roy J. Gerard, M.D., ABFP

FACULTY: 1 full time Family Physician; Part-time: 48 Family Physicians, 66 specialists, allied health personnel include hospital administrators, hospital chaplains, social workers.

RESIDENTS: Positions available:

First Year	6	-- $10,000
Second Year	6	to
Third Year	6	-- $12,000

Identity retained.
No. residents completing program: Three

MODEL: The Family Practice Office is a separate unit at St. Luke's Hospital and contains a complete office setting with 5 examining rooms, consultation rooms, area for seminar discussion, laboratory facilities in unit.

PATIENTS: Ambulatory -- Resident is responsible for total care of approximately 25 families first year, 100-200 second year, in excess of 300 third year. Complete socioeconomic spectrum.

Hospital -- Residents responsible for own patients on all services under supervision. Selected inpatients are assigned to second and third year Family Practice resident in Medical Teaching Unit.

Institutional -- Resident sees patients in extended care facilities: 1. Community Clinic 2. Family Planning Clinic 3. Well-Baby Clinic 4. Visiting Nurses Coordinated Home Care Model 5. Nursing homes

TRAINING: The family practice resident spends one-half day weekly in the Family Practice Center during the first year. The remaining portion of his first year is spent in rotation through the clinical disciplines on block assignments, i.e., Medicine 4 months, Pediatrics 2 months, Surgery 3 months, Ob-Gyn 2 months, Emergency Room 1 month. During the second year, there is limited in-hospital rotation confined primarily to Ob-Gyn and Pediatrics, with continuing responsibility to the Medical Teaching Unit. During the third year, major portion of time is spent in ambulatory care.

Daily conferences in major clinical areas. Family Practice tape sessions every two weeks. Behavioral science seminar monthly. Problem-oriented record utilized in both in and outpatient care. The resident participates in weekly sessions at a local Visiting Nurses Coordinated Home Care Model, where family problems are discussed with either Public Health Nurses, the medical social worker, medical students. There is a weekly session in the Family Planning Clinic including a complete history and physical.

During the second year the resident is placed in a practice setting, one month, either rural or urban, solo or group, depending on the future plans of the individual resident. There is also a one month preceptorship with a pediatric group during the same year.

FUNDING: This program is financed by subsidy from sponsoring hospitals and fee for services.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Hennepin County General Hospital Family Practice Program

SITE: Hennepin County General Hospital

5th & Portland South

Minneapolis, Minnesota 55415

DATE OF OPERATION: Approved as Family Practice Residency, March 24, 1970

DIRECTOR: Eldon Berglund, M.D.

FACULTY: In addition to the director and associate director, serving full time in family practice program are one Family Physician, one internist and one psychiatrist. The services of 60 full time teachers and many visiting staff doctors are also utilized.

MODEL: The Family Practice Office is a 2,100 square feet structure located adjacent to the teaching hospital and it functions much as a private doctor's office with immeiiate access to facilities of the county teaching hospital. It contains a waiting room, business office, 7 exam rooms, 1 treatment room, residents' work room and library, 2 staff offices, record transcriber office, laboratory and nurse working area.

RESIDENTS: Positions available:

First Year	12	-- $9,000
Second Year	6	to
Third Year	6	-- $12,000

Identity retained.
No. residents completing program: None

PATIENTS: Ambulatory -- Regular Hennepin County General Hospital patients plus patients of wide socioeconomic spread who apply for care at clinic. At present about 70% are pay patients.

Hospital -- Residents rotate through inpatient services at Hennepin County General Hospital and also care for patients hospitalized from Family Practice Clinic.

Institutional -- Residents care for nursing home patients.

TRAINING: The family practice resident gradually increases time spent in MFPU from one half day per week in first year to full time during third year. The remaining portion of his residency training is spent in rotation through the clinical disciplines: Internal Medicine 40%; Surgery 10%; Pediatrics 25%; Ob-Gyn 15%; Psychiatry 5%. Additional training in one or more of these specialties may be taken during a 3 month elective period during the third year. Residents may participate during the second year in optional preceptorship spending one month in rural Family Physician's office. Many grand rounds, conferences on various clinical services, seminars in the behavioral sciences and night seminars attended by wives and residents in marriage counseling.

FUNDING: This program is funded by a grant from the State of Minnesota, support from Hennepin County and fees for services. (Fee for service not used in direct support of program.)

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Residency Training Program

SITE: Department of Family Practice & Community Health

University of Minnesota Medical School

Minneapolis, Minnesota 55455

DATE OF OPERATION: February 8, 1969

DIRECTOR: Edward W. Ciriacy, M.D., ABFP

FACULTY: Six Family Physicians, 2 internists, 1 pediatrician, 1 health administrator, 1 educational psychologist.

RESIDENTS: Positions available:

First Year	26	--	$8,400 (Internship)
Second Year	5		to
Third Year	5	--	$12,500

Identity retained.
No. residents completing program: One

MODEL: The model family practice unit is on the second floor of the outpatient department of the University of Minnesota Hospital and is a self-contained unit with a waiting room and children's play room, control station, two student and house staff study rooms, a library conference room, laboratory, protoscopic room, treatment room, psychologist's office and psychiatric testing room, eleven consultation and examining rooms.

PATIENTS: Ambulatory -- The patient reservoir will be developed through a prepaid insurance mechanism and will represent all age groups and socioeconomic levels.

Hospital -- Residents are responsible for the care of each of his patients requiring admission to the hospital.

TRAINING: During the first year of training the educational emphasis is placed on "in-hospital" experience with more critically ill patients. It is a year of acquisition of skills in the management of patients as well as the development of attitudes toward the kinds of problems which the intern will encounter in actual practice. Although there are opportunities to acquire experience in all of the disciplines relevant to Family Medicine, the intern's experience is patterned in such a way that he will be participating in the "in-hospital" experience of Family Physicians.

The residency program is planned in such a way that the resident is given total responsibility for a patient population. The resident is the physician to whom the patient relates as his primary physician. The family practice unit is established as a group practice, the residents sharing in responsibilities and unit management. Because of this structure the resident will acquire his further education in family medicine in an environment which will simulate closely the environment in which he will practice medicine. He will have hospital beds available to him on the family medicine service for those patients who require hospitalization.

The unusual feature of this program is the fact that there are no formal rotations through other departments.

FUNDING: This program is funded by legislative grants and research grants.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Department of Family Medicine and Community Health

SITE: St. Paul-Ramsey Hospital

University at Jackson Street

St. Paul, Minnesota 55101

DATE OF OPERATION: February 2, 1972

DIRECTOR: Vincent R. Hunt, ABFP

FACULTY: 3 full time and 4 part-time Family Physicians, 1 full time social worker. Part-time physicians consultants from the 50-55 full time hospital faculty and from the community. Part- time consultants in medical records, community health, dietetics, nurse assistants, health education and other allied medical fields. Physician faculty members have academic appointments at the University of Minnesota.

RESIDENTS: Positions available: First Year 6 to 12 -- $9,000
Second Year 6 to 12 to
Third Year 6 to 12 -- $10,350
Identity retained.
Number of residents completing program: None

MODEL: The MFPU is a newly constructed clinic located one mile from St. Paul-Ramsey Hospital. The unit is 10,000 square feet containing 11 examination rooms, 2 conference rooms, a reception area with an adjoining waiting area for children, nurses' station, two offices for staff physicians, two carrels for residents, four audio-visual rooms, X-ray, laboratory, EKG, offices for a social worker and nurse practitioner, a patient education room and a research center. The research center is an innovative and well-equipped addition to the MFPU. A library of cassettes, slides and publication (with plans for movies in the future) keep the unit well-stocked with valuable resource material.

PATIENTS: Ambulatory -- Majority of patients come from surrounding area which is a mixed socioeconomic neighborhood. Residents assume primary responsibility for these family units with progressive increase to approximately 100 families by third year.

St. Paul-Ramsey Hospital, St. Paul, Minnesota

Hospital -- Residents responsible for their patients on their assigned inpatient services as well as Family Practice patients assigned to their respective services.

TRAINING: The family practice resident spends 40% of his time throughout training in the model family practice unit. The resident receives a core training in Internal Medicine, Surgery, Pediatrics, Ob-Gyn and Psychiatry during his first 2 years both through in-service experience and integration of these fields in the Family Practice program. Flexibility will be stressed during the third year, and residents will have the opportunity to pursue their specific goals and interest. Electives are offered in such fields as ENT, Dermatology, Laboratory Medicine, Ophthalmology, Proctology and Public Health. Physicians intending to practice in isolated areas or rural areas are given the opportunity to pursue Surgery and Obstetrics in greater depth.

The residents participate in the multiple teaching conferences at St. Paul-Ramsey Hospital as well as seminars dealing with behavioral science topics, frequently occurring disease entities, clinical pathology conferences based on the pathology detected in the Family Practice Clinic and health care research projects. The residents also participate in courses offered at the University of Minnesota and may pursue a master's degree in the Department of Family Practice.

FUNDING: This program is financed by fee-for-service, legislative grant and foundation grants.

VINCENT R. HUNT, M.D.

so as to approximate the true characteristics of the community. During the first year, the resident will spend a minimum of 10% of his time involved in his own family practice, with allowances for absence during intensive service obligations such as Obstetrics, Surgery, Pediatrics and Medicine.

This time will be increased so that by the third year of the program 50% of the trainee's time may be spent in the care of his own practice and neighborhood responsibilities. Training, while in this portion of the program, will be under the direction and consultation of a preceptor who will be assigned on a one-to-one basis.

Time spent in rotation through the clinical disciplines: Internal Medicine 8 months; Surgery 3 months; Pediatrics 6 months; Ob-Gyn 4 months; Psychiatry 3 months; Electives 50% of third year. There are regular conferences in specialty areas plus 4 Family Practice conferences per week.

FUNDING: This program is funded by the University of Missouri and by the fee-for-service basis.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency

SITE: University of Missouri Medical Center
Columbia, Missouri

DATE OF OPERATION: October 7, 1970

DIRECTOR: A. Sherwood Baker, M.D., ABFP

FACULTY Full time director, 3 Family Physicians and representatives of all other specialties.

RESIDENTS: Positions available:

First Year	3 --	$7,500
Second Year	3 --	$8,000
Third Year	3 --	$8,500

Identity retained.
Number of resident completing program: One

MODEL: The Family Practice Office is located in a 3,600 square foot area of the Medical Sciences Building at the University of Missouri Medical School. The office contains 6 examining rooms, a business office, a nurses' station, EKG, respirometer, 3 additional offices and conference rooms and a small laboratory. The office is open 10 hours per day and is staffed by nurses of the Outpatient Care facility of the University Hospital and administrative supervision is carried out by an Administrator in charge of the Outpatient Clinic.

PATIENTS: Ambulatory -- Sufficient patients will be recruited so that the resident, during his scheduled office hours, will be paced in such a fashion that he might approximate the working load of an ordinary first line physician in the Midwest - approximately 1 patient every 10 or 15 minutes.

Hospital -- Fourteen beds are assigned to Family Practice patients in the University hospital.

Institutional -- Residents follow patients in City Health Clinic and Health Care Nursing Home.

TRAINING: Training in Family Medicine will be present from the beginning of the family practice resident's involvement with the Medical Center. During this time, there will be a gradual increase in the amount of time that the resident spends in the care and management of his own private practice which will be recruited from various aspects and levels of the community. This method of recruiting patients is

DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Creighton University Family Practice Program

SITE: Creighton University School of Medicine

3374 South 13th

Omaha, Nebraska 68131

DATE OF OPERATION: Approved as Family Practice Residency, December 3, 1969

DIRECTOR: Michael J. Haller, M.D.

FACULTY: Full time Assistant Professor of the Department of Preventive Medicine & Public Health, Creighton University School of Medicine; two part-time Family Physicians.

RESIDENTS: Positions available:

First Year	7	-- $9,600
Second Year	4	to
Third Year	4	-- $11,400

No. residents completing program: One

MODEL: The Family Practice Office is separate from Creighton Clinics, was previously occupied by a general practitioner, and has four examining rooms, lab and x-ray. The office is still maintained very much like a private practice office.

PATIENTS: Ambulatory -- Patients are obtained just as a private practitioner's patients are and they come from a broad socioeconomic range.

Hospital -- Inpatients are assigned to Family Practice Department at St. Joseph's Hospital.

Institutional -- Close contact with Creighton Clinics and utilizes all ancillary facilities.

TRAINING: The family practice resident spends 20% of his first year in the model family practice unit. 80% of his first year is spent in rotation through the clinical disciplines. Time spent in the model unit is increased in the second and third year. Internal Medicine 10 months; Ob-Gyn 8 months; Surgery 8 months; Pediatrics 8 months; Psychiatry 6 months; Emergency Room 1 month; Elective 8 months. The resident attends separate department conferences during each six month rotation.

All of the residents are instructed in flying in the hope that they will more likely settle in a rural community if they have the mobility offered by air travel.

FUNDING: This program is funded by fee for service and minimal university funding.

AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency

SITE: Hunterdon Medical Center

Rural Route #31

Flemington, New Jersey 08822

DATE OF OPERATION: Approved as Family Practice Residency, October 18, 1970

DIRECTOR: Frank C. Snope, M.D., ABFP

FACULTY: Entire staff of Hunterdon Medical Center including 24 specialists and 21 Family Physicians participate in educational program.

RESIDENTS: Positions available:

First Year	5	-- $10,300
Second Year	5	-- $10,800
Third Year	5	-- $11,300

Identity retained.
No. residents completing program: Three

MODEL: The Family Practice Office is located in Lambertville, a small town of 5,000, 12 miles from Flemington. The Phillips-Barber Health Center, as it is called, is located on the ground floor of a modern two story building with an area of approximately 4,000 square feet. It has a waiting room, children's room (waiting), receptionist area, nurses station, 10 exam-treatment room, 2 of which can be used as offices for faculty, laboratory, x-ray, emergency room, record room, conference room and library.

PATIENTS: Ambulatory -- In the second year, the resident spends one half to one day a week at the Health Center developing a group of families as his patients and follows them for two years. In addition, the resident attains a sizable patient experience in the Emergency Room and Outpatient Department of the Medical Center.

Hospital -- The resident, during the third year, has full admitting privileges to the Medical Center and has the responsibilities of any staff Family Physician. First and second year residents are assigned patients and responsible for complete patient care on specialty services under supervision.

Institutional -- Home Care Program includes meetings with social workers, psychologists, and public health nurse. The Family Practice residents follow most Home Care patients in home and nursing homes.

TRAINING: Teaching in all services is directed towards Family Practice. There is a large outpatient experience, particularly in pediatrics, psychiatry, gynecology and the surgical sub-specialties including orthopaedics, urology, ophthalmology, ENT and dermatology. Community and preventive medicine is emphasized throughout the teaching program. Medical students participate in the training.

The family practice resident spends the entire first year and most of the second year rotating through the clinical disciplines on block assignments. Internal Medicine 10 months, Surgery and Ob-Gyn 6 months, Pediatrics 6 months, Psychiatry 2 months, Electives 6 months.

The resident spends six months of the third year at the model practice center where he is directed by Family Physicians who are full time members of the Hunterdon Medical Center staff assigned to the family practice model unit. During this six month assignment, if desired, the resident may spend one half day each week in a preceptorship in the office of a Family Physician or in the office setting of a group Practice of Family Physicians.

In addition to the informal teaching rounds and conferences on each service, a daily didactic conference designed primarily for the family practice trainee is given by various members of the house staff and attending staff.

This residency program is affiliated with The State University Rutgers Medical School, New Brunswick, New Jersey.

FUNDING: All costs of this program are paid by the Hunterdon Medical Center.

DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Southside Hospital Family Medicine Residency Program

SITE: Southside Hospital

Montauk Highway

Bay Shore, New York

DATE OF OPERATION: August 1, 1972

DIRECTOR: Melville G. Rosen, M.D., ABFP

FACULTY: Family Physicians, board certified or eligible on staff at Southside Hospital. Specialists on staff, board qualified at Southside Hospital. All above with clinical appointments at medical school (SUNY at Stony Brook). All faculty will act as consultants, teachers and resource personnel. DME at hospital.

RESIDENTS: Positions available:

First Year	4	-- $10,000
Second Year	4	-- $11,500
Third Year	4	-- $12,500

Identity retained.
No. residents completing program: None

MODEL: The family practice unit is located 3½ miles from the Hospital. Hospital is under contract with county health department to deliver comprehensive family health care. Two full time Family Physicians. Consultation clinics for referral from Family Physicians who are residents. 5,400 square feet in unit. Allied health personnel including public health nurses to carry out "health care team" approach. Problem oriented records used. Computer available.

PATIENTS: Ambulatory -- Accepted from community without restriction. Sliding fee schedule, plus third party coverage. Fees go to county general fund. Hospital will be reimbursed as per contractual agreement. Resident will have specific families assigned for continuing responsible health care.

Hospital -- All patients of faculty available for resident care. Resident's patients admitted by resident. Other patients assigned by teaching staff.

Institutional -- Hospital has its own extended care facility. Resident will be exposed to community agencies such as: Health Department, Social Welfare Department, drug abuse facilities. Central Islip State Hospital for psychiatric training, Brookhaven National Lab (Atomic Energy Commission facility affiliated with University), etc.

TRAINING: The family practice resident will spend blocks of time in the various essential clinical disciplines, depending on their individual needs. Family assignments at the family practice unit will range from 25 families in the first year to about 150 families in the third year. Regular conferences and seminars held weekly. Medical students participate in the training as well as allied health personnel, both outpatient and inpatient.

FUNDING: At present, the hospital is assuming full responsibility for funding the program, except for those members of the faculty including the program director who are paid by the medical school. Federal grant funding has been applied for.

DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency, Deaconess Hospital

SITE: The Family Practice Center

840 Humboldt Parkway

Buffalo, New York 14211

DATE OF OPERATION: July, 1969

DIRECTOR: Ernest R. Haynes, M.D.

FACULTY: Twenty part-time Family Physicians. Chiefs of departments and specialists in all disciplines. Selected faculty (part-time) from State University of New York at Buffalo. Public health nurse, social worker, administrator plus ancillary personnel.

RESIDENTS: Positions available:

First Year	8	-- $9,500
Second Year	8	to
Third Year	8	-- $10,500

Identity retained.
No. residents completing program: Three

MODEL: The Family Practice Center is located two blocks from Deaconess Hospital and has 8 consultation rooms, examining and treatment rooms, x-ray, lab, seminar rooms, library and offices for health related professionals. Also, there is access to IBM 360-20 computer.

PATIENTS: Ambulatory -- Resident is assigned 50 plus families who are representative of a wide socieconomic group.

Hospital -- Residents responsible for own patients on all services with supervision.

Institutional -- Extended care facilities include Childrens Hospital and Psychiatric Service.

TRAINING: The family practice resident spends approximately 15% of his first year in the model family practice unit, 70% in the second year and 50% in the third year. Residents are responsible for providing continuing comprehensive care. Rotation through the clinical disciplines totals approximately 20 to 24 months of the three year training program and is quite flexible to fit needs and aspirations of future Family Physicians. Master's degree program in Epidemiology available as elective. Preceptorships: assignment to specialty offices. Research: residents are encouraged to complete original project within broad field of family medicine.

There are daily seminars involving all disciplines and other health professionals; resident rounds, Family Practice Grand Rounds, Journal Club.

FUNDING: This program is funded by Deaconess Hospital, Regional Medical Programs of western New York, and fee for service.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Wilson Memorial Family Practice Residency

SITE: Family Health Center

33 - 57 Harrison Street

Johnson City, New York 13790

DATE OF OPERATION: July 1971

DIRECTOR: Stanley L. Erney, M.D., ABFP

FACULTY: 1 full time Director, 1 half-time medical coordinator, 6 part-time preceptors, allied health professionals on the staff of the unit include 2 psychiatric social workers, 1 nurse practitioner, 1 health educator, 1 RN, 1 accredited record technologist, 2 medical office assistants, receptionist.

RESIDENTS: Positions available:

First Year	4	-- $8,800
Second Year	4	to
Third Year	4	-- $10,000

Identity retained.
No. residents completing program: None

MODEL: The Family Health Center is located 2 blocks away from the hospital with complete facilities simulating a physician's office. The unit is designed to function as a small group practice composed primarily of family physicians but with consultants scheduled to come into the unit on a regular basis. The unit contains 6 examining rooms, 1 treatment room, 5 offices including a special interviewing office with one-way mirror, business station, room equipped with IBM MTST, EKG-Audiometry room, record room, conference room and library.

PATIENTS: Ambulatory -- A cross-section of patients are accepted and no restrictions as to type have been indicated at this early stage. Coverage for patients of the Family Health Center is provided at all times. The program director and private family physicians in the community provide full time supervision for the residents.

Hospital -- Residents admit patients to all services and are responsible for their continuing medical care.

Institutional -- Broome County Nursing Home, Broome County Mental Health Clinic, State University of New York at Binghamton, N.Y., Broome Community College.

TRAINING: The family practice resident spends 10% of his first year in the Family Health Center, 50% second year and 100% third year. Time spent during training in rotational assignment to classical specialty oriented inpatient services: Internal Medicine 7 months; Surgery 2 months; Pediatrics 4 months; Ob-Gyn 2 months; Emergency Room 1 month; Electives 2 months.

Scheduled conferences are integrated with clinical assignments including: Basic Science Seminar, Journal Clubs, CPC and Mortality Conferences. Daily conferences are held in the unit to discuss health care delivery, organizational problems and direct patient problems.

FUNDING: This program is funded through hospital budget supplement and fees for services.

AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Medicine Program

SITE: Highland Hospital

South Avenue at Bellevue

Rochester, New York 14620

DATE OF OPERATION: July 1968

DIRECTOR: Eugene S. Farley, Jr., M.D., ABFP

FACULTY: 5 Family Physicians, 2 specialists, 1 psychologist, 9 administrative staff, dietitian and social worker available, 7 ancillary personnel.

RESIDENTS: Positions available:

First Year	6	-- $8,000
Second Year	6	to
Third Year	6	-- $9,000

Identity retained.
No. residents completing program: Eleven

MODEL: The Family Practice Clinic is a self-contained unit with 20 examining rooms and offices, a distinct medical record system, clinical laboratory, medical library, conference room, and group therapy facilities.

PATIENTS: Ambulatory -- 2,500 families from various socioeconomic levels.

Hospital -- Residents will follow own patients when on Family Medicine service or when on other specific specialty services.

Institutional -- Extended care facilities include St. John's Home, Well Baby Clinics, School Health Program, Migrant Farm Workers' Health Program, Public Health Department.

TRAINING: The family practice resident will spend two months during his first year in the Family Practice Clinic acquiring his panel of patients. While on hospital services, he will spend 4 to 6 hours per week seeing patients in the model unit. During the third year the resident will spend four months in the model unit in the role of "chief resident" practicing as a member of the group and also having responsibility for part of the teaching program. Medical students participate in the training.

Approximate amount of time spent in clinical rotation is as follows: Internal Medicine 33%, Surgery 8%, Pediatrics 26%, Ob-Gyn 8%, Psychiatry 10%, Elective 15%. Continuity and integration in these fields is provided throughout the three year period by the Family Medicine Program. This program offers flexibility to meet the requirements of the individual residents.

There are teaching conferences on specific clinical topics; instruction in the organization of medical care; and utilization of community resources.

FUNDING: This program is funded by Highland Hospital, U.S. Public Health Service grant, the Health Department, University of Rochester School of Medicine and fees for services.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Department of Family Practice

SITE: State University of New York Upstate Medical Center

St. Joseph's Hospital Health Center

301 Prospect Avenue

Syracuse, New York

DATE OF OPERATION: February 8, 1969

DIRECTOR: Francis S. Caliva, M.D.

FACULTY: Supervision of residents comes from three sources: 1) A preceptor is assigned for each half day per week. He is usually a practicing Family Physician who volunteers his time; 2) Charts are audited by a team consisting of an internist, pediatrician and obstetrician-gynecologist and 3) Specialty clinics and practitioners are called on as appropriate.

RESIDENTS: Positions available:

First Year	9	-- $9,700
Second Year	9	--$10,400
Third Year	9	--$10,900

Identity retained.
Number of residents completing program: Eight.

MODEL: The model family practice unit is a separate area within the St. Joseph's Hospital Center. The unit contains 12 examining rooms, a business office, nurses' station, conference room, reception area, 4 offices for administrative purposes, 4 offices for residents, EKG, and a small laboratory.

PATIETNS: Ambulatory -- The number of assigned families varies with the year of the residency, peaking in the second year when the resident is responsible for 50 younger families and 25 geriatric families. In the third year the resident limits his care to only 20 of these families so that he may devote more time to inpatient experience.

Hospital -- Residents follow own patients.

Institutional -- Public Health Department nursing home, St. Mary's Hospital.

TRAINING: The family practice resident learns to work closely with community agencies and with other professionals such as social workers, public health nurses, psychologists, medical assistants and health planners. The resident practices as captain of this health team and assumes primary responsibility for the total care of his assigned families.

The inpatient experience varies each year depending on the amount of time spent in the family practice model. Thus in the first year, when the resident spends only about 10% of his time in the model, he functions on the hospital ward as a rotating intern, gaining experience in medicine, surgery, pediatrics, obstetrics and the emergency room. In the second year when the majority of his time is spent in the model, he also functions as an assistant resident. His assignments include inpatient medicine and pediatrics, outpatient medicine and community medicine. The latter includes a unique experience at a rural satellite clinic in which the resident practices rural medicine under the guidance of a preceptor and an opportunity to see an extended care facility in operation. He also spends one rotation (2 months) in charge of a busy obstetrical service at St. Mary's Hospital, an affiliated maternity institution that has no specialty residents. In the third year a majority of his time is spent on inpatient services and he serves as chief house officer on medicine and pediatrics.

Throughout the three years there is one afternoon a week devoted to teaching sessions oriented toward the specialty of Family Practice. These include didactic sessions of various medical topics, psychiatric sessions and sessions on community health. The residents also attend the conferences of the specialty service to which they are assigned. In addition, there is a monthly postgraduate program for family physicians which the family practice resident is free to attend.

FUNDING: This program is funded by St. Joseph's Hospital and state funds.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency/affiliated University of North Carolina School of Medicine

SITE: Moses H. Cone Memorial Hospital

1200 North Elm Street

Greensboro, North Carolina 27405

DATE OF OPERATION: July 1969

DIRECTOR: William B. Herring, M.D.

FACULTY: Members, University Medical Services (42), including Family Physicians and specialists in all disciplines, social workers, and administrative staff.

RESIDENTS: Positions available:

First Year	6	-- $9,000
Second Year	4	to
Third Year	4	-- $11,500

Identity retained.
No. residents completing program: Four

MODEL: The Family Medicine Clinic is located in the Guilford County Health Department adjacent to the hospital. It contains a waiting area, combined reception room and clerical office, administrative office, office for nurses and medical stenographer, two doctors' offices with space to permit four doctors to dictate simultaneously. There is an auxiliary lab room used for speciman collection and electrocardiogram. The unit has nine examination rooms including an endoscopy and minor surgery room. Total floor space of the MFPU is 4,800 square feet. A pharmacy is located in the same building.

PATIENTS: Ambulatory -- Approximately 9,000 families are eligible for care in the Family Medicine Clinic mostly representing medically indigent population.

Hospital -- Patients requiring admission will usually be admitted to resident's own inpatient service. Inpatients are assigned specifically to Family Practice resident.

Institutional -- Utilization of community resources including Giles County Health Department, nursing and convalescent homes.

TRAINING: The first year of family practice residency training consists of six months on the Medical Teaching Service and six months on the Pediatrics Teaching Service. One rotation (two months) in each period is elective. Electives include medicine and pediatrics in addition to those available to the third year resident (see below). Two afternoons per week the intern spends in the Family Medicine Clinic. Here he sees in follow-up patients he has previously attended as inpatients, or members of families registered with the Family Medicine Clinic.

The junior assistant resident (second year) in family medicine spends one three-month period on each of the two Medical Teaching Services and two three-month periods on the Pediatric Teaching Service. A teaching service team comprises an intern, one or two active interns (senior medical students), the JAR and an Attending Physician from the part-time faculty. JAR has responsibility for the diagnostic work-up and management of all service and private patients assigned to his Service. He is responsible to the Attending Physician for his service patients and for the private patients of the Attending Physician. JAR is on call for inpatient emergencies on the Medical Teaching Services every second or third night. When on call, he spends some time in the Emergency Room under supervision of ER physician.

The objective of the senior assistant residency is to complement the experience of the family medicine resident in those areas that are expected to be of particular importance to him in the practice of his specialty. Accordingly, the third year is entirely elective and consists of six two-month rotations to be selected from the following: psychiatry, community medicine, obstetrics-gynecology, cardiology, dermatology, ophthalmology, otolaryngology, pathology (clinical or anatomic) and radiology. Other electives than those listed will be arranged to satisfy special needs. In all clinical electives the care of ambulatory patients is emphasized. The senior assistant resident continues his office hours in the Family Medicine Clinic throughout his third year.

There are approximately 7 hours of conferences and rounds per week throughout training.

FUNDING: This program is funded by the Moses H. Cone Memorial Hospital, state funds through the University of North Carolina and a Public Health Service training grant for family medicine effective July 1, 1972.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency

SITE:
Charlotte Memorial Hospital
1000 Blythe Boulevard
Charlotte, North Carolina

DATE OF OPERATION: July 1, 1973

DIRECTOR: Bryant L. Galusha, M.D.

FACULTY: Full time Director of Medical Education who serves as Director of Program. Full time Chairmen of participating departments of Medicine, Pediatrics, Ob-Gyn, and General Surgery. Large appointed volunteer staff representing Family Practice and all specialties.

RESIDENTS: Positions available:

1st year (Intern)	3	-- $ 8,700
2nd year (1st yr. resident)	3	-- $ 9,600
3rd year (2nd yr. resident)	3	-- $10,020

Identity retained.
No. residents completing program: None

MODEL: Initially will be housed in Charlotte Memorial Hospital. Modern suite (covering 3,366 sq. ft.) includes nursing station, laboratory, 7 examining rooms, and waiting room area. Convenient to all of hospital's central services.

PATIENTS: Ambulatory -- Patients will be the selected families from the present indigent and part-pay clinic population. Other sources of patients will include the families of hospital employees and referrals from overburdened practicing family physicians.

Hospital -- The members of the families incorporated into the residency program will receive their inpatient care by the family practice residents.

Institutional -- Center for Human Development, County Mental Health Clinic, City-County Health Department, and an affiliated long-term care hospital.

TRAINING: The approximate over-all composition of the three years of training will be as follows: Internal Medicine 45%, Pediatrics 25%, Psychiatry 6%, and 24% divided according to desire and need between Surgery, Ob-Gyn, ENT, Dermatology and Community Medicine. After the initial year (intern year) a significant portion of the resident's time will be allotted to the family practice unit.

FUNDING: The major source of funding will be income derived from the Hospital's over-all patient revenue. Other income will include outpatient charges in the Model Family Unit. Partial salary support for the Director of the Program will be requested from the Division of Education and Research in Community Medical Care of the University of North Carolina.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency

SITE: Akron City Hospital

525 East Market Street

Akron, Ohio 44309

DATE OF OPERATION: Approved as Family Practice Residency, October 18, 1970

DIRECTOR: Edward J. Shahady, M.D., ABFP

FACULTY: Twenty-five Family Physicians and representatives of all other specialties, dieticians and administrative staff, most of whom have some patient care or teaching contact with Family Practice residents during the three year program.

RESIDENTS: Positions available:

First Year	4	-- $9,000
Second Year	4	to
Third Year	4	-- $10,000

Identity retained.
No. residents completing program: One

MODEL: The Family Practice Center is a remodeled residence quarters with spacious waiting room, business area, 6 examining rooms, one minor surgery and treatment room, a laboratory, an office for the Director and residents and a large conference room.

PATIENTS: Ambulatory -- 1,170 families demographically representative of the area.

Hospital -- Follows own patients as well as receiving inpatient experience on rotation.

Institutional -- Fallsview Mental Health Center, nursing homes.

TRAINING: The family practice resident spends one afternoon a week during the first year in the Family Practice Center, two afternoons a week during the second year and 50% to 70% of time during the third year. The unit functions the same as any group practice from a financial and patient point of view. The emphasis is on continuous, comprehensive care to families and all personnel within the unit are geared to constantly deliver this type of care. Rotation through clinical disciplines on block assignments:

Internal Medicine - four months first year, five months second year; Surgery - two months first year, one month in emergency room; Pediatrics - two months first year, one month in Emergency Room, three months in second year; Ob-Gyn - two months first year, two months second year; Psychiatry - one to two months Fallsview Mental Health Center on ambulatory patients; Electives - one month in first year, two months in second year may be spent on any of the specialty or subspecialty services desired in addition to a community medicine elective, third year electives available during entire year.

Preceptorships may be spent with physicians in any specialty throughout the final year one to two afternoons a week for a one to two month period. Residents are encouraged to choose their area of eventual practice by the end of their second year and then spend four to six weeks with a Family Physician in that area.

FUNDING: This program has been financed through an initial loan from the hospital and fees for services.

AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: West Side Family Practice Center

SITE: Akron General Hospital

400 Wabash Avenue

Akron, Ohio 44307

DATE OF OPERATION: January 22, 1971

DIRECTOR: John P. Schlemmer, M.D., ABFP

FACULTY: 16 Family Physicians, 18 internists, 12 obstetrician-gynecologists, 3 pediatricians, 8 surgeons, 4 psychiatrists, 15 allied health personnel.

RESIDENTS: Positions available: First Year 2 -- $9,100
Second Year 2 to
Third Year 2 -- $10,600
Identity retained.
No. residents completing program: None

MODEL: The Family Practice Office is a separate unit adjacent to the hospital. Each patient area has 3 exam rooms, treatment room and consultation room. There is a single nurses station containing small lab and facilities for drugs on the main floor. The Director's office is attached to the facility. X-ray and physiotherapy facility are located in hospital.

PATIENTS: Ambulatory -- Families are assigned. First year 15-20 families per resident; second year 30-35; third year 60 families.

Hospital -- Separate bed facilities.

Institutional -- Welfare agency and extended care facilities.

TRAINING: The family practice resident spends one four-hour period per week during the first year in the family practice model unit. The remaining portion of his first year is spent in rotation through the clinical disciplines on block assignments. The resident spends three four-hour periods per week during the second year in the model unit and half of his time during the third year. Throughout his training he spends approximately 9 months in Internal

Medicine, 5 months in Ob-Gyn, 5 months in Pediatrics, 2 months in Surgery, 3 months in Psychiatry, 1 month in Community Medicine, 1 month in Emergency Room, 8 months Electives. There are weekly conferences of clinical services when assigned to that service - CPC, tumor, family practice and others.

FUNDING: The Family Practice Center has been underwritten by the Board of Trustees who have entered into a contract with the Director. The program will be supported by fee for services.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency

SITE: Grant Hospital
309 E. State Street
Columbus, Ohio 43215

DATE OF OPERATION: Approved as Family Practice Residency, October 18, 1970

DIRECTOR: Andrew J. Pultz, M.D.

FACULTY: Full time Director of Medical Education, specialists in all disciplines, most of whom hold teaching appointments at Ohio State University, four full-time pathologists, five full time radiologists.

RESIDENTS: Positions available:

First Year	4 --	$8,100
Second Year	4 --	$9,100
Third Year	4 --	$10,100
Fourth Year	4 --	$12,000

Identity retained.
No. residents completing program: None

MODEL: The model family practice unit is on the first floor of the old hospital building. There is a front entrance on the street level for ambulatory patients and a ramp from the street level extending into the waiting room for wheelchair patients. The unit resembles a group of practicing physicians' offices and in no way resembles an outpatient department. Each resident's consultation room has a large well-equipped examining room on either side. The unit also includes a laboratory, senior resident's office, two large waiting rooms, rest rooms and a business office.

PATIENTS: Ambulatory -- Patients are accumulated in the Family Practice office with 1st-year residents being expected to acquire 10-15 families, 2nd-year will acquire up to 35 families, 3rd-year up to 50 families--all selected from mixed socioeconomic levels.

Hospital -- Inpatients are assigned by random rotation to Family Practice residents. These patients are selected from all areas of the hospital and there is no separate bed or economic distinction.

Institutional -- Patients in this category are acquired from the Franklin County Health Department, the Columbus State Mental Hospital and the Harding Psychiatric Hospital. Other areas of institutionalized patients may be involved according to the resident's needs.

TRAINING: The family practice resident will spend 10% of his time (one-half day/wk.) during the first year in the model family practice unit, 10% of his time on urgent and emergency appointments and 80% of his time in rotation through the conventional clinical disciplines, as follows: Internal Medicine 4 mos., Pediatrics 3 mos., Ob-Gyn 2 mos., Psychiatry 2 mos., Emergency Room 1 mo. During the second year the resident will spend 10% of his time on urgent and emergency appointments, 30% (3 half-day/wk.) in the Family Practice Unit and the remaining 60% of his time is spent as follows: 2 mos. eye, 2 mos. ENT, 2 mos. anesthesiology and cardiopulmonary resuscitation, 2 mos. surgery, 1 mo. Public Health.

During the third year the resident will spend 10% of his time on urgent and emergency appointments, 60% in the Family Practice Unit (6 one-half days/wk.) and 30% in active practice.

Conference are held 10 hours weekly. Night rotation on every fourth night, two week-ends per month.

FUNDING: This program is financed by Grant Hospital and fees for services.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency

SITE: Good Samaritan Hospital

1425 West Fairview Avenue

Dayton, Ohio 45406

DATE OF OPERATION: July 1, 1972

DIRECTOR: Douglas R. Longenecker, M.D., ABFP

FACULTY: Full-time director, four part-time Family Physician faculty, 25 volunteer Family Physicians in addition to the teaching departments of Ob-Gyn, Internal Medicine, Surgery, Pediatrics, and Psychiatry.

RESIDENTS: Positions available:

First Year	3	-- $12,600
Second Year	3	-- $12,900
Third Year	3	-- $13,200

MODEL: The present Family Practice Center is located across the street from the hospital in the hospital owned apartment building. Present facilities include 4 examining rooms, laboratory, conference room, business office and waiting room. New, larger facilities are to be complete in fall of 1973 in a new hospital owned multi-specialty office building adjacent to the main hospital.

PATIENTS: Ambulatory -- Patients are referred from directors former private practice, hospital emergency room and private physicians and County Medical Society. All socioeconomic levels are represented.

Hospital -- Admissions from the Model Family Practice Center will be on a separate inpatient Family Practice Service coordinated by the director with rotating attending physicians.

Institutional -- Patients will be followed in private extended care facilities as indicated by good patient care. Rotations through the various public health department agencies will be employed.

TRAINING: The family practice resident will spend 10% of his first year in the Model Family Practice Center, the remaining 90% will be spent in rotation through the other specialty areas. The third year resident will spend 80% of his time in the Model Family Practice Center with the remaining 20% of his time in electives and inpatient services.

Over-all, the basic training for three years will include 11 months on Medicine, 5 months Pediatrics, 3 months Ob-Gyn, 5 months Surgery, 6 months Family Practice, 2 months Psychiatry and weekly continuing conferences, 4 months electives. This format is extremely flexible to allow for individual needs and variations.

Daily conferences for patient care are held in addition to twice weekly didactic lectures, weekly specialty rounds and monthly evening general discussions.

FUNDING: This program is funded through financial support from Good Samaritan Hospital and fee for services.

DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Miami Valley Hospital Family Practice Center

SITE: One Wyoming Street

Dayton, Ohio 45409

DATE OF OPERATION: July 1, 1972

DIRECTOR: R. K. Bartholomew, M.D.

FACULTY: Full time, part-time and voluntary in all major clinical disciplines, selected subspecialties and full time in Roentgenology, Pathology, and Nuclear Medicine.

RESIDENTS: Positions available:

First Year	3	-- $10,550
Second Year	3	-- $11,183
Third Year	3	-- $11,500

Identity retained.
No. of residents completing program: None

MODEL: The Family Practice Center is on hospital property in the former Research Building located between Nursing School and Residence and Parking Garage and 360 feet from main entrance to hospital. Total area is 4,000 square feet with an additional 1,000 square feet available when necessary. It contains a Director's office, business offices (3), waiting room, library-conference room, 6 exam rooms, nurses station, laboratory, drug storage room, office supplies and records storage room, etc.

PATIENTS: Ambulatory -- Patients are assigned to the resident in relation to his level of training and time available. It is projected that each resident at the third year level will have approximately 250-300 families for whom he and his peers are responsible for continuous comprehensive primary care.

Hospital -- Patients are admitted to the Family Practice inpatient service under the name of the Directors and resident involved. If a transfer from Family Practice to another service occurs, the involved resident continues his role as primary physician. The family practice inpatient service is all inclusive.

Institutional -- Utilization of community resources.

TRAINING: The family practice resident spends 10% of his time in the Family Practice Center at the first year level, 30% at the second year level and 80% at the third year level. Time spent in hospital on rotation through the clinical disciplines on block assignments: Internal Medicine 12 months; Surgery 4 months; Pediatrics 7 months; Ob-Gyn 4 months; Psychiatry is ongoing in all disciplines throughout the entire three years of the program; Electives 6 months; Emergency Department 1 month.

Conferences and extra-mural assignments: Weekly Family Practice Grand Rounds, Problem-Oriented Record Review, Monthly Business Conference and Journal Club Conferences of Clinical Disciplines, when on respective rotation assignments, Planned Parenthood Clinic bimonthly, Drug Addition Clinic variable. The family practice resident attends the formal psychiatric course at the hospital for two hours one evening a week for three months each year. This is under the direction and participation of the faculty in psychiatry.

FUNDING: This program is financed through a separate Family Practice Center account within the hospital financial structure.

DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: St. Elizabeth Center of Family Practice

SITE: 224 North St. Clair Street

Dayton, Ohio 45402

DATE OF OPERATION: January 1, 1972

DIRECTOR: William A. Stowe, M.D., ABFP

FACULTY: Full time staff in Medicine, Cardiology, Family Medicine, Pediatrics and Ob-Gyn attending in all areas.

RESIDENTS: Positions available: First Year 6 -- $12,000
Second Year 6 -- $13,500
Third Year 6 -- $15,000
Identity retained.
No. residents completing program: None

MODEL: St. Elizabeth Center of Family Practice is a 7,000 square feet ground floor facility located in downtown Dayton separate from the St. Elizabeth Medical Center by 1¼ miles. The offices are composed of 10 examination rooms, 4 consultation rooms, library and conference room. Ancillary automated history, audio and visual screening. Cardiology, x-ray and laboratory, the necessary reception and business office facilities and toilets for patients and staff.

PATIENTS: Ambulatory -- 50 families 1st year; up to 150 families by 3rd year; families from all socioeconomic levels.

Hospital -- Inpatients are generated by necessary admissions from the practice and resident is wholly responsible for their care during hospitalization.

Institutional -- Public health, nursing homes, welfare department.

TRAINING: The family practice resident spends 42% of his training in family practice training, 7% in Internal Medicine, 6% in Surgery, 7% in Pediatrics, 7% in Ob-Gyn, 4% in Psychiatry, 17% in electives, 10% in conferences. Research projects applicable to behavioral sciences and evaluation of procedures of practice to improve health care delivery are assigned to the residents.

Preceptorship training: Second year residents spend time with practicing physicians, on a short time basis 1 to 2 weeks, twice a year; third year residents exchange time with practicing family physician to be arranged as feasible.

Residents prepare CPC and present the case at the conference. They present case histories and patients for grand rounds. Residents expected to attend all conferences except when on emergency problem or in the delivery suite.

FUNDING: This program is being financed through an initial subsidy by St. Elizabeth Medical Center and fee for services.

AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency

SITE: Mercy Hospital

Jefferson & 22nd Street

Toledo, Ohio 43624

DATE OF OPERATION: July 1, 1972

DIRECTOR: Atilla M. Yetis, M.D.

FACULTY: 1) Three full time and other voluntary members of the Department of Internal Medicine; 2) Twelve attending Family Physicians; 3) Full time Directors of approved residencies and other faculty members including representatives of Surgery and Pediatrics.

RESIDENTS: Positions available:

First Year	4 --	$9,600
Second Year	4 --	$10,200
Third Year	4 --	$10,800

Identity retained.
No. residents completing program: None

MODEL: The Family Practice Group is located in the Nursing School of Mercy Hospital and is arranged as a private office. Model is located separately around the private offices of members of the teaching faculty. The model contains Director's and secretary's office, 5 exam rooms, waiting and receptionist area, laboratory for basic tests and microscope.

PATIENTS: Ambulatory -- Provided by: (a) families of the Model Unit; (b) families of Mercy Hospital Family Center and two Migrant Health Centers.

Hospital -- The resident is able to admit patients to the Hospital on any service like any other practicing physician. All admitted patients are utilized in teaching.

Institutional -- Nearby convalescent centers and extended care facilities provide further experience.

TRAINING: Ambulatory training is performed at the Model Unit under supervision and inpatient training at the Hospital. Training in conventional clinical disciplines on block assignments: Internal Medicine 4-6 months yearly; Surgery 2 months first year, elective thereafter; Ob-Gyn 3-4 months, first and second year, or elective third year; Pediatrics 3 months during first year, elective second and third years; Psychiatry 3 hours per week during three years, also as elective third year; electives are offered 4 months in second year and 8 months in third year. Third year is designed in a flexible manner to suit the training requirements of the resident. All during the 12 months of the third year, which will be broken down to his requirements, the resident will continuously see his model patients on two mornings per week basis.

Residents will be actively involved in conferences, mostly during rotation in Internal Medicine, and each will be given a research project to be completed during the three year program.

FUNDING: This program is fully financed by Mercy Hospital.

TITLE: Family Practice Residency Program

SITE: University of Oklahoma Family Medicine Clinic

1600 Phillips

Oklahoma City, Oklahoma 73104

DATE OF OPERATION: Approved as Family Practice Residency, April 24, 1971

DIRECTOR: Roger I. Lienke, M.D.

FACULTY: Four full time Family Physicians; part-time internist, radiologist; Director, Co-Director, Psychiatrist (half-time daily); consultants, orthopedist, five Family Physicians, business manager and director of physician's assistants in the office. The faculty for the first year residents are the specialists on the various inpatient services.

RESIDENTS: Positions available: First Year 6 -- $8,500
Second Year 6 to
Third Year 6 -- $10,000
Identity retained.
No. residents completing program: None

MODEL: The University Family Medicine Clinic is located one block from the Medical School. This unit has twenty complete examining rooms, two all-purpose emergency-treatment rooms, x-ray, laboratory, intercom system, business office, signal lights, music.

PATIENTS: Ambulatory -- Patients from all socioeconomic groups receive health care in this demonstration practice. (15,000 patients) The Family Medicine Clinic also manages the "service" patients of one of the affiliated private hospitals (Mercy) in a family-medicine style.

Hospital -- Family Medicine residents continue the care of their patients into the hospitals. A resident may elect to do extra work on hospitalized patients other than his own with one or more of the attending faculty.

Institutional -- The family practice resident learns how to use and coordinate all the medical and surgical specialties as well as the various health agencies and services available throughout the city.

TRAINING: The family practice resident spends a major portion of his time in the last two years of training in the Family Medicine Clinic (approximately 70%). The resident renders comprehensive and continuous care of his own patients in the office and hospital. The training system intentionally demonstrates the advantages of sharing responsibilities, opportunities and night duty with other family doctors in the clinic. Functioning as a junior partner, the resident will naturally be exposed to all aspects of office management and business procedures.

A primary feature of the Oklahoma program is that the resident, like a private practitioner, is on all inpatient services at all times. This is different from the traditional method of rotating the trainee through selected specialties one at a time.

The schedule permits individualized study in such activities as electrocardiography, anesthesiology, radiology, the operating room, grand rounds, speech and hearing conferences, community health agencies or any area of special interest or need.

FUNDING: The program is funded on the fee-for-service basis.

ROGER LIENKE, M.D.

DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency

SITE: Division of Family Practice

University of Oregon Medical School

Portland, Oregon 97201

DATE OF OPERATION: Approved as Family Practice Residency, August 31, 1971

DIRECTOR: Laurel G. Case, M.D., ABFP

FACULTY: Full time Assistant Professor, half time Psychiatrist, Assistant Clinical Professor of Family Practice (volunteer). Approximately 60 practicing Family Physicians are appointed as clinical instructors in family practice (volunteer). All of the remaining faculty of the School of Medicine available.

RESIDENTS: Position available:

First Year	4	-- $8,599.92
Second Year	4	to
Third Year	4	-- $9,799.92

Identity retained.
No. residents completing program: None

MODEL: The fourth floor of the outpatient clinic is utilized as the family practice clinic. Plans are established for the model family practice office to occupy a separate building adjacent to the hospital after remodeling.

PATIENTS: Ambulatory -- Approximately 1,000 families including a broad socioeconomic spectrum.

Hospital -- University hospital beds assigned to division of family practice.

TRAINING: The family practice resident spends 10% of his first year in the model family practice unit. The remaining portion of his first year is spent in rotation through the clinical disciplines on block assignments. The time in the model unit is increased to 20% the second year and 50% the third year. Internal Medicine 24% + electives, Surgery 14% + electives, Pediatrics 14% + electives, Ob-Gyn 8% + electives, Psychiatry, integrated into family practice throughout entire three years, electives 11%, conferences and extramural assignments 2%.

University of Oregon
Portland, Oregon

FUNDING: This program is funded by the Oregon State Board of Higher Education.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency

SITE:
Department of Family & Community Medicine
Milton S. Hershey Medical Center
500 University Drive
Hershey, Pennsylvania 17033

DATE OF OPERATION: July 1971

DIRECTOR: Thos. L. Leaman, M.D., ABFP

FACULTY: All members of Department of Family & Community Medicine, clinical department of Medical Center - 7 full time, 13 part-time.

RESIDENTS: Positions available:

First Year	3	-- $8,200
Second Year	3	to
Third Year	3	-- $9,500

Identity retained.
No. residents completing program: None

MODEL: The central model family practice unit is located in one portion of the Department of Family & Community Medicine, Clinical Sciences Building, Milton S. Hershey Medical Center and contains a waiting room, large secretarial area, 8 exam rooms, 2 nurses labs, 4 office areas. Since the MFPU has outgrown this particular area, the Director's office and another large secretarial area are located down the hall from the MFPU.

The second unit (Family Community Medicine East) is located half a block from the main hospital complex and contains 8 exam rooms, 2 doctors' offices with an exam table in each, 1 large nurses station, waiting room and secretarial office, 2 consultation rooms.

PATIENTS: Ambulatory -- Family practice residents are assigned families to whom they render primary care within the Department and under the supervision of the department members. The resident continues to care for his patients in the Department on a regular basis regardless of the service to which he is assigned. The more advanced the resident is in his training, the more families are assigned to him.

Hospital -- Family and Community Medicine Department members and residents have admitting privileges to medicine and pediatrics.

TRAINING: The family practice resident has a continuing experience throughout training in the Department of Family and Community Medicine providing primary care to assigned families in the model unit and in-hospital. Time devoted to training in traditional clinical disciplines: Internal Medicine 9 months; Surgery 4 months; Pediatrics 4 months; Ob-Gyn 2 months; Psychiatry 1 month; Electives 6 months.

Resident attends seminars appropriate to the various specialty disciplines to which they are assigned. One hour each week during the entire three years is spent with family practice residents and the members of the Department of Family & Community Medicine in discussing the residents' assigned families. The format is variable but basically involved is discussion of the family setting, of the individual patient problems and plan for management. Residents may elect a preceptorship in the third year residency.

FUNDING: This program is funded by an initial gift from the estate of M. S. Hershey and fees for services.

DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency Program

SITE: Lancaster General Hospital

555 North Duke Street

Lancaster, Pennsylvania 17604

DATE OF OPERATION: July 1, 1970

DIRECTOR: Nikitas J. Zervanos, M.D., ABFP

FACULTY: Two full time and two half time teachers in family and internal medicine. Full ancillary personnel: six dietitians, public health nurse, chaplain. Seventy members of hospital staff and behavioral science faculty from local colleges.

RESIDENTS:

Positions available:			
	First Year	6	-- $7,700
	Second Year	6	to
	Third Year	6	-- $8,400

Identity retained.
No. residents completing program: None

MODEL: Two ambulatory settings: (1) Family Health Service Program located in Outpatient Department, Lancaster General Hospital, which includes reception area, waiting room, children's playroom, nurses station, administrative offices, consultation and examination rooms and adjoining specialty clinics and conference room; (2) Southern Lancaster County Family Health Center, located in southern Lancaster County in a completely rural setting fifteen miles from the hospital consisting of a reception area, business offices, nurses treatment room, consultation and examining rooms, as well as adjoining lab and library-conference room.

PATIENTS: Ambulatory -- First year resident is responsible for primary care of 25-30 families, second year additional 75-100 families per resident. Patients represent entire socio-spectrum found in most American communities.

Hospital -- Resident's patients admitted on family practice service.

Institutional -- Any extended care facility in the area is available for family practice residents.

TRAINING:	The family practice resident spends 10-15% of his first year in the Family Health Service increased to a minimum of 50% of time spent in ambulatory care during the second year. The resident learns to work within a group practice setting. The third year offers the resident opportunities to pursue his special interests and is entirely elective. Time spent during training in rotation through the clinical disciplines on block assignments: Internal Medicine 40%, Pediatrics 16%, E.R./Surgery 8%; Psychiatry 12%; Community Medicine and Electives 16%; Ob-Gyn 8%. This program is affiliated with the Hershey Medical Center. During each week of the three-year period the resident attends Postgraduate Continuing Education Conference, Medical Grand Rounds, specialty conferences. In addition, the resident attends seminars in the behavioral sciences, seminars on the organization and management of practice as well as conferences on ambulatory patient care. The resident is encouraged to do research.
FUNDING:	This program is funded by hospital education funds plus fees for services.

DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Hahnemann Hospital Family Medicine Residency Program

SITE: Hahnemann Medical College and Hospital

Philadelphia, Pennsylvania 19102

DATE OF OPERATION: July 1, 1973

DIRECTOR: Robert H. Seller, M.D., ABFP

FACULTY: Full time medical school faculty members of the Department of Family Medicine and Community Health. Also full time faculty members representing all other medical and surgical specialties and volunteer staff members who have faculty appointments in the Medical School.

RESIDENTS: Positions available:

First Year	4 @ $10,800
Second Year	4 @ $10,800
Third Year	4 @ $11,500

Identity retained.
No. residents completing program: None

MODEL: A large Model Practice Unit is located in the Hahnemann Professional Offices which is located within the University-Hospital complex. It is associated with a Health Maintenance Organization composed of 10,000 families with a broad socioeconomic background. This group practice will utilize nurses and physician assistants in a cooperative approach, and it is intended that this experience will train the residents as future managers of a health team.

PATIENTS: Ambulatory -- Patients will include students, employees, nurses, AFL-CIO employees and their respective families.

Hospital -- Patients will be admitted to the Inpatient Service of the Department of Family Medicine and cared for by the trainees.

Institutional -- The trainee is exposed to community organizations, community health centers and child development centers.

TRAINING: Over the three year training period, the resident's time will be divided approximately as follows: Medicine 40%; Pediatrics 14%; Psychiatry 10%; Electives 16%; Surgery (including ambulatory surgery, orthopedics, Ob-Gyn and Emergency Department) 20%.

Over the three year training period, approximately 30-40% of total effort will be spent in the Model Practice Unit (First year - one half day per week; Second year - three half days per week; Third year - four half days per week). There will be graded responsibility. There are innumerable conferences and seminars.

FUNDING: This program is funded through institutional support, fees for services and a federal training grant.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency

SITE: St. Margaret Memorial Hospital

265 46th Street

Pittsburgh, Pennsylvania 15201

DATE OF OPERATION: July 1, 1970

DIRECTOR: James A. Ferrante, M.D.

FACULTY: Family Physicians, physicians representing other disciplines, allied health personnel.

RESIDENTS: Positions available: First Year 2 -- $9,840
Second Year 2 to
Third Year 2 -- $11,040
Identity retained.
No. residents completing program: None

MODEL: The Family Health Center consists of a building adjacent to the hospital with reception area and business office, 4 exam rooms (including Peds & Minor Surgery), consultation offices, conference room, nurses station, 2 doctors' offices, lab facilities. This unit functions independently from the hospital and is responsible for billing, etc. on its own.

PATIENTS: Ambulatory -- 500 to 1,000 families representing broad socio-economic range. 35 families assigned first year resident; 70 to 90 assigned second year resident; 150 families assigned third year resident.

Hospital -- Resident admits patients to all services and is responsible for their continuing medical care.

Institutional -- Community Public Health, Well-Baby Clinics, Neighborhood Mental Health, Alcoholic and narcotic addition centers.

TRAINING: The family practice resident spends 20% of his first year in the Family Health Center. 80% of his first year is spent in rotation through the clinical disciplines on block assignments decreasing to 40% in his third year. The time in the model unit is increased to 60% in the third year. Internal Medicine 6-12 months, General Surgery 2-4 months, Ob-Gyn 2-5 months, Pediatrics 3-6 months, Psychiatry 3 months & continuous, Elective 7-15 months.

The residents are taught administrative procedures in running an office, and are responsible for their own Blue Shield and Medicare forms as well as determining the proper fee for the individual patients.

Behavioral science is a major consideration in this residency program with indepth Family Practice psychiatry seminars. Academic courses are offered during the second and third years in sociology, cultural anthropology and related fields.

The family practice resident will present cases that are of interest to the specific conferences; whether the patients be from the Family Practice Unit or from the Inpatient Service to which he is assigned.

FUNDING: This program is financed through free hospital support and fees for services.

DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE:	Family Practice Residency
SITE:	Shadyside Hospital 5230 Centre Avenue Pittsburgh, Pennsylvania 15232
DATE OF OPERATION:	July 1, 1971
DIRECTOR:	William J. Garner, M.D., ABFP
FACULTY:	6 Family Physicians, 31 physicians of other disciplines, heads of ancillary medical services, County Health Department administrator.
RESIDENTS:	Positions available: First Year 3 -- $7,800 Second Year 3 to Third Year 3 -- $9,000 Identity retained. No. residents completing program: None
MODEL:	The Family Health Services Office, an identifiable and separate unit simulating a private physician's office, is a three room unit comprised of a secretarial office, the director's office and an examining room. Across the hall is another unit with two examining rooms, which is run as a family clinic in the mornings. Three more 3-room suites are adjacent and will be used as more residents enter the program.
PATIENTS:	Ambulatory -- Increasing number of families representing various socioeconomic levels. Primary service area of 60,000 persons and a regional area of about 600,000 inhabitants. Hospital -- Inpatients admitted to separate family practice unit and resident may admit on other services to which he is assigned. Institutional -- County Health Department, nursing homes.
TRAINING:	The family practice resident spends one-half day per week of his first year in the Family Health Services Office. The remaining portion of his first year is spent in rotation through the clinical disciplines on block assignments. The resident spends an increasing

number of regular office hours throughout training in the Family Health Services Office (approximately 16 to 32 during the third year). Internal Medicine 30%, Surgery 8%, Pediatrics 16%, Ob-Gyn 8%, Psychiatry 8%, Elective 10%.

The resident during the second year of training has office preceptorships of one-half month duration in allergy, dermatology, gastroenterology, neurology, orthopedics, ophthalmology, urology and otorhinolaryngology and two months preceptorship in Ob-Gyn. Each preceptorship will involve one-half day four times a week. During the third year the resident will have preceptorships in community medicine (County Health Department) and in the office of a family physician, each full time and of one month duration.

The resident will be required to engage in a research project relative to family practice subject to approval by the faculty.

A family practice conference involving residents and a family practice director's conference involving faculty and staff each will be held weekly. One conference per day is scheduled Monday through Saturday.

FUNDING: This program is funded by Shadyside Hospital and by fees for services.

AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency

SITE: Reading Hospital

6th & Spruce

Reading, Pennsylvania 19602

DATE OF OPERATION: Approved as Family Practice Residency, February 7, 1972

DIRECTOR: John Wagner, M.D., ABFP

FACULTY: Full time director, family practitioners, many certified by ABFP, representatives of all other specialties on Reading Hospital staff.

RESIDENTS: Positions available:

First Year	2	-- $10,632
Second Year	2	-- $11,232
Third Year	2	-- $11,832

Identity retained.
No. residents completing program: None

MODEL: Family Practice Office - A new facility especially created for this Family Practice Residency in the Doctor's Office Building, a new building operational since 1971, located adjacent to Reading Hospital, which contains all necessary examination, consultation, business and office lab rooms, utilizing 3,800 sq. ft.

PATIENTS: Ambulatory -- Patients come from the entire spectrum of the socio-economic sections of the community.

Hospital -- Patients are admitted by the resident, as well as the director of the department.

Institutional -- The senior resident or Director of the department follow patients in three convalescent centers. There is contact with other community organizations, such as Family Planning, Children's Aid.

TRAINING: First Year - The family practice resident spends full time on hospitalized patients with the exception of outpatient services within the hospital and three hours per week in the Family Practice model office. The resident spends a minimum of six months in internal medicine and the remaining time is spent on pediatrics, general surgery and Emergency Room. The resident will develop up to forty families for whom he is primarily responsible.

Second Year - Three months of OB and GYN including one month devoted completely to office GYN. The remainder of the time is spent in electives, one of which will be cardiology. The resident spends ten hours in the Family Practice model office. The electives are of three months' duration during which time the resident will also serve as a preceptee under the other specialists, primarily in their offices.

Third Year - The resident will select electives in his interest and need so that he develops some of the skills which he was unable to obtain in the first and second years. He spends 80% of his time in the Family Practice module which will include care of patients within the hospital and within the adjacent convalescent centers. By the end of the third year the resident will have developed a panel of 100 families for which he is primarily responsible.

The resident will attend all Family Practice conferences, as well as conferences of the other hospital departments.

FUNDING: This program is funded by the Reading Hospital, which is the parent organization. Funds will become available on a fee-for-service basis.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency

SITE: Washington Hospital
155 Wilson Avenue
Washington, Pennsylvania 15301

DATE OF OPERATION: December 1, 1971

DIRECTOR: George C. Schmieler, M.D., ABFP

FACULTY: 13 Family Physicians, 28 internists, 13 obstetrician-gynecologists, 16 surgeons, 12 pediatricians, 3 psychiatrists, 8 allied health personnel.

RESIDENTS: Positions available:

First Year	4	--	$800/mo.
Second Year	4	--	$1,000/mo.
Third Year	4	--	$1,200/mo.

Identity retained.
Number of residents completing program: None.

MODEL: The model family practice unit is 2,318 square foot area located with the Washington Hospital. It has four offices, conference room equipped with conference table and chair, projector, tape recorder, book shelves, large waiting area, four examining cubicles fully equipped. X-ray, laboratory, EKG, EEG, and Isotope Departments are all on the floor above.

PATIENTS: Ambulatory -- Emergency Room patients who wish to enter Family Practice Program and/or those who are deemed acceptable by the Family Practice Residency Committee will be part of training program. 42,963 emergency room visits per year from all economic strata.

Hospital -- Patients entering hospital on Family Practice Service will be followed throughout hospitalization by resident.

Institutional -- Residents will follow patients in extended care facilities.

TRAINING: The Family Practice residency at The Washington Hospital is divided into four major areas: (1) Inpatient Service, (2) Family Practice Model or Resident's private practice, (3) Preceptorship training in physicians' offices and (4) Night Call.

During the resident's three years of training, he will be assigned to inpatient services consisting of Medicine and its specialties (33% of resident's time), Pediatrics (16%), Psychiatry (8%), Ob-Gyn (16%), General Surgery and Surgical Sub-specialties (16%), Electives (16%).

The resident will spend one afternoon, during the first year, in the model family practice unit, two afternoons in the second year, and four afternoons in the third year.

Preceptor Training will take place in offices of physicians whose practice is meaningful for the Family Physician. While on Inpatient Medical Service, the resident will spend several afternoons each week in Medical subspecialists' offices. Time spent in these offices will decrease as resident's family practice load increases.

During the first year, the resident will have Emergency Room coverage on a basis of one night out of every four. These responsibilities decrease as Family Practice group grows.

Conferences are held ten hours weekly and residents present cases when applicable and are responsible for maintaining an active role in all conferences.

FUNDING: This program is totally financed by The Washington Hospital.

Number of residents having completed program: One

MODEL: In August 1972 the Family Practice Clinic will move into a renovated nursing home. It will occupy 23,000 square feet of this 30,000 square feet structure. The clinic will contain 18 exam rooms, 18 offices for faculty and staff, a small conference room (later on a large conference room), large learning lounge, laboratory and large classroom for 50 residents ready in 3 to 6 months. Model pharmacy and model dental office will be located in the same building

PATIENTS: Ambulatory -- Patients are derived by inviting selected families from full socioeconomic range. Each resident cares for approximately 50 families. The number of families enrolled in the Family Practice Clinic is controlled to insure a high quality of educational experience.

Hospital -- Family Practice patients are specifically assigned to the Family Practice Service of the Medical University Hospital and Charleston County Hospital.

Institutional -- Experience in nursing and convalescent homes.

R

TRAINING: In the first year there are block-time assignments to major clinical services in the Medical University Hospital and other medical center hospitals. One month is assigned to Community Medicine. During this period, community health programs and resources are explored, assuring that the Family Practice resident knows what community health resources are available to his families. Ten percent of time is reserved to follow his own families in the Family Practice Clinic. An additional ten percent of time is reserved for urgent and emergency appointments for his family members.

In the second year, fifty percent of the resident's time is in block assignments to major and minor services in the hospital with four months being elective time. Thirty percent of his time or three half days are spent seeing his own family members in the Family Practice Clinic. Ten percent of effort is reserved for urgent and emergency appointments. One half-day per week is spent in the Outpatient Psychiatry Clinic and the Mental Health Clinic to gain experience in the management of psychiatric crises and to learn to give supportive psychotherapy.

Early in the third year, the resident will spend two or three months with an exemplary family physician in a type of practice matching his own future plans. He will learn office management and have the opportunity to evaluate his own strengths and weaknesses. Upon returning to the Family Practice Clinic, he will manage his own families, and teach less experienced residents. Thirty percent of his time will be available for working in areas where additional training is needed.

FUNDING: This program is funded by appropriation from the state of South Carolina to the Medical University and by fees for services.

DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency Program

SITE: Greenville General Hospital
P.O. Box 7077, Branwood Station
Greenville, S.C.

DATE OF OPERATION: July 1, 1971

DIRECTOR: E.F. Gaynor, M.D., ABFP

FACULTY: Full time staff includes 2 Family Physicians, 1 physician each in Medicine, Pediatrics, Cardiopulmonary laboratory, Radiation therapy. In addition, there are 6 part-time Family Physicians, one nurse-lab technician and ancillary personnel are available.

RESIDENTS: Positions available:

First Year	6 --	$10,000
Second Year	6 --	to
Third Year	6 --	$12,000

Identity retained.
Number of residents having completed program: None.

MODEL: The Family Practice Center is designed to function as any well-equipped private Family Physician's office. It is separate from the parent hospital with reception and waiting room, lab, offices for residents, treatment rooms, along with adequate secretarial and nursing personnel.

PATIENTS: Ambulatory -- There are at present approximately 100 families enrolled from all socioeconomic levels.

Hospital -- Inpatients are assigned to Family Practice residents.

Institutional -- Public Health Department, nursing homes.

TRAINING: The family practice resident spends five hours per week of his first year in the model family practice unit. The remaining portion of his first year is spent in rotation through the clinical disciplines on block assignments. The time in the model unit is increased to 10 hours per week the second year to 25 hours per week during the third year. Internal Medicine 40%, Pediatrics 30%, Psychiatry 10%, Surgery 5%, Ob-Gyn 5%, Electives 5%. Two conferences in Family Practice are held weekly. Preceptorships second year in Pediatrics, Community Medicine, Insurance Medicine, Speech and Hearing, and Dermatology. Third year residents - preceptorships in Family Medicine, Urology, Orthopedics, Public Health, Ophthalmology, Otolaryngology and Proctology. Residents will attend the Greenville Postgraduate Seminar held each year for three days at Greenville General Hospital.

FUNDING: This program is financed by fee for service.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency

SITE Spartanburg General Hospital

101 East Wood Street, Box 4186

Spartanburg, South Carolina 29303

DATE OF OPERATION November 1, 1970

DIRECTORS: Robert H. Taylor, M.D., ABFP and Warren C. Lovett, M.D., ABFP

FACULTY: Family physicians, specialists in other disciplines, allied health personnel.

RESIDENTS: Positions available:

First year	4	-- $8,400
Second year	4	to
Third year	4	-- $9,600

Identity retained.
Number of residents completing program: None.

MODEL: The present Model Family Practice Unit is located in the Outpatient Department of the Spartanburg General Hospital. The Unit is physically distinct and has its own receptionist, nursing service personnel, offices and examining rooms for our residents. Each resident has his own office with adjoining examining rooms available. In the near future, a new Ambulatory Care Center will be under construction, providing new facilities for the Model Unit. The Unit will then be entirely separate from the regular outpatient services. The Family Practice Unit will be constructed on a "modular" concept with four separate units, that in essence, simulate separate practice units.

PATIENTS: Ambulatory -- Patients seen by the residents are referred by physicians, and screened by Patient Acceptance Committee, composed of local practicing family physicians. Patients represent a broad socioeconomic range and a broad range of medical problems.

Hospital -- Inpatients are assigned specifically to resident when on rotation, in addition to patients from his own families.

Institutional -- Mental Health Center, County Health Department.

TRAINING: The family practice resident spends 25% of his time in the model family practice unit throughout the entire program. From 33-50% of his training is spent in Internal Medicine, 16-20% in Pediatrics, 8-16% in Psychiatry, 10-35% in Community Medicine, 16% in Surgery and Ob-Gyn, and 10% Electives, Conferences and extramural assignments 10%.

Two outreach clinics are also operational via the Model Family Practice Unit, in an attempt to acquaint the resident with some of the current problems of access to the health care system. One of these is under the auspices of the Model Cities Program in a predominantly indigent area.

FUNDING: This program is financed by Spartanburg General Hospital, Appalachian federal program, and fee for services.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Medicine Clinic

SITE: 415 Texas Avenue

University of Texas Medical Branch Campus

Galveston, Texas

DATE OF OPERATION: July 1, 1972

DIRECTOR: M.L. Ross, M.D., ABFP

FACULTY: The faculty has a Family Physician as a full time director. Other full time faculty include a Family Physician, Internist, Pediatrician, and half-time Psychiatrist. Appointed volunteer faculty include selected local physicians and specialists from the community hospital.

RESIDENTS:

Positions available :	First Year	4 -- $9,000
	Second Year	4 -- $9,600
	Third Year	4 --$10,200

Identity retained.
Number of residents having completed program: None.

MODEL: The family practice clinic is located one block from the main medical center hospital. The unit occupies two floors, the lower floor includes the registration and waiting room area, a library, 7 examining rooms, one of which has complete ENT facilities, a family therapy room with one-way mirror and equipped for video and sound recordings, a laboratory, treatment room and two consultants' offices. The second floor contains the administrative offices and a large conference room. 9,600 square feet are utilized for the Family Practice model unit.

PATIENTS: Ambulatory -- Families may enroll on a voluntary basis or by referral from the local physicians or county medical society. Selection and assignment of families will be through a committee with an attempt to give each resident a cross section of patients in age, sex, socioeconomic class, ethnic origin and disease.

Hospital -- Inpatients will be admitted by the resident with supervision by the appropriate faculty member. Patients may be admitted to either the University Hospital or the community hospital located two blocks from the clinic.

Institutional -- Both the residents and the staff will work with the county community health clinic, community mental health, public schools, public health department, social service agencies and extended care facilities.

TRAINING: During the first year the family practice resident has a four months medicine, three months pediatric, two months Ob-Gyn, two months surgery, and one month family practice clinic rotation, in addition to one-half day per week in the model clinic. In the second and third year he will have five months medicine electives, four months in psychiatry, three months pediatric elective, one and one-half months dermatology, one and one-half months ENT and one and one-half months anesthesia. He will also spend three half days per week in the Family Practice clinic and one-half day every other week in the Ob-Gyn clinic. In his third year, seven months are available for electives in all the major and minor specialties, as well as family practice preceptorship. Conferences are held two times weekly. At the present time medical students will be able to participate in the training in their senior year, which will be a one year elective. Allied health personnel who receive training in the model family practice unit are clinical associates (physicians' assistants) training in the area of family medicine.

FUNDING: The program is funded from state and federal appropriations as well as fees for services.

DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: McLennan County Medical Society Family Practice Residency Program

SITE: Providence Hospital

1725 Colcord Avenue

Waco, Texas 76703

DATE OF OPERATION: July 1, 1970

DIRECTOR: Jackson K. Walker, M.D.

FACULTY: 17 Family Physicians, 17 Internists, 5 Pediatricians, 24 Surgeons, 8 Obstetricians-Gynecologists, 6 Neuropsychiatrists, 24 ancillary personnel.

RESIDENTS: Positions available: Two year program with prerequisite straight or rotating internship.

Second Year	6	-- $10,000
Third Year	6	-- $12,000
Chief Resident		-- $15,000

Identity retained.
Number of residents having completed program: None

MODEL: Family Practice Clinic is the outpatient clinic of Providence Hospital located on the ground floor plus one mobile trailer in Model Neighborhood area. The clinic contains the Director's office, large waiting room area, 2 exam rooms, dental room, gynecology room, X-ray, pharmacy, rest rooms (6,100 square feet).

PATIENTS: Ambulatory -- 20,000 Model Neighborhood residents. Residents have families assigned to him for whom he is responsible during entire stay in program. Large portion are from indigent population but include all age and ethnic groups.

Hospital -- Families are residents' responsibility in the hospital in Family Practice beds.

Institutional -- Veterans' Administration psychiatric hospital, Rehabilitation Center.

TRAINING: The Family Practice Clinic is operated as a model physician's office and residents are exposed to family physicians, consultant physicians, nurses, social workers, pschologists, volunteers, therapists, etc. Residents have opportunity to learn how to use their consultants and allied health personnel to give the most efficient health care to their ambulatory patients. Resident spends entire time in Family Practice, deriving specialty training through consultation exposure to specialty desciplines on both inpatients and ambulatory patients; elective periods in each year to spend as resident desires with specialist or preceptorship.

Residents are required, under supervision, to organize and complete a research project during two-year period.

Weekly family practice conferences; specialty conferences, conferences with program coordinators, Director of Medical Education, and residents for critique and program planning; conferences with personnel from allied health fields; closed circuit T.V.

FUNDING: This program is funded on the fee-for-service basis.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: University of Utah Family Practice Residency Program in University of Utah Affiliated Hospitals for Family Practice

SITE:

University Medical Center
50 North Medical Drive
Salt Lake City, Utah

McKay-Dee Hospital Center
3939 Harrison Blvd.
Ogden, Utah

St. Benedict's Hospital
3000 Polk Avenue
Ogden, Utah

DATE OF OPERATION: August 30, 1971

DIRECTORS: John P. Geyman, M.D., ABFP, Associate Prof. & Chairman, Division of Family Practice; George Snell, M.D., ABFP, Director of McKay-Dee; Robert Potts, M.D., ABFP, Director of St. Benedict's.

FACULTY: Approximately 20 Family Physicians active in teaching programs in both Ogden hospitals, together with representatives from all other specialties; Directors of Medical Education in both Ogden hospitals; 3 Family Physicians and consultants in all clinical disciplines at University Medical Center.

RESIDENTS:

Positions available:			
	First year	12	-- $8,700
	Second year	12	to
	Third year	12	-- $9,700

Identity retained.
Number of residents having completed program: None

MODEL: There are now two Model Family Practice Units in the program:

Family Practice Center at University Medical Center is 1,500 square feet, located on ground floor of University Medical Center, and includes six examination rooms, minor surgery, nursing station, business area, and waiting rooms.

Family Practice Center at McKay-Dee Hospital is 2,500 square feet, has similar facilities plus a conference room, and will be expanded to approximately 4,000 square feet next year.

PATIENTS: Ambulatory -- Patients are accepted without restriction. At University Medical Center, the major sources of patients are faculty and their families, hospital employees, students, new patients without physicians inquiring of county medical society and University Hospital. The major source of patients at McKay-Dee Family Practice Center are derived from Dr. Snell's previous private practice, together with new referrals from the community.

Hospital -- Patients from either Model Family Practice Unit requiring hospital admission will be followed by the family practice resident, either under the supervision of family practice faculty or consultants. In addition, residents are assigned other patients of teaching physicians on other specialty rotations at McKay-Dee and St. Benedict's Hospitals.

Institutional -- Residents' exposure includes extended care facilities, Public Health Department programs such as venereal disease clinics and family planning clinics and Weber County Mental Health Programs.

TRAINING: The family practice resident spends one-half day per week in the Model Family Practice Unit during the first year. The remainder of his first year is spent in rotation through the traditional clinical disciplines of medicine. Time spent in the Model Unit is increased in the second year to two one-half days per week and in the third year to three one-half days per week. Internal Medicine: 10 months, Surgery: 6 months, Pediatrics: 5 months, Ob-Gyn: 4 months, Emergency Room: 2 months, Psychiatry: 1 month, plus regular outpatient training over 3 years on selected afternoons, Preceptorship training: 1 month, Electives: 7 months.

Conferences are held approximately 8 hours per week, in the areas of Family Practice, Medicine, Pediatrics, Psychiatry, Obstetrics-Gynecology, Surgery and Radiology. There is a weekly Visiting Professor Program, and University Medical Center seminar or Family Practice Grand Rounds at the University every two weeks. In addition, conferences are held at regular intervals on medical audit, morbidity and mortality, and journal clubs.

FUNDING: Each hospital is funding the component parts of the program through a combination of sources, including medical education funds and revenue from the Model Family Practice Units. Federal funding for the total program is being applied for; the Model Family Practice Units operate on a fee-for-service basis; there is no state support for the residency program at this time.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency Program

SITE: University of Virginia Medical Center

1224 West Main Street, 3rd Floor

Charlottesville, Virginia 22903

DATE OF OPERATION: July 1, 1971

DIRECTOR: Richard W. Lindsay, M.D.

FACULTY: Four full time faculty members in the Model Family Practice Unit.

RESIDENTS: Positions available:

First Year	6	-- $8,400
Second Year	6	to
Third Year	6	-- $9,400

Identity retained.
Number of residents having completed program: None

MODEL: The Family Health Center is adjacent to the University of Virginia Hospital. The Center includes twelve examining rooms, four Faculty physicians offices, a minor surgery room, a large conference room with library area, a residents' office, a visiting Faculty physician office, student carousels, a record room, laboratory, a business office and large waiting/receiveing area. It has its own laboratory capability and a closely allied X-ray unit in the adjoining building.

PATIENTS: Ambulatory -- Specific families assigned to each resident: 1st year resident 5-10 families; 3rd year resident 50-75 families. Middle and upper income families.

Hospital -- Resident admits and cares for his patients in extended care facility adjacent to Family Health Center; if necessary to transfer or admit patient to the University of Virginia Hospital because of more complicated illness, the resident will follow that patient after admission.

TRAINING: The family practice resident spends 14% of his first year in the model family practice unit. The remaining portion of his first year is spent in rotation through the clinical disciplines on block assignments. The time in the model unit is increased to 100% in the third year. Internal Medicine, 6 months; Pediatrics, 4½ months; Surgery/Emergency Room, 1 month; Psychological Medicine, 2 months; Ob-Gyn, 4 months; Electives, approximately 6 months.

Regularly scheduled conferences and seminars at the Family Health Center plus scheduled conferences at University Medical Center. A seminar course will be organized and offered each year covering the business, legal, social and other aspects of family practice.

A major emphasis of the Family Health Center is in developing allied health personnel who can participate in teaching and in the delivery of health care. Medical students also participate in the training.

FUNDING: This program is financed by the Commonwealth of Virginia and on the fee-for-service basis.

White, Associate Professor of Family Practice and Associate Director, Family Practice Center.
Fairfax Family Practice Center: Alan Mackintosh, M.D., Associate Professor of Family Practice and Director, Family Practice Center; Robert K. Quinnell, M.D., Associate Professor of Family Practice and Associate Director, Family Practice Center.

Consultant Faculty: Consultant faculty are chosen from appropriate faculty of the medical school as well as physicians practicing in the communities in which the models are located. All consultants are compensated for the time spent in the model units and training programs.

RESIDENTS: Positions available:

	Blackstone	Fairfax	Riverside	TOTAL	
1st Year	6	6	12	24 --	$8,400*
2nd Year	6	6	12	24 --	$8,900
3rd Year	6	6	12	24 --	$9,400

* Basic stipend is that allowed by the State of Virginia.
Allowances and fringe benefits for each Family Practice Center are determined by the director.
Identity retained.
No. residents completing program: None

MODEL PRACTICES: Blackstone Family Practice Center: Located in small town one hour from Richmond, surrounded by rural countryside. The medical building is designed specifically for the delivery of primary care.

The patient population is practically the entire population of Blackstone and the surrounding area. All socioeconomic groups are represented.

Residents hospitalize patients from Blackstone in MCV/VCU Hospitals and in community hospitals. Electives are available in the medical center as well as community hospitals.

Fairfax Family Practice Center: The Family Practice Center is located in the Town of Vienna, five minutes drive from Fairfax Hospital. Five thousand square feet of space are being rented on the second floor of an attractive office building. In all, there are 12 examining rooms, five consulting rooms, a conference room, a treatment room, an x-ray room, laboratory and two business areas in addition to a large waiting room. The Family Practice Center is approximately five minutes from the hospital.

Residents hospitalize their patients in the Fairfax Hospital, a 720-bed community hospital.

Residents care for geriatric patients in area nursing homes, county jail occupants and workers in a local industry.

Riverside Family Practice Center: The Family Practice Center contains a reception room, two waiting rooms, eight resident offices, eleven exam rooms, two nurses' stations, treatment room, conference room, administration office, lab, x-ray, pharmacy adjacent to model in the same building.

Patients are derived from the Outpatient Department and Emergency Room referrals and represent full socioeconomic range.

Residents hospitalize their patients in Riverside Hospital, a modern 540-bed community hospital.

TRAINING: Throughout the system the first-year of residency is basically a rotating internship year, although some time may be spent in the model unit. The second two years are based primarily in the model units; however, four months electives in each year are available for appropriate hospital experience.

Consultants in all appropriate fields are brought regularly to the model units to deal with the clinical problems of the practice population. Records are kept in a manner which allows identification of all patients in the practice with similar clinical problems.

The problem-oriented record system is used in each center.

Projects in the evaluation and use of health teams, epidemiology, nurse practitioners and other aspects of primary health care delivery are currently being pursued.

FUNDING: Funding specifically for residencies in family practice have been provided by the Virginia State Legislature. These funds are supplemented by incomes generated by the Family Practice Centers.

TITLE: Family Practice Residency

SITE: Roanoke Memorial Hospitals

Bellview at Jefferson Street

Roanoke, Virginia 24014

DATE OF OPERATION: July 1971

DIRECTOR: Charles L. Crockett, M.D.

FACULTY: Full time Director and Assistant Director, Francis Amos, M.D.; 20 voluntary Family Physicians, 12 internists, 12 pediatricians, 6 surgeons, 6 obstetricians-gynecologists, 4 Emergency Room physicians, 12 nurses, medical psychologist, social worker.

RESIDENTS: Positions available:

First Year	6 -- $6,500	Plus $4,000 in additional fringe benefits for housing, etc.
Second Year	6 -- $6,600	
Third Year	6 -- $6,900	

Identity retained.
No. residents completing program: None

MODEL: The Model Family Practice Unit is located half a block from the hospital. It has a large parking area with space for 100 cars. The Unit is 5,000 square feet and contains 6 exam rooms, 6 consultation areas, conference room, library, laboratory, business office, waiting room and Director's office.

PATIENTS: Ambulatory -- Patients accepted without restriction from all socioeconomic backgrounds. First year residents care for 10 to 15 families and third year residents care for 100 or more families.

Hospital -- Residents admit their own families to the hospital and function on an equal status with residents of other services.

Institutional -- Residents receive training in hospital-affiliated rehabilitation center and Guidance Center.

TRAINING: The family practice resident spends 10% of his first year in the model family practice unit. The remaining portion of his first year is spent in rotation through the clinical disciplines on block assignments. The time in the model unit is increased to 50-60% in the third year. Internal Medicine 30%, Pediatrics 15%, Ob-Gyn 5%, Surgery 5%, Psychiatry 10%. The remainder of the time is spent in Electives and Family Medicine. Conferences are held 10 hours weekly. Medical students participate in the training.

FUNDING: This program is funded by Roanoke Memorial Hospitals, fees for services, state and federal funds.

AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency Program

SITE: The Doctors Hospital

909 University

Seattle, Washington 98101

DATE OF OPERATION: July 1, 1971

DIRECTOR: Joseph N. Scardapane, M.D., ABFP

FACULTY: Volunteer faculty of Family Physicians and all other specialists.

RESIDENTS: Positions available:

First Year	6	- $8,400	
Second Year	4	to	with fringe benefits.
Third Year	4	-$12,000	

Identity retained.
Number of residents having completed program: None

MODEL The current Doctors Hospital Family Practice Clinic, 1305 Seneca Street, has been in operation since July 8, 1970 and is located four blocks east of the hospital. The current space of 640 square feet, selected as a pilot project, serves an average of fifteen patients each afternoon. A move to a larger unit is anticipated by July, 1972. This unit will occupy a space of approximately 5,000 square feet to accommodate the increased number of residents in the training program. The new facility will have its own diagnostic and business services.

PATIENTS: Ambulatory -- 1,000 families- first year resident cares for about 10 families, second and third year residents' patient population approaches 100 families.

Hospital -- The resident consults with the Director of the clinic when admission is considered. If indicated, the patient is admitted under the name of the Director. Routine Ob's and clear emergencies are admitted directly, and the faculty member on call is notified that the patient is being admitted. Third year resident may admit patients directly.

Institutional -- Residents see their patients when admitted to extended care facilities.

TRAINING: The Doctors Hospital has developed a Family Practice Clinic which truly reflects an office setting representative of a group family practice. Resident will recognize the Family Practice Clinic as his primary base of operation and will be guided in his transition from hospital oriented patient care to ambulatory patient care. Time spent in the Family Practice Clinic is one-half day per week during the first year, three half days per week during the second year and five and one-half days per week during the third year.

Responsibility in the Hospital: The first year resident has responsibilities for a maximum of 15 patients when on each hospital service. The second year resident acts as chief resident on hospital services. He personally follows up to 15 of the more challenging cases. He arranges for the more serious or interesting cases to be presented to the assigned faculty member at formal rounds. The second year resident assumes an increasing responsibility in the surgical and obstetrical suites, i.e., he regularly functions as first assistant in major surgical cases and performs those procedures of lesser technical difficulty supervised by the surgical and obstetrical faculty. The third year resident assumes the responsibility of a junior attending physician in making rounds on all hospitalized FPC patients. The first year resident is assigned to the Cardiac Care Unit for one month during which time he also follows those patients transferred from CCU to the adjacent medical floor. The second year resident may choose electives in the Cardiac Care Unit and the third year resident cares for Family Practice patients admitted to CCU under supervision.

Daily teaching session including problem oriented rounds, conferences and symposia. There are specific assignments at Children's Orthopedic Hospital in the first and third years, other extramural assignments can be elected.

FUNDING: This program is funded from The Doctors Hospital educational budget and fees for service generated in the Model Clinic.

AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Residency Training Program for Family Practice

SITE: Group Health Cooperative of Puget Sound

200 Fifteenth East

Seattle, Washington 98102

DATE OF OPERATION: July 1, 1969

DIRECTOR: John Quinn, M.D.

FACULTY: 40 Family Physicians, 70 specialists in every category, ancillary personnel in every category.

RESIDENTS: Positions available:

First Year	2 --	$600/mo.
Second Year	2 --	to
Third Year	2 --	$800/mo.

Identity retained.
Number of residents having completed program: None

MODEL: The central medical center includes outpatient offices in immediate proximity to the hospital. These area medical centers are attractive 6-15 man clinics. The family practice department contains 6 examining rooms, 2 consultation rooms, and an office for each resident and staff member

PATIENTS: Ambulatory -- 120,000 individuals, mostly in family units, receive all their medical care from Group Health medical staff through a prepaid program.

Hospital -- Patients are admitted to the hospital by a physician who first sees them as outpatients. Usually the physician follows the patient through his hospitalization. Residents maintain responsibility for their own patients.

Institutional -- Group Health staff cares for the expected number of nursing home and chronically ill patients in community facilities.

TRAINING: The family practice resident spends one-half day per week during his first year in the model family practice unit seeing his panel of patients under an assigned preceptor. The balance of the resident's time, during his first year, is spent in the specialty departments being precepted by the physician in charge of the specialty department. Internal Medicine 2-3 months, Pediatrics 2 months, Ob-Gyn 2 months, Orthopedics 1 month, Dermatology 1 month, Surgery 1-2 months, EENT 1 month. It is anticipated that the resident will spend 50% of his time in the family practice setting throughout his training. The second and third years are left open to fit the varying needs of individuals.

FUNDING: This program is financed by a nonprofit, prepaid health service program.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency

SITE: University of Washington School of Medicine - University Hospital
1959 N.E. Pacific Street
Seattle, Washington 98195

DATE OF OPERATION: July 1, 1972

DIRECTOR: T.J. Phillips, M.D., ABFP

FACULTY: Full time director, two full time Assistant Professors of Family Medicine, and one full time Instructor in Family Medicine, part-time Clinical Assistant Professor of Family Medicine; all other faculty of School of Medicine available.

RESIDENTS: Positions available:
First Year 6 -- $8,200
Second Year 6 -- $8,700
Third Year 6 -- $9,200

Identity retained.

Numbers of residents having completed program: None

MODEL: The University Hospital Family Medical Center is a 6,400 square foot structure located on a ground floor, one-story wing of the University Hospital with a separate entrance as well as direct access to the hospital's outpatient area. 12 exam rooms, 5 consultation and faculty offices, conference room, large waiting room, business office, resident desks, nurses' station, procto-table, minor surgery room.

PATIENTS: Ambulatory -- 1,500 - 2,000 families who are demographically representative of the Seattle community. First year resident begins with 20 to 30 families, building up to an average of 100 families or more per resident in the latter two years.

Hospital -- If a patient requires admission to the hospital, he will be admitted to the service of the faculty member on the resident's team, but the resident will continue caring for his patient in association with the attending faculty member.

Institutional -- State Welfare Deaprtment, Migrant Family Health Center in Toppenish, Washington, St. Mary's Indian Mission Clinics near Omak, Washington, nursing homes and the Licensed Practical Nursing School in Grandview, Washington.

TRAINING: The first two years of the residency program are relatively fixed with similar assignments for all residents. In the third year a series of elective opportunities permit individual residents greater variety in their assignments, consistent with individual training needs at that time. Approximately 30% of total time throughout the three years is spent in family practice. Internal Medicine 22% plus electives; Surgery 10% and electives; Pediatrics 22% and electives; Ob-Gyn 10% and electives; Psychiatry integrated into Model Practice; Electives 30%. Medical students are involved in the Family Practice residency program.

Grand rounds in clinical disciplines are required of the resident when he is assigned to the service involved and are optional at other times. In addition, regular conferences are held by all subspecialty divisions and are open to family practice residents. The weekly Family Practice Conference is built around discussion of families cared for in the model practice. Consultants from all medical specialties will be involved.

FUNDING: Financing is arranged through the biennial budget of the School of Medicine.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency Program

SITE: University of Wisconsin Medical School-St. Mary's Hospital Medical Center

709 South Mills Street

Madison, Wisconsin 53715

DATE OF OPERATION July 1, 1971

DIRECTOR: John Howard Renner, M.D., ABFP

FACULTY: Full time director, part-time assistant director, six area Family Physicians with academic status as Associate Clinical Professors of Family Medicine, a faculty nurse, faculty physician's assistant, research associate, patient education specialist, adminstrator, and part-time family counselor.

RESIDENTS: Positions available:

First Year	4	-- $9,200
Second Year	4	to
Third Year	4	-- $14,000

Identity retained.
Number of residents having completed program: None

MODEL: The Family Practice Clinic is currently located in a remodeled facility adjacent to St. Mary's Hospital. The clinic has 7 exam rooms, and ENT room, minor surgery room, business office, waiting room, administrative offices, small lab complex containing a hemotology lab, and nurses' lounge, ample storage space. Each resident has his own office.

PATIENTS: Ambulatory -- Resident is assigned 50 families during first year, 150-200 families second year and 200-500 families third year. These families represent a broad socioeconomic range in the community.

Hospital -- Resident will accept inpatient responsibility with a team of clinicians. In addition to the inpatient care of his "own" patients drawn from the model practice, the resident would share responsibility for the inpatient care of patients admitted by the members of his team.

Institutional -- The residents will spend time in 42 area health related facilities.

TRAINING: The residency program will be a three year program with the first two years spent largely in the Clinic and the teaching hospital. During his first year the resident will spend approximately 30% of his time at the Clinic, 50% at the hospital, 10% at other community facilities and 10% doing Electives. During the second year of his training the resident will spend 60 % of his time at the Clinic, 20% at the hospital, 10% at other community facilities and 10% doing Electives. The third year will be as close to actual practice as possible: 70% Clinic, 15% hospital, 5% other community facilities and 10% Electives.

The program does depart from the traditional system whereby residents move from one "service" to another (e.g. surgery, medicine, etc.). Instead, in the Family Practice Program the resident will accept inpatient responsibility with a team of clinicians. The team is to be chosen from family physicians and consultants who have actual experience working together. In addition to the inpatient care of his "own" patients, drawn from the model practice, the resident would share responsibility for the inpatient care of patients admitted by the members of his team. The pace and style of residency would be close to the pace and style of practice. The work load is tailored to the educational needs of the resident. Specialty training in areas such as surgery is arranged on an individual basis for those residents who desire it.

FUNDING: Fee for service. The initial funding was from the Wisconsin State Legislature.

COMMISSION ON EDUCATION
AMERICAN ACADEMY OF FAMILY PHYSICIANS
DESCRIPTION - FAMILY PRACTICE RESIDENCY PROGRAM

TITLE: Family Practice Residency

SITE: St. Michael Hospital
2400 West Villard Avenue
Milwaukee, Wisconsin 53209

DATE OF OPERATION: January 1, 1972

DIRECTOR: Norbert C. Bauch, M.D.

FACULTY: Full time: 3 pathologists and 3 radiologists, 1 psychiatrist, and family practice director. Many physicians of all disciplines participate in program.

RESIDENTS: Positions available:

First Year	12 --	$10,000
Second Year	6 --	$10,000
Third Year	6 --	$11,000
Fourth Year (optional)	--	$11,500

Identity retained.
Number of resident having completed program: None.

MODEL The Family Practice Center (7,200 square feet) is located on the ground floor of the hospital, but is a separate entity with a separate entrance. It contains 8 exam rooms, 4 consultation rooms, large conference room, laboratory.

PATIENTS: Ambulatory -- Approximately 1,100 visits per month. 1st year resident - 25 families; 2nd year - 75 families; 3rd year - 150 families.

Hospital -- Residents care for own patients in all departments throughout training.

Institutional -- Nursing homes and public health service.

TRAINING: The family practice resident spends 25% of his first year in the model family practice unit. The remaining portion of his first year is spent in rotation through the clinical disciplines on block assignments. The time in the model unit is increased to 75% in the third year. Second and third year assignments in conventional clinical disciplines are made per weakness and elective experience is available during the second and third year. Usual conferences and seminars.

FUNDING: This program is funded by a hospital subsidy and fee for service.
